EXECUTIVE SUMMARY

Subject to the qualifications and limitations stated in Section 1 of this report, TRC Companies, Inc. (TRC) was retained by the City of Boston Department of Neighborhood Development (DND; also known as “Client” or “User”) to perform a Phase I Environmental Site Assessment (ESA) of sixteen vacant parcels located in Boston/Dorchester, Suffolk County, Massachusetts (herein referred to as “Site No. 1 through Site No. 16”). TRC’s assessment was conducted in connection with the Client’s planned potential sale of the parcels. The Phase I ESA described in this report was performed in accordance with the scope and limitations of the American Society of Testing and Materials Practice E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-13). Limiting conditions and/or deviations from the ASTM E 1527-13 standard are described in Sections 1.3 and 7.5 of this report.

The subject Site consists of sixteen separate parcels identified as follows:

- Site No. 1 – an approximately 0.05-acre parcel at 24 Elmont Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402400000;
- Site No. 2 – an approximately 0.09-acre parcel at 20 Elmont Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402401000;
- Site No. 3 – an approximately 0.09-acre parcel at 52 Elmont Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402393000;
- Site No. 4 – an approximately 0.11-acre parcel at 77-79 Harvard Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402449000;
- Site No. 5 – an approximately 0.09-acre parcel at 81 Harvard Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402450000;
- Site No. 6 – an approximately 0.08-acre parcel at 84 Harvard Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1700131000;
- Site No. 7 – an approximately 0.10-acre parcel at 94 Harvard Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1700144000;
- Site No. 8 – an approximately 0.06-acre parcel at 147 Norwell Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1401652000;

- Site No. 9 – an approximately 0.06-acre parcel at 143 Norwell Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1401651000;
- Site No. 10 – an approximately 0.07-acre parcel at Norwell Street (1402340000) in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402340000;
- Site No. 11 – an approximately 0.03-acre parcel at 116 Norwell Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402341000;
- Site No. 12 – an approximately 0.08-acre parcel at Norwell Street (1402343000) in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402343000;
- Site No. 13 – an approximately 0.08-acre parcel at 106 Norwell Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402344000;
- Site No. 14 – an approximately 0.08-acre parcel at Norwell Street (1402345000) in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402345000;
- Site No. 15 – an approximately 0.07-acre parcel at Radcliffe Street (1402358000) in Boston, Suffolk County, Massachusetts located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402358000; and
- Site No. 16 – an approximately 0.07-acre parcel at 89 Radcliffe Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402357000.

The Sites are owned by the City of Boston. There are currently no buildings on Site Nos. 1 – 11 and 13 - 16. There is currently a former automobile garage on Site No. 12. A Site location map is included as **Figure 1**. A Site layout plan is included as **Figure 2**.

As a result of the Phase I ESA, including but not limited to our visual observation of the Site; review of historical information, environmental databases, and information provided by the User; interviews with current Site representative(s); and TRC’s professional judgment, no evidence of *recognized environmental conditions* (RECs) or *controlled recognized environmental conditions* (CRECs) associated with the Site, as defined by the ASTM E 1527-13 standard were identified.

This Executive Summary is part of this complete report; any findings, opinions or conclusions in this Executive Summary are made in context with the complete report. TRC recommends that the User read the entire report for all supporting information related to findings, opinions and conclusions.

Legal Notice

This document was prepared by TRC solely for the benefit of the User. With regard to third-party recipients of this document, neither TRC, nor the Client, nor the User, nor any of their respective parents, affiliates or subsidiaries, nor any person acting on their behalf: (a) makes any warranty, expressed or implied, with respect to the use of any information or methods disclosed in this document; or (b) assumes any liability with respect to the use of any information or methods disclosed in this document. Any third-party recipient of this document, by its acceptance or use of this document, releases TRC, the Client, the User, and their parents, affiliates and subsidiaries, from any liability for direct, indirect, economic, incidental, consequential or special loss or damage whether arising in contract, warranty, express or implied, tort, or otherwise, and irrespective of fault, negligence, and strict liability.

1.0 INTRODUCTION

TRC Companies, Inc. (TRC) has prepared this Phase I Environmental Site Assessment (ESA) for City of Boston Department of Neighborhood Development (DND hereinafter “Client” or “User”).

This report was prepared for and may be relied upon by Client for the purposes set forth herein; it may not be relied on by any party other than the Client and reliance may not be assigned without the express approval of TRC. Authorization for third party reliance on this report will be considered by TRC if requested by the Client. TRC reserves the right to deny reliance on this report by third parties.

1.1 Purpose and Scope of Services

The following Phase I ESA was performed for the sixteen separate parcels located in Boston/Dorchester, Suffolk County, Massachusetts (herein referred to as “Site No. 1 through Site No. 16”). A Site location map is included as **Figure 1**. This Phase I ESA has been prepared by TRC in accordance with the American Society for Testing and Materials E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-13) and is intended for the sole use of City of Boston DND (*Notice to Proceed email dated August 15, 2019*).

The purpose of this assessment is to identify *Recognized Environmental Conditions* (RECs) at the Sites, as defined by the ASTM E 1527-13 standard. The completion of this Phase I ESA report may be used to satisfy one of the requirements for the User to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), thereby constituting *all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial or customary practice* as defined by 42 U.S.C. §9601(35)(B) of CERCLA.

TRC understands that this assessment is not funded with a federal grant awarded under the United States Environmental Protection Agency (U.S. EPA) Brownfields Assessment and Characterization program.

The Scope of Services for this Phase I ESA included the following tasks:

- Site and vicinity reconnaissance;
- Site and vicinity description and physical setting;
- Historical source review and description of historical Site conditions;
- Interviews with owners, operators, and/or occupants of the Site, and/or local officials;
- Review of environmental databases and regulatory agency records;
- Review of previous environmental reports/documentation, as applicable;
- Review of environmental liens, if provided or authorized to obtain by the User; and
- Preparation of a report summarizing findings, opinions and conclusions.

Pursuant to the ASTM E 1527-13 standard, recommendations to conduct Phase II sampling or other assessment activities are not required to be included in this report. TRC can provide such recommendations upon request.

1.2 Additional Services

Items outside the scope of the ASTM E 1527-13 standard include, but are not limited to, the following:

- Asbestos-containing building materials
- Radon
- Lead-based paint
- Lead in drinking water
- Wetlands
- Regulatory compliance
- Cultural and historic resources
- Industrial hygiene
- Health and safety
- Ecological resources
- Endangered species
- Indoor air quality unrelated to *releases of hazardous substances or petroleum products* into the environment
- Biological agents
- Mold

No additional services were performed outside the scope of the ASTM E 1527-13 standard.

1.3 Deviations to ASTM E 1527-13 Standard

Notwithstanding additions to the ASTM E 1527-13 standard, as listed in Sections 1.2 and 9, if applicable, no significant deviations or deletions to the ASTM standard were made during this Phase I ESA.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject Site consists of sixteen separate parcels identified as follows:

- Site No. 1 – an approximately 0.05-acre parcel at 24 Elmont Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402400000;
- Site No. 2 – an approximately 0.09-acre parcel at 20 Elmont Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402401000;
- Site No. 3 – an approximately 0.09-acre parcel at 52 Elmont Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402393000;
- Site No. 4 – an approximately 0.11-acre parcel at 77-79 Harvard Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402449000;
- Site No. 5 – an approximately 0.09-acre parcel at 81 Harvard Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402450000;
- Site No. 6 – an approximately 0.08-acre parcel at 84 Harvard Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1700131000;
- Site No. 7 – an approximately 0.10-acre parcel at 94 Harvard Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1700144000;
- Site No. 8 – an approximately 0.06-acre parcel at 147 Norwell Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1401652000;
- Site No. 9 – an approximately 0.06-acre parcel at 143 Norwell Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1401651000;
- Site No. 10 – an approximately 0.07-acre parcel at Norwell Street (1402340000) in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402340000;
- Site No. 11 – an approximately 0.03-acre parcel at 116 Norwell Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402341000;
- Site No. 12 – an approximately 0.08-acre parcel at Norwell Street (1402343000) in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402343000;

- Site No. 13 – an approximately 0.08-acre parcel at 106 Norwell Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402344000;
- Site No. 14 – an approximately 0.08-acre parcel at Norwell Street (1402345000) in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402345000;
- Site No. 15 – an approximately 0.07-acre parcel at Radcliffe Street (1402358000) in Boston, Suffolk County, Massachusetts located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402358000; and
- Site No. 16 – an approximately 0.07-acre parcel at 89 Radcliffe Street in Boston, Suffolk County, Massachusetts, located in a mixed commercial/residential area and identified by the Boston tax assessor map as parcel 1402357000.

The Sites are owned by the City of Boston. A Site location map is included as **Figure 1**. A Site layout plan is included as **Figure 2**.

2.2 Site Improvements

There are currently no buildings on Site Nos. 1 – 11 and 13 – 16 are vacant and covered by vegetation. Site No. 12 is covered by vegetation and a former automobile garage is located on the southern portion.

2.3 Current and Historical Site Use

2.3.1 Current Site Use(s)

The Sites are currently owned by City of Boston as vacant parcels, with the exception of Site No. 12, which has a former automobile garage.

2.3.2 Previous Owner and Operator Information

Based on information provided by the User (Section 3), the historical record review (Section 4), and/or interviews conducted during this Phase I (Section 6), historical Site ownership and operator information is provided in the tables below.

|---------------------------------------|--|----------|----------|
| Tenants Unknown | Dwelling | c. 1899 | Unknown |
| Ronald Ingraham and Laura M. Ingraham | Dwelling until c. 1989/ vacant land | c.1975 | 1/6/1994 |
| City of Boston by Foreclosure | Vacant land | 1/6/1994 | Present |

2.4 Physical Setting

According to the United States Geological Survey (USGS) topographic map, South Boston, MA quadrangle dated 2012 (**Figure 1**), the Sites are located approximately 1.5 miles west of Savin Hill Cove (Boston Harbor), the topographic elevation at the Sites is approximately 95 feet above mean sea level (MSL). The local topography at the Sites slopes generally toward the south-southwest. The topographic slopes observed during the Site reconnaissance are sloping relatively flat. The Site is also located west of Boston Harbor which is possibly contributing to a localized radial groundwater flow pattern. Based on local topography and historical environmental reports reviewed by TRC, as applicable, the assumed direction of shallow

groundwater flow is to the northwest. However, a subsurface investigation would be required to determine actual ground water flow direction.

The database radius report supplied by Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut was reviewed to obtain information regarding the dominant soil composition in the vicinity of the Sites. This information is summarized below:

Site Nos. 1 through 16

| | |
|-----------------------|--------------------|
| Hydric Status: | Unknown |
| Soil Surface Texture: | Silt Loam |
| Soil Component Name: | Newport |
| Deeper Soil Types: | Channery Silt Loam |

Please refer to the Geospatial Physical Setting Source Summary of the EDR report presented in **Appendix A** for further information regarding the soil composition in the Site vicinity. According to EDR and Priority Resource Map (**Figure 3**), the Sites are not located in a Federal Emergency Management Agency (FEMA) 100-year flood zone. The Sites are located within 500 feet of protected open space areas located to the east-northeast and to the southwest.

3.0 USER PROVIDED INFORMATION

According to the ASTM E 1527-13 standard, certain tasks that may help identify the presence of RECs associated with the Site are generally conducted by the Phase I ESA User. These tasks include: providing, or authorizing the *environmental professional* to obtain, recorded land title records for environmental liens or activity and land use limitations (AULs); providing specialized knowledge related to RECs at the Site (e.g., information about previous ownership or environmental litigation); providing commonly known or *reasonably ascertainable* information within the local community about the *property* that is material to RECs in connection with the *property*; and informing the *environmental professional* if, as believed by the User, the purchase price of the *property* is lower than the fair market value due to contamination. A list of requested information was included in TRC's ASTM Phase I Environmental Site Assessment Proposal (see Section 1.1). Information provided by the User pursuant to that request is listed in Section 8.0. A copy of the User questionnaire is included in **Appendix B**.

3.1 Title & Judicial Records for Environmental Liens or Activity and Use Limitations

In addition to reviewing the EDR report (discussed in Section 4.2), local municipal records (Section 4.4), and the Massachusetts Land Records on-line database (Section 4.4), TRC obtained supplemental information regarding AUL-listed properties within the City of Boston from the MassDEP. No evidence of AULs associated with the Sites were identified.

3.2 Specialized Knowledge

The User was not aware of specialized knowledge related to RECs at the Site.

3.3 Property Value Reduction Issues

The User was not aware of property valuation reduction issues regarding the Site.

3.4 Commonly Known or Reasonably Ascertainable Information

No commonly known or reasonably ascertainable information was provided to TRC by the User.

3.5 Reason for Conducting Phase I

It is TRC's understanding that the User requires a Phase I for potential sale of the Sites.

4.0 RECORDS REVIEW

4.1 Historical Use Information

Information regarding Site and vicinity historical uses was obtained from various publicly available and practically reviewable sources including:

- Aerial photographs (scale: 1" = 500') dated 1938, , 1952, 1955, 1960, 1969, 1970, 1978, 1980, 1985, 1995, 1996, 2008, 2012, and 2016;
- Sanborn fire insurance maps dated 1899, 1931, 1950, 1964, 1989, 1990, 1993, 1994, 1995, 1996, 1998 and 2002;
- Topographic maps dated 1893, 1903, 1943, 1944, 1946, 1949, 1950, 1954, 1956, 1970, 1979, 1987 and 2012;
- City Directories dated 1930, 1935, 1945, 1950, 1960, 1965, 1969, 1975, 1984, 1990, 1992, 1995, 2000, 2005, 2010 and 2014;
- Local municipal records;
- An environmental database report; and
- Interview with Mr. James Smith (City of Boston – DND).

4.1.1 Site History

Operational History

Table 4.1 - Site History

| Year | Site History – Site No. 1 – 24 Elmont St |
|------------------|--|
| 1899 – c. 1978 | The Site appears to have a 2-story residential dwelling. |
| c.1978 - Present | The dwelling was removed, and the Site is vacant land. |

| Year | Site History – Site No. 2 – 20 Elmont St |
|------------------|---|
| 1899 – c.1978 | The Site appears to have a 2-story residential dwelling with a single-story attachment. |
| c.1978 - Present | The dwelling was removed, and the Site is vacant land. |

| Year | Site History – Site No. 3 – 52 Elmont St |
|------------------|--|
| 1899 – c.1970 | The Site appears to have a 2-story residential dwelling. |
| c.1970 - Present | The dwelling was removed, and the Site is vacant land. |

| Year | Site History – Site No. 4 – 77-79 Harvard St |
|---------------|--|
| 1899 – c.1931 | The Site appears to have a stable. |

Table 4.1 - Site History

| | |
|------------------|--|
| c.1931 – c.1970 | The stable was removed, a duplex 3-story residential dwelling. |
| c.1970 - Present | The dwelling was removed, and the Site is vacant land. |

| Year | Site History – Site No. 5 – 81 Harvard St |
|------------------|---|
| 1899-c.1990 | The Site appears to have a duplex 3-story residential dwelling. |
| c.1990 - Present | The dwelling was removed, and the Site is vacant land. |

| Year | Site History – Site No. 6 – 84 Harvard St |
|------------------|--|
| 1899-c.1931 | The Site appears vacant land. |
| c.1931-c.1990 | The Site appears to have a 3-story residential dwelling. |
| c.1990 - Present | The dwelling was removed, and the Site is vacant land. |

| Year | Site History – Site No. 7 – 94 Harvard St |
|------------------|--|
| 1899-c.1931 | The Site is vacant land. |
| c.1931-c.1970 | The Site appears to have a 3-story residential dwelling. |
| c.1970 - Present | The dwelling was removed, and the Site is vacant land. |

| Year | Site History – Site No. 8 – 147 Norwell St |
|------------------|--|
| 1899-c.1931 | The Site appears to have a 2-story residential dwelling. |
| c.1931-c.1989 | The Site appears to have a 2-story residential dwelling with the addition of a 1-story attachment. |
| c.1989 - Present | The dwelling was removed, and the Site is vacant land. |

| Year | Site History – Site No. 9 – 143 Norwell St |
|------------------|--|
| 1899-c.1931 | The Site appears to have a 2-story residential dwelling. |
| c.1931-c.1989 | The Site appears to have a 2-story residential dwelling with the addition of a 1-story attachment. |
| c.1989 - Present | The dwelling was removed, and the Site is vacant land. |

Table 4.2 - Site History

| Year | Site History – Site No. 10 – Norwell St (1402340000) |
|-------------------|---|
| 1888 – c. 1970 | The Site appears to have a single 3-story residential dwelling. |
| c. 1970 - Present | The dwelling was removed, and the Site is vacant land. |

| Year | Site History – Site No. 11 – 116 Norwell St |
|-----------------|--|
| 1888 – c.1931 | The Site appears to be vacant land. |
| c.1931 -c.1950 | The Site appears to be five connected, one-story automobile garages. |
| c.1950- Present | The garage was removed, and the Site is vacant land. |

| Year | Site History – Site No. 12 – Norwell St (1402343000) |
|----------------|---|
| 1888 – c.1931 | The Site appears to be vacant land. |
| c.1931-c.1950 | The Site appears to be six connected, one-story automobile garages. |
| c.1950-c. 1964 | The Site is identified as a concrete automobile repair garage connected to three automobile garages according to the EDR Sanborn Map; however, no files pertinent to a commercial automobile repair garage or releases at Site found. |
| c.1964-Present | The Site is a four connected concrete automobile garages. |

| Year | Site History – Site No. 13– 106 Norwell St |
|-----------------|--|
| 1899 – c.1931 | The Site appears to be vacant land. |
| c.1931 – c.1988 | The Site appears to have a two-story dwelling with a one-story attachment. |
| c.1988- Present | The dwelling was removed, and the Site is vacant land. |

| Year | Site History – Site No. 14 – Norwell St (1402345000) |
|----------------|---|
| 1899 – Present | The Site appears to be vacant land. |

| Year | Site History – Site No. 15 – Radcliffe St (1402358000) |
|--------------|---|
| 1899-Present | The Site appears to be vacant land. |

| Year | Site History – Site No. 16 – 89 Radcliffe St |
|-----------------|--|
| 1899-c.1964 | The Site appears to be a single 2-story dwelling. |
| c.1964- Present | The dwelling was removed, and the Site is vacant land. |

Topographic contours in the Site area have not significantly changed during the time period reviewed.

Hazardous Substances

No hazardous substances including raw materials; finished products and formulations; hazardous wastes; hazardous constituents and pollutants including intermediates and byproducts appear to be historically present at the Site or identified during site reconnaissance with the exception of Site Nos. 8 and 9 which are noted to be adjacent to the New York, New Haven & Hartford Railroad, as described in Table 4.2. However, no impacts of hazardous substances have been historically documented at the Sites or identified during site reconnaissance.

4.1.2 Adjoining Property History

Table 4.2 - Adjoining Property History

| Year | Site History – Site No. 1 – 24 Elmont St |
|-------|---|
| North | Between 1899 and c.1931, a street was present. Between c.1931 to c.1950, a single-story automobile garage was present. Since c.1950, the lot appears to be vacant land. |
| East | Since 1899, Elmont Street has been present; beyond is a 2-story residential dwelling since 1899. |
| South | Site No. 2 as described in Table 4.1. |
| West | Between 1899 and c.1931, vacant land was present. From c.1931 to c.1964, a residential dwelling was present. Since c.1964, the lot appears to be vacant land. |

| Year | Site History – Site No. 2 – 20 Elmont St |
|-------|---|
| North | Site No. 1 as described in Table 4.1. |
| East | Since 1899, Elmont Street has been present; beyond was a 2-story residential dwelling between 1899 and c.1989 with a garage between c.1931 and c.1989. Since c.1989, the lot appears to be vacant land. |
| South | Since 1899, a 2-story residential dwelling is currently present. |
| West | Between 1899 and c. 1931, the lot was vacant. From c. 1931 to c. present, a 2-story dwelling was present. |

| Year | Site History – Site No. 3 – 52 Elmont St |
|-------|---|
| North | Since 1899, a 2-story residential dwelling is currently present. |
| East | Since 1899, Elmont Street has been present; beyond was a 2-story residential dwelling is present. |
| South | Since 1899, a 2-story residential dwelling is currently present. |

Table 4.2 - Adjoining Property History

| | |
|------|--|
| West | Since 1899, a 2-story residential dwelling is currently present. |
|------|--|

| Year | Site History – Site No. 4 – 77-79 Harvard St |
|-------|--|
| North | Since 1899, a 2-story residential dwelling is currently present. |
| East | Since 1899, a 2-story residential dwelling is currently present. |
| South | Since 1899, Harvard Street has been present; beyond was a 2-story residential dwelling between 1899 and c.1931, stores and a 3-story duplex c.1931 and until c.1964. Since c.1964, the store was converted into dwellings. |
| West | Site No. 5 as described in Table 4.1. |

| Year | Site History – Site No. 5 – 81 Harvard St |
|-------|---|
| North | Since 1899, a 2-story residential dwelling is currently present. |
| East | Site No. 4 as described in Table 4.1. |
| South | Since 1899, Harvard Street has been present; beyond Site No. 6 as described in Table 4.1. |
| West | Since 1899, a 2-story residential dwelling with garage is currently present. |

| Year | Site History – Site No. 6 – 84 Harvard St |
|-------|--|
| North | Since 1899, Harvard Street has been present; beyond Site No. 5 as described in Table 4.1. |
| East | Since 1899, Harvard Street has been present; beyond was a 2-story residential dwelling between 1899 and c.1931, stores and 3-story duplex c.1931 and until c.1964. Since c.1964, the store was converted into dwellings. |
| South | Since 1899, vacant land between 1899 and c.1931, a 3-story residential dwelling c.1931 and until present. |
| West | Since 1899, Spencer Street has been present; beyond was a 2-story residential dwelling between 1899 and is present. |

| Year | Site History – Site No. 7 – 94 Harvard St |
|-------|---|
| North | Since 1899, Harvard Street has been present; beyond was a 2-story residential dwelling between c.1931 and is present. |
| East | Since 1899, a 2-story residential dwelling is currently present. |
| South | Since 1899 and 1931, two 2-story residential dwellings are currently present. |
| West | Since 1899, a 2-story residential dwelling is currently present. |

Table 4.2 - Adjoining Property History

| Year | Site History – Site No. 8 – 147 Norwell St |
|-------|--|
| North | Site No. 9 as described in Table 4.1. |
| East | Between 1899 and c.1931, Kilton Street was present; beyond was a 2-story dwelling. Since c.1931, Norwell Street has been present; beyond a 2-story flat was present. |
| South | Since 1899, a 2-story residential dwelling. |
| West | Since 1899, New York, New Haven & Hartford Railroad present; beyond were 3-story flats from c.1931 to present. |

| Year | Site History – Site No. 9 – 143 Norwell St |
|-------|---|
| North | A two-story dwelling has been present since 1899. |
| East | Between 1899 and c.1931, Kilton Street was present. Since c.1931, Norwell Street has been present; beyond was a 2-story dwelling from 1899 to c.1950. From c.1950-c.1964, a 2-story flat was present. From c.1989 to present, the lot was vacant. |
| South | Site No. 8 as described in Table 4.1. |
| West | Since 1899, New York, New Haven & Hartford Railroad was present; beyond were 3-story flats from c.1931 to present. |

| Year | Site History – Site No. 10 – Norwell St (1402340000) |
|-------|--|
| North | Site No. 11 as described in Table 4.1. |
| East | Site No. 15 as described in Table 4.1. |
| South | Between 1899 and c.1931, the lot was vacant. Since c.1931 until present, a 2-story dwelling has been present. |
| West | Between 1899 and c.1931, Kilton Street was present. Since c.1931, Norwell Street has been present; beyond was a 2-story dwelling from 1899 to present. |

| Year | Site History – Site No. 11– 116 Norwell St |
|-------|--|
| North | Since c.1931 to c.1950, a 2-story dwelling was present. From c.1950 to present, a 2-story flat has been present. |
| East | Site No. 16 as described in Table 4.1. |
| South | Site No. 10 as described in Table 4.1. |
| West | Between 1899 and c.1931, Kilton Street was present. Since c.1931, Norwell Street has been present; beyond was a vacant lot from 1899 to present. |

Table 4.2 - Adjoining Property History

| Year | Site History – Site No. 12 – Norwell St (1402343000) |
|-------------|--|
| North | Site No. 13 as described in Table 4.1. |
| East | From 1899 to c.1931, a vacant lot was present. From c.1931 to present, a 2-story dwelling has been present. |
| South | Since 1931, a 2-story dwelling has been present. |
| West | Between 1899 and c.1931, Kilton Street was present. Since c.1931, Norwell Street has been present; beyond was a vacant lot from 1899 to 1931. From 1931 to 1950, the ice storage of Milton Ice Co. was present. From 1950 to 1964, the ice storage of GV Condon Coal Co. was present. Between c.1964 and c.1966, the lot was vacant. From c.1966 to present, a private garage was present. |

| Year | Site History – Site No. 13 – 106 Norwell St |
|-------------|--|
| North | Site No. 14 as described in Table 4.1. |
| East | Between 1899 and c.1931, two vacant lots were present. From c.1931 to present, an automobile garage and a 2-story dwelling have been present. |
| South | Site No. 12 as described in Table 4.1. |
| West | Between 1899 and c.1931, Kilton Street was present. Since c.1931, Norwell Street has been present; beyond was a vacant lot from 1899 to c.1931. From c.1931 to c.1950, the office building and the coal shed of Milton Ice Co. were present. From c.1950 to c.1964, the office, coal shed, and a gasoline tank of GV Condon Coal Co. were present. From c.1964 to present, the lot was vacant. |

| Year | Site History – Site No. 14 – Norwell St (1402345000) |
|-------------|--|
| North | The property was vacant land until c.1931. Since c.1931 to present, a one-story automobile garage has been present, and a triple fire hydrant has been present on Norwell Road. |
| East | Between 1899 and c.1931, two vacant lots were present. From c.1931 to present, two 2-story dwellings were present. |
| South | Site No. 13 as described in Table 4.1. |
| West | Between 1899 and c.1931, Kilton Street was present. Since c.1931, Norwell Street has been present; beyond was a vacant lot from 1899 to c.1931. From 1931 to c.1950, the office building and the coal shed of Milton Ice Co. and a lumber shed were present. From c.1950 to c.1964, the office, coal shed, and a gasoline tank of GV Condon Coal Co. were present. From c.1964 to present, the lot was vacant. |

Table 4.2 - Adjoining Property History

| Year | Site History – Site No. 15 – Radcliffe St (1402358000) |
|-------|---|
| North | Site No. 16 as described in Table 4.1. |
| East | Between 1899 and c.1931, the intersection of the proposed street and Millet Road were present; beyond that was vacant land. From c.1931 to c.1989, Radcliffe Street was present; beyond was a 2-story dwelling. From c. 1964 to present, a triple hydrant has been present on Radcliffe Street. From c. 1989 to present, beyond Radcliffe Street was vacant land. |
| South | Since 1899 to present, a 2-story dwelling has been present. |
| West | Site No. 11 as described in Table 4.1. |

| Year | Site History – Site No. 16 – 89 Radcliffe St |
|-------|--|
| North | Between 1899 and c. 1931, a street was present; beyond that was a foundation. From c.1931 to c. 1989, a 2-story dwelling with a single-story automobile garage was present. Since c.1989, the lot was vacant land. |
| East | Between 1899 and c.1931, the intersection of the proposed street and Millet Road were present; beyond was vacant land. From c.1931 to present, Radcliffe Street was present; beyond was a 2-story dwelling. |
| South | Site No. 15 as described in Table 4.1. |
| West | Site No. 11 as described in Table 4.1. |

4.1.3 Surrounding Property History

Table 4.3 - Surrounding Property History

| Year | Surrounding Property History |
|---------------|--|
| 1899– Present | Surrounding properties generally appear as residential dwellings and commercial properties with a few properties becoming vacant during various years. |

4.2 Database Report & Environmental Record Review

A database search report that identifies properties listed on state and federal databases within the ASTM-required radii of the Site was obtained from EDR and is included in **Appendix A**.

The environmental database report identified 256 properties/listings. The Site and adjoining properties were not listed in the database search report. The number of properties listed included those that could be mapped and those that could not (i.e., orphan properties).

4.2.1 Subject Site

Site information included in the database search report is summarized in the following table:

| | |
|--|---|
| Site Facility Name(s) and/or Listed Address(es) | Elmont St Dorchester, MA 02121 (Site No. 3 – 52 Elmont) |
| EDR Map No(s). | 1 |
| Database(s) | MA SPILLS |
| Description/ID No(s). | Spill ID – N87-0161 |
| Database Review Summary | <p>A spill of 500-gallons of No. 2 fuel oil occurred in February 1987. The EDR report states the matter was closed in a day. During the site visit no staining on the ground surface or distressed vegetation was observed.</p> <p>Based on the current status of the spill as closed, this spill is not expected to impact the subsurface at the Site.</p> |

4.2.2 Adjoining & Surrounding Property Record Review

TRC evaluated the following factors to determine whether additional environmental records should be reviewed with respect to the potential for contaminant migration from the adjoining and surrounding properties:

- (1) Whether the property is up-gradient or down-gradient of the Site vis-à-vis **ground water migration** based on the local topography, and the assumed ground water depth and northwest shallow ground water flow direction;
- (2) Whether the property is up-gradient or down-gradient of the Site vis-à-vis **vapor migration** based on readily available information pursuant to the ASTM E 1527-13 standard including soil and geological characteristics; contaminant characteristics; contaminated plume migration data; and significant conduits that might provide preferential pathways for vapor migration such as major utility corridors, sanitary sewers, storm sewers, and significant natural conduits such as Karst terrain (vapor migration may also be influenced by the age and design of infrastructure features associated with these conduits);
- (3) Property case status (i.e., Massachusetts Department of Environmental Protection [MassDEP] has issued a No Further Action letter or a Response Action Outcome [RAO] Statement or Permanent Solution Statement has been submitted);
- (4) Type of database and whether the presence of contamination is known; and
- (5) The distance between the listed property and the Site. As allowed by ASTM E1527-13, TRC adjusted ASTM-specified approximate minimum search distances for governmental records due to the Site’s densely-developed urban setting. Database listings were reviewed for properties located within a 1/8-mile radius of the Site.

Based on this evaluation, TRC limited the review of additional environmental records to the property listed below, since the potential for contamination to be migrating to the Site from the other properties identified by the database search is considered low.

4.2.2.1 Adjoining Properties

Adjoining property information included in the database search report is summarized in the following tables:

| | |
|---|---|
| Facility Name(s) and/or Listed Address(es) | No Location Aid - 105 Norwell Street, Dorchester, MA 02121 (Adjoining to west across Norwell Street of Site Nos. 10, 11, 12, 13, and 14) |

| Database(s) | SHWS, RELEASE |
| Description/ID No(s) | RTN 3-0022277 |
| Presumed Hydrogeologic Setting | Downgradient |

| | |
|--------------------------------|---|
| Database Review Summary | <p>According to the EDR Report and MassDEP file, RNF, and an <i>A-2 Response Action Outcome Submittal Release Tracking #3-22277, #2 Fuel Oil Release, 105 Norwell Street, Dorchester, MA</i>, dated February 26, 2003 and prepared by Response Environmental, Inc. (REI), G&G Fuel released approximately 25 to 30 gallons of No. 2 fuel oil from their vehicle to their leased fenced and gated parking lot on November 4th, 2002, at which time MassDEP was notified and RTN 3-22277 was assigned. Granular absorbents were applied to the release area to contain and absorb free product. The material was placed in six drums for disposal and new material was applied. Poly sheeting was applied to stabilize until response actions the next day. Upon visual inspection of the release location, the asphalt surface was observed to be highly degraded and assessment of the subsurface revealed the fuel oil reacted with the asphalt and was responsible for the degradation.</p> <p>Immediate Response Actions included the containment and absorption of the release with absorbents and a vacuum truck, as well as excavating and disposing of up to 100 yards of impacted soil. Soil samples were collected. Two of the six TPH analyzed samples were categorized as fresh virgin No. 2 Fuel oil, while many of the other samples contained an unidentifiable oil most resembling motor oil. Additional excavation activities were conducted, and all concentrations of fuel oil compounds were below applicable MassDEP soil standards in the samples, remediating the release. Non-virgin No. 2 fuel oil compounds were still detected in the EPH analysis identifying pre-existing conditions of non-fuel oil related compounds above Reportable Concentrations. Remediated waste generated from IRA activities included 193 gallons of oil-water mixture transported from the Site for proper disposal, 85.8 tons of fuel oil impacted soil transported, and five drums containing used absorbents and debris transported from the Site for proper disposal. Due to groundwater not being encountered during the 3-foot depth excavation activities, no groundwater withdrawal wells located within 500 feet of the release, and no laboratory results above the applicable S-1/GW-2 or GW-3 Method 1 Standards, groundwater monitoring wells were not installed.</p> <p>A Class A-2 RAO was submitted for the release on March 3, 2003 indicating that a permanent solution was achieved but contamination was not reduced to background.</p> <p>Based on the regulatory status and downgradient orientation to Site Nos. 10, 11, 12, 13, and 14, this release is not expected to impact the subsurface at these Sites.</p> |
|--------------------------------|---|

4.2.2.2 Surrounding Properties

Surrounding property information included in the database search report is summarized in the following table(s):

| | |
|--|--|
| Facility Name(s) and/or Address(es) | Tony's Auto Body & Repair - 168-170 Norwell St. Dorchester, MA 02124 |
| Approximate Location Relative to Site | 315 -1,000 feet (southwest) from Sites |
| EDR Map No(s). | 3 |
| Database(s) | HW GEN/VSQG |

| | |
|---------------------------------------|--|
| Description/ID No(s). | EPA ID: MV6172879659 |
| Presumed Hydrogeologic Setting | Cross-gradient (Site Nos. 1 through 16) |
| Database Review Summary | According to the EDR Report, this location is classified as a Very Small Quantity Generator of Hazardous Material. No violations or reported releases were reported for this location. |

| | |
|--|--|
| Facility Name(s) and/or Address(es) | Courteous Cleaners Co. - 63 Radcliffe Street, Boston, MA 02121 |
| Approximate Location Relative to Site | 90 - 860 feet (north-northwest) from Sites |
| EDR Map No(s). | 4 |
| Database(s) | VSQG |
| Description/ID No(s). | EPA ID: MV6176358681 |
| Presumed Hydrogeologic Setting | Cross-gradient (Site Nos. 8 through 16); Down-gradient (Site Nos. 1 and 2) |
| Database Review Summary | <p>According to EDR report, the property is listed as Courteous Cleaners Co. dry cleaning for the years 2000 -2008. The type of drycleaner lists is “Dry Cleaning Plants, except rugs, NEC”. Further research revealed the cleaners was actually a small janitorial service company for the years 2000-2008, and not a dry-cleaning service as the EDR report identified. Based on aerial photograph reviews, the property currently appears to be residential.</p> <p>Based on the presumed groundwater flow direction, actual elevation of the facility relative to the Sites, and no reported releases, operations at the former dry cleaner are not expected to impact subsurface conditions at the Sites.</p> |

| | |
|--|--|
| Facility Name(s) and/or Address(es) | Karbunara, Heroin - 10 Ripley Road Dorchester, MA 02124 |
| Approximate Location Relative to Site | 350 -850 feet (east) from Site Nos. 1, 2, 3 and 7 through 16; and 760 feet (northeast) from Site Nos. 4-7. |
| EDR Map No(s). | 5 |
| Database(s) | SHWS |
| Description/ID No(s). | RTN 3-0021410 |
| Presumed Hydrogeologic Setting | Down-gradient (Site Nos. 4 through 9); Cross-gradient (Site Nos. 1, 2 ,3, 10 through 16) |

| | |
|--------------------------------|--|
| Database Review Summary | <p>According to the MassDEP file, <i>No Further Action Report 10 Ripley Road, Dorchester Release Tracking Number (RTN) 3-21410</i> dated April 24, 2014, an unknown amount of No. 2 home heating oil leaked from the vent pipe of the above-ground storage tank and was released onto the basement floor in December 2001. MassDEP was notified of the release on January 7th, 2002 and RTN 3-21410 was assigned. Two inspections were conducted and determined indoor air petroleum vapor measurements of 2,500-4,000 ppbv in the basement and 1,400 ppbv in the living area of the home. According to a conversation on March 14, 2014 with a MassDEP representative and a Boston Health Inspector, the release impacted the stone foundation, concrete floor and concrete sump located in the basement, however there was no evidence of impact to the soil below the concrete floor or the environment. Release Mitigation activities included cleaning impacting surfaces with detergent and brushes, using an industrial blower to clear vapors, attaching plastic sheeting to ceiling to prevent movement of vapors into other areas of the residence, and using 55-gallon carbon drums to treat exhaust air from basement in order to prevent the impact to adjacent residences. A MassDEP No Further Action Status was assigned to the Site on April 4th, 2014, after background levels of VOCs were measured in the indoor air of the residence.</p> <p>Based on the regulatory history of no evidence of impacts to soil below the concrete or to the environment, impacts to the subsurface conditions of at the Sites are not expected.</p> |
|--------------------------------|--|

| | |
|--|---------------------------------------|
| Facility Name(s) and/or Address(es) | 197 Norwell Street, Dorchester, 02124 |
| Approximate Location Relative to Site | 600 feet (south) from Site No. 8 |
| EDR Map No(s). | 9 |
| Database(s) | LAST/RELEASE |
| Description/ID No(s). | RTN: 3-0028613 |
| Presumed Hydrogeologic Setting | Down-gradient (All Site Nos.) |

| | |
|--------------------------------|---|
| Database Review Summary | <p>According to the EDR report and MassDEP file, <i>Response Action Outcome Report and Immediate Response Action Completion Report 197 Norwell Street, Dorchester, Massachusetts Release Tracking Number: 3-28613</i>, dated December 22, 2010 and prepared by Action Boston, Inc., more than 10 gallons of No. 2 fuel oil from an above ground storage tank (AST) was released in the basement of a two-family residence. MassDEP was notified on July 10, 2009 and at RTN 3-28613 was assigned. Remedial actions included the removal of the leaking AST and two other ASTs in the basement. Immediate Response Actions included the use of absorbent and containment materials on the basement floor, as well as removal oil and sludge from the basement floor and leaking AST. Three drums of oily solids and one drum of an oily mixture were transported from the Site. On July 30, 2009, the IRA Plan was approved to include the excavation of no more than ten cubic yards of oil impacted soil. MassDEP would later approve the removal of up to 100 cubic yards of oil impacted soil on October 28, 2009. Soil borings and monitoring wells were installed on the property to determine the extent of the oil release. Approximately 121.24 tons of impacted soil were transported to an approved facility and 6,600 gallons of surface water (entered in the basement during rain events) was removed.</p> <p>A Class A-2 RAO was submitted for the release on December 22, 2010 indicating that a permanent solution was achieved but contamination was not reduced to background.</p> <p>Based on the regulatory status, downgradient orientation to the Sites and distance from the Sites, the release is not expected to impact the subsurface at the Sites.</p> |
|--------------------------------|---|

| | |
|--|---|
| Facility Name(s) and/or Address(es) | 18-24 Harvard Ave, Dorchester MA |
| Approximate Location Relative to Site | 600-1,200 feet east and northeast from the Sites. |
| EDR Map No(s). | 14 |
| Database(s) | SHWS, RELEASE |
| Description/ID No(s). | RTN 3-35126 |
| Presumed Hydrogeologic Setting | Down/cross-gradient (Sites) |

| | |
|-------------------------|---|
| Database Review Summary | <p>According to the EDR report provided by MassDEP, a Permanent solution statement with no conditions was reached by Endpoint LLC on August 22, 2019. MassDEP was notified of the release through the submittal of the release notification form on August 17, 2018 and subsequently assigned RTN 3-35126 to the disposal site. During the investigation done on this site, a 120-day reportable condition was identified at the site due to the discovery of petroleum-related compounds in the soil and groundwater at concentrations greater than applicable MCP reporting category RCS-1 and RCGW-2 standards. The release was linked to a historic release of petroleum from two former UST's located below the building. After a Phase 1 site investigation, soil sampling, groundwater sampling, and sub-slab soil vapor sampling, results were used for a Method 3 Risk Characterization determination that there was no significant risk with respect to human health, safety, public welfare, and the environment at the public disposal site. Therefore, a permanent solution with no conditions has been achieved.</p> <p>Based on the regulatory status, downgradient orientation to the Sites and distance from the Sites, the release is not expected to impact the subsurface at the Sites.</p> |
|-------------------------|---|

4.3 Previous Reports

The following reports were reviewed by TRC:

- March 2018, *Phase I Environmental Site Assessment 11 Vacant Parcels 24, 20 Elmont Street, 147, 143 Norwell Street, Norwell Street (1402340000), 116 Norwell Street, Norwell Street (1402343000), 106 Norwell Street, Norwell Street (1402345000), Radcliffe Street (1402358000), and 89 Radcliffe Street Boston/Dorchester, MA 02121*, prepared by TRC; and
- August 22, 2019, *Parament Solution Statement With No Conditions 18-24 Harvard Avenue Dorchester, MA MassDEP RTN: 3-35126*, prepared by EndPoint.

4.4 Other Environmental Record Sources

Per the ASTM standard, local or additional state records were reviewed to enhance and supplement the ASTM-required federal and state records reviewed and discussed earlier in this report. These additional records include state agency lists of: waste disposal facilities; brownfield properties; hazardous waste/contaminated facilities; registered storage tanks; records of emergency release reports; and records of contaminated public wells. Local sources that were contacted to obtain this information include: Department of Health; Fire Department; Building Permit/Inspection Department; Assessor, and land records (for AULs). Information from these sources is discussed below:

Table 4.4 - Other Environmental Record Sources

| STATE REGULATORY AGENCY LISTIES/ DEPARTMENTS | Available Information – Site No. 1 –24 Elmont Street |
|---|---|
| Department of Health/ Environmental Division | TRC contacted the City of Boston Health Department on September 3, 2019. The Health Department responded on September 11, 2019. No environmentally pertinent information was identified for the Site. |
| Fire Department | TRC contacted the City of Boston Fire Department on September 3, 2019. No response as of the date of this report. |

Table 4.4 - Other Environmental Record Sources

| | |
|---|---|
| Building Permit/Inspection/Construction/Engineering Department | TRC accessed the City of Boston Building Department online database. No records were identified due to the Site. |
| Land Records | The TRC searched the Suffolk County Registry of Deeds online data base and one order (1973), deed (1974), instrument of taking (1977), and notice (1989) were identified for the address. |
| State Agency List(s) | TRC reviewed the online MassDEP UST Query Tool on September 18, 2019. No records for USTs were identified. |
| City of Boston Assessor | TRC accessed the City of Assessor Department online database. All property cards were identified for the Site. |

| STATE REGULATORY AGENCY LISTIES/ DEPARTMENTS | Available Information – Site No. 2 – 20 Elmont Street |
|---|---|
| Department of Health/Environmental Division | TRC contacted the City of Boston Health Department on September 3, 2019. The Health Department responded on September 11, 2019. No environmentally pertinent information was identified for the Site. |
| Fire Department | TRC contacted the City of Boston Fire Department on September 3, 2019. No response as of the date of this report. |
| Building Permit/Inspection/Construction/Engineering Department | TRC accessed the City of Boston Building Department online database. No records were identified for the Site. |
| Land Records | The TRC searched the Suffolk County Registry of Deeds online data base and one instrument of taking (1973) was identified for the Site. No deeds were identified for the address. |
| State Agency List(s) | TRC reviewed the online MassDEP UST Query Tool on September 18, 2019. No records for USTs were identified. |
| City of Boston Assessor | TRC accessed the City of Assessor Department online database. All property cards were identified for the Site. |

| STATE REGULATORY AGENCY LISTIES/ DEPARTMENTS | Available Information – Site No. 3 – 52 Elmont Street |

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

Mrs. Nicole Hudson (Geologist) of TRC, conducted a Site reconnaissance of accessible areas on and around Sites on September 5, 2019 for the purpose of identifying potential RECs. TRC was not accompanied by the City of Boston as Site access was not restricted. Photographs taken during the reconnaissance are provided in **Appendix D**.

5.2 Interior and Exterior Site Observations

Unless otherwise noted, the items listed in the table below appeared in good condition with no visual evidence of staining, deterioration or a discharge of hazardous materials; and there are no records of a release in these areas. Items where further description is warranted are discussed in the section(s) following the table.

Table 5.1 - Interior and Exterior Site Observations

| Item | Present (Current/ Historic/ No) | Description– Site Nos. 1 through 11 |
|---|---------------------------------|--|
| Underground storage tanks (USTs) and associated piping | No | Not Observed |
| Drums & containers (≥5 gallons) | No | Not Observed |
| Odors | No | Not Observed |
| Pools of liquid, including surface water bodies and sumps (handling hazardous substances or substances likely to be hazardous only) | No | Not Observed |
| Polychlorinated Biphenyls (PCBs) / Transformers | No | Not Observed |
| Stains or corrosion | Current/ Historic | Wet areas and minor staining observed on concrete floor of former auto garage at Site No. 12. |
| Drains & sumps | No | Not Observed |
| Pits, ponds & lagoons | No | Not Observed |
| Stressed vegetation | No | Not Observed |
| Historic fill or any other fill material | No | Not Observed |
| Wastewater (including storm water or any discharge into a drain, ditch, underground injection system, or stream on or adjacent to the Site) | No | Not Observed |
| Wells (including dry wells, irrigation wells, injection wells, abandoned wells, or other wells) | No | Not Observed |
| Septic systems or cesspools | No | Not Observed |
| Other – Disposed Tires | Current | Tire disposal was observed at Site No. 12. |
| Other – Disposed general refuse and landscaping debris. | Current | Site Nos.1 through 16–Disposed general refuse, construction and landscaping debris were observed scattered across the Sites. |

5.3 Adjoining and Surrounding Properties Reconnaissance

5.3.1 Adjoining Properties

During the Site reconnaissance, TRC viewed the adjoining properties from the Site and publicly accessible areas (e.g., public roadways, etc.).

Table 5.2 - Adjoining Properties Reconnaissance

| Direction from Site | Current Land Use Description: Site No. 1 – 24 Elmont Street |
|---------------------|---|
| North | Residential building |
| East | Elmont Street and beyond is a residential building |
| South | Site No. 2 |
| West | Residential building |

| Direction from Site | Current Land Use Description: Site No. 2 – 20 Elmont Street |

| East | Radcliffe Street and beyond is a residential building |
| South | Site No. 15 |
| West | Site No. 11 |

5.3.2 Surrounding Properties

Surrounding properties of Site Nos. 1, 2, 3, 4, 5, 6, 7, 10, 11, 14, 15 and 16 generally include residential buildings to the north, south, east, and the west. Surrounding properties of Site Nos. 8 and 9 include the New York, New Haven & Hartford Railroad to the west with residential buildings to the north, south, and east. Surrounding properties of Site Nos. 12, 13 and 14 generally include residential buildings to the north, south, and east. Surrounding properties of Site No. 12, 13 and 14 include a private automobile garage to the west.

6.0 INTERVIEWS

The following person was interviewed to obtain historically and/or environmentally-pertinent information regarding RECs associated with the Site. Interview documentation is included in **Appendix B**.

- Mr. James Smith (City of Boston – DND – Senior Environmental Compliance Manager) – *Key Site Manager* (as defined by the ASTM standard and identified by the property User).

The information provided is discussed and referenced in the text or provided below. Other references and sources of information are included in **Appendix E**.

7.0 FINDINGS, OPINIONS AND CONCLUSIONS

Potential findings can include RECs, historical RECs (HRECs), controlled RECs (CRECs) and *de minimis* conditions, pursuant to the ASTM E 1527-13 standard.

RECs are defined as the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (1) due to any *release* to the environment; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*.

CRECs are defined as a REC resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

HRECs are defined as a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

De minimis conditions are defined as a condition that generally does not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not RECs nor CRECs.

TRC has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-13 at fifteen vacant parcels and one parcel occupied by a former automobile garage located in Boston/Dorchester, Suffolk County, Massachusetts (herein referred to as “Site No. 1 through Site No. 16”), see **Appendices F and G**. Deviations from this standard are described in Sections 1.3 and 7.5 of this report.

7.1 RECs and CRECs

This assessment has revealed no evidence of RECs (including CRECs) in connection with the Sites.

7.2 HRECs

This assessment has revealed no evidence of HRECs in connection with the Site, except for the following:

- During the file review, Site No. 3 - 52 Elmont Street, there was a spill (N87-0161) that occurred on February 12, 1987 of 500-gallons No. 2 fuel oil. The case was closed in a day. No observation were made during the Site visit of staining or distressed vegetation.

7.3 *De Minimis* Conditions

This assessment has revealed no evidence of *de minimis* conditions in connection with the Site except for the following:

- *Unauthorized dumping (i.e., partially fenced/trash/general refuse/tires/landscaping debris and construction debris) at Site Nos. 1 through 16.*
- *Minor staining on concrete floor of garage at Site No. 12.*

7.4 Data Gaps

TRC has made an appropriate inquiry into the commonly known and reasonably ascertainable resources concerning the historical ownership and use of the Site back to the first development per 40 CFR Part 312.24 (*Reviews of Historical Sources of Information*). Data gaps identified during this assessment include the following:

1. Ownership records prior to Johnny Owens and Rosita Owens obtaining Site No. 1 in 1972;
2. Ownership records prior to Gloria A. Goodman and Leonard Goodman obtaining Site No. 2 in 1965;
3. Ownership records prior to Leola Smith & Charles Saving Bank obtaining Site No. 3 in 1973;
4. Ownership records prior to Theodore & Frank Greene obtaining Site No. 4 in 1975;
5. Ownership records prior to Jimmie & Elizabeth Hicks obtaining Site No. 5 in c.1982;
6. Ownership records prior to Scott Rose Jr. obtaining Site No. 6 in 1970;
7. Ownership records prior to EDE Nicholas obtaining Site No. 7 in 1973;
8. Ownership records prior to Arthur I. Taplotz obtaining Site No. 8 in 1974;
9. Ownership records prior to James A. Shadrack obtaining Site No. 9 in 1975;
10. Ownership records prior to City of Boston obtaining Site No. 10;
11. Ownership records prior to City of Boston obtaining Site No. 11;
12. Ownership records prior to City of Boston obtaining Site No. 12;
13. Ownership records prior to Edward E. Sefrian obtaining Site No. 13 in 1974;
14. Ownership records prior to City of Boston obtaining Site No. 14;
15. Ownership records prior to City of Boston obtaining Site No. 15; and
16. Ownership records prior to Ronald Ingraham and Laura M. Ingraham obtaining Site No. 16 in 1975.

Based on the EDR report and state database review, Data Gap Nos. 1 - 16 are not considered *significant* as historical records review indicates that the Sites were developed as residential properties for most of the time during the 1900s.

7.5 Limiting Conditions and Deviations

7.5.1 Accuracy and Completeness

The ASTM E 1527-13 standard recognizes inherent limitations for Phase I ESAs that apply to this report, including:

- Uncertainty Not Eliminated – No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Data gaps identified during this Phase I ESA are listed in Section 7.4.
- Not Exhaustive – A Phase I ESA is not an exhaustive investigation.
- Past Uses of the Property – A review of standard historical sources at intervals less than five years is not required.

The Client is advised that the Phase I ESA conducted at the Site is a limited inquiry into a property's environmental status, cannot wholly eliminate uncertainty, and is not an exhaustive assessment to discover every potential source of environmental liability at the Site. Therefore, TRC does not make a statement i) of warranty or guarantee, express or implied for any specific use; ii) that the Site is free of RECs or environmental impairment; iii) that the Site is “clean”; or iv) that impairments, if any, are limited to those that were discovered while TRC was performing the Phase I ESA. This limiting statement is not meant to compromise the findings of this report; rather, it is meant as a statement of limitations within the ASTM standard and intended scope of this assessment. Specific limiting conditions identified during the Site reconnaissance are described in Section 5.1. Subsurface conditions may differ from the conditions implied by surface observations and can be evaluated more thoroughly through intrusive techniques that are beyond the scope of this assessment. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes.

This report presents TRC's site reconnaissance observations, findings, and conclusions as they existed at the time of the Site reconnaissance. TRC makes no representation or warranty that the past or current operations at the property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. TRC makes no guarantees as to the accuracy or completeness of information obtained from others during the course of this Phase I ESA report. It is possible that information exists beyond the scope of this assessment, or that information was not provided to TRC. Additional information subsequently provided, discovered, or produced may alter findings or conclusions made in this Phase I ESA report. TRC is under no obligation to update this report to reflect such subsequent information. The findings presented in this report are based upon reasonably ascertainable information and observed Site conditions at the time of the assessment.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not assessed. Regardless of the findings stated in this report, TRC is not responsible for consequences or conditions arising from facts that were not fully disclosed to TRC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information regarding surrounding area properties was requested for approximate minimum search distances and was assumed to be correct and complete unless obviously contradicted by TRC's observations or other credible referenced sources reviewed during the assessment.

TRC is not a professional title insurance or land surveyor firm and makes no guarantee, explicit or implied, that any land title records acquired or reviewed, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

7.5.2 Warranties and Representations

This report does not warrant against: (1) operations or conditions which were not evident from visual observations or historical information provided; (2) conditions which could only be determined by physical sampling or other intrusive investigation techniques; (3) locations other than the client-provided addresses and/or legal parcel description; or (4) information regarding off-site location(s) (with possible impact to the Site) not published in publicly available records.

7.5.3 Continued Validity/User Reliance

This report is presumed to be valid, in accordance with, and subject to, the limitations specified in the ASTM E 1527-13 standard, for a period of 180 days from completion, or until the Client obtains specific information that may materially alter a finding, opinion, or conclusion in this report, or until the Client is notified by TRC that it has obtained specific information that may materially alter a finding, opinion, or conclusion in this report. Additionally, pursuant to the ASTM E 1527-13 standard, this report is presumed valid if completed less than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction.

7.5.4 Significant Assumptions

During this Phase I ESA, TRC relied on database information; interviews with Site representatives, regulatory officials, and other individuals having knowledge of Site operations; and information provided by the User as requested in our authorized Scope of Work. TRC has assumed that the information provided is true and accurate. Reliance on electronic database search reports is subject to the limitations set forth in those reports. TRC did not independently verify the information provided. TRC found no reason to question the validity of the information received unless explicitly noted elsewhere in this report. If other information is discovered and/or if previous reports exist that were not provided to TRC, our conclusions may not be valid.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

| <u>Equal/Higher Elevation</u> | <u>Address</u> | <u>Direction / Distance</u> | <u>Map ID</u> | <u>Page</u> |
|--|-------------------|-----------------------------|---------------|-------------|
| CVS PHARMACY #11036 EPA ID:: MAR000540062 | 451 WASHINGTON ST | SE 1/8 - 1/4 (0.240 mi.) | I35 | 98 |

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Release Tracking Number / Current Status: 3-0015500 / RAO

State and tribal registered storage tank lists

MA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's Summary Listing of all the Tanks Registered in the State of Massachusetts.

A review of the MA UST list, as provided by EDR, and dated 06/01/2019 has revealed that there are 2 MA UST sites within approximately 0.25 miles of the target property.

State and tribal institutional control / engineering control registries

MA INST CONTROL: Activity and Use Limitations establish limits and conditions on the future use of contaminated property, and therefore allow cleanups to be tailored to these uses.

A review of the MA INST CONTROL list, as provided by EDR, and dated 02/28/2019 has revealed that there are 3 MA INST CONTROL sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 12/17/2018 has revealed that there are 7 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

MA HW GEN: Permanent generator identification numbers for all Massachusetts generators of hazardous waste and waste oil that have registered with or notified MassDEP of their hazardous waste activities.

A review of the MA HW GEN list, as provided by EDR, and dated 06/21/2019 has revealed that there are 7 MA HW GEN sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR

EXECUTIVE SUMMARY

researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

| SMOOT JOSEPH JR | 45 VASSAR ST | NW 0 - 1/8 (0.052 mi.) | 6 | 18 |

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Property Description:

The site is comprised of three parcels identified by the City of Boston as Parcels 1401443000 (331 Washington), 1401444000 (331R Washington), and 1401445000 (337 Washington). The site is an irregular shaped, vacant undeveloped parcel consisting of 0.266 acres of land. There are no permanent buildings or structures on the site. According to historical information, the site was formerly improved with buildings of commercial and residential use between 1899 and 1978. The City of Boston currently owns all three parcels. The City of Boston foreclosed on the parcels on August 9, 1985, May 11, 1994 and June 1, 1983 respectively. The general setting surrounding the property is residential and commercial use. The Phase I ESA did not identify any RECs associated with offsite sources of a release from State-listed sites. Based on reviewed information, no Institutional Controls are required at this time.

| Property Description: | |

The property consists of two parcels with interconnecting buildings making up the main garage, the southeast garage, and the northwest garage. Sandborn maps starting from 1908 indicate that the property has been used by a garage and auto maintenance facility since that time. Sandborn maps also indicate the presence of underground gasoline tanks, however these tanks are absent after 1989. Current use is automotive/auto body repair. Chemicals and materials associated with this activity such as antifreeze, gasoline, waste oil, paints, and thinners are used and stored on the property. The City leases the property to Roper s Auto body shop Roper s is a new tenant and not connected to the party which was foreclosed upon..

US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is a federal online database for Brownfields Grantees to electronically submit data directly to EPA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Oil Or Haz Material: Oil

Release:

Release Tracking Number/Current Status: 3-0019789 / RAO
Primary ID: Not reported
Official City: BOSTON
Notification: 07/24/2000
Category: 120 DY
Status Date: 12/24/2001
Phase: PHASE II
Response Action Outcome: A2 - A permanent solution has been achieved. Contamination has not been reduced to background.
Oil / Haz Material Type: Hazardous Material

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State and tribal Brownfields sites

BROWNFIELDS: Completed Brownfields Covenants Listing

Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

USGS TOPOGRAPHIC MAP

| | |
|----------------------|--------------------------|
| Target Property Map: | 5646199 BOSTON SOUTH, MA |
| Version Date: | 2012 |

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| | |
|---|-------------------------|
| <u>Flood Plain Panel at Target Property</u> | <u>FEMA Source Type</u> |
| 25025C0087G | FEMA FIRM Flood data |
| <u>Additional Panels in search area:</u> | <u>FEMA Source Type</u> |
| 25025C0079G | FEMA FIRM Flood data |
| 25025C0091G | FEMA FIRM Flood data |

NATIONAL WETLAND INVENTORY

| | |
|------------------------------------|--|
| <u>NWI Quad at Target Property</u> | <u>NWI Electronic Data Coverage</u> |
| EAST HALF OF BOSTON SOUTH | YES - refer to the Overview Map and Detail Map |

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-------------------------|---|
| 1 | 1/4 - 1/2 Mile WNW | N |
| 1G | 1/4 - 1/2 Mile WNW | N |

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Newport

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 61 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--------------------|----------------|--------------|--|--------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 9 inches | silt loam | Not reported | Not reported | Max: 1.41 Min: 0 | Max: 6 Min: 4.5 |
| 2 | 9 inches | 25 inches | channery silt loam | Not reported | Not reported | Max: 1.41 Min: 0 | Max: 6 Min: 4.5 |
| 3 | 25 inches | 59 inches | channery silt loam | Not reported | Not reported | Max: 1.41 Min: 0 | Max: 6 Min: 4.5 |

Soil Map ID: 2

Soil Component Name: Udorthents

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Merrimac

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|---|----------------|--------------|--|--------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 18 inches | fine sandy loam | Not reported | Not reported | Max: 141.14 Min: 42.34 | Max: 6 Min: 3.6 |
| 2 | 18 inches | 22 inches | gravelly loamy sand | Not reported | Not reported | Max: 141.14 Min: 42.34 | Max: 6 Min: 3.6 |
| 3 | 22 inches | 59 inches | sr to sand to very gravelly coarse sand | Not reported | Not reported | Max: 141.14 Min: 42.34 | Max: 6 Min: 3.6 |

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: MassDEP

Telephone: 617-292-5907

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Massachusetts Geographic Information System (MassGIS) Datalayers

Source: Executive Office of Environmental Affairs

Telephone:

Public Water Supply Database

Telephone:

The Public Water Supply datalayer contains the locations of public community surface and groundwater supply sources and public non-community supply sources as defined in 310 CMR 22.00.

Areas of Critical Environmental Concern

Telephone:

The Areas of Critical Environmental Concern (ACEC) datalayer shows the location of areas that have been designated ACECs by the Secretary of Environmental Affairs. ACEC designation requires greater environmental review of certain kinds of proposed development under state jurisdiction within the ACEC boundaries. The ACEC Program is administered by the Department of Environmental Management (DEM) on behalf of the Secretary of Environmental Affairs. The Massachusetts Coastal Zone Management (MCZM) Office managed the original Coastal ACEC Program from 1978 to 1993, and continues to play a key role in monitoring coastal ACECs. Procedures for ACEC designation and the general policies governing the effects of designation are contained in the ACEC regulations (301 CMR 12.00). The ACEC datalayer has been compiled by MCZM and DEM and includes both coastal and inland areas.

EPA Designated Sole Source Aquifers

Telephone:

The Sole Source Aquifer datalayer was compiled by the Department of Environmental Protection (DEP) Division of Water Supply (DWS). Seven Sole Source Aquifers have been designated by the US Environmental Protection Agency (EPA) for Massachusetts. A Sole Source Aquifer (SSA) is an aquifer designated by US EPA as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for that area and for which there are no reasonably available alternative sources should that aquifer become contaminated. The aquifers were defined by an EPA hydrogeologist.

Aquifers

Telephone:

MassGIS produced an aquifer datalayer composed of 20 individual panels, generally based on the boundaries of the major drainage basins. Areas of high and medium yield were mapped. This datalayer includes polygon attribute coding to help in the identification of areas in which cleanup of hazardous waste sites must meet drinking water standards, as defined in the Massachusetts Contingency Plan (MCP) (310 CMR 40.00000).

Non-Potential Drinking Water Source Areas

Telephone:

Non-Potential Drinking Water Source Areas (NPDWSA) are regulatory in nature representing one of many considerations used in determining the standards to which ground water must be cleaned in the event of a release of oil or hazardous material. NPDWSAs are not based on existing water quality and do not indicate poor ambient conditions.

DEP Approved Zone IIs

**APPENDIX B:
USER QUESTIONNAIRES**

**PHASE I ENVIRONMENTAL SITE ASSESSMENT
USER QUESTIONNAIRE**

Pursuant to the American Society for Testing and Materials E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-13), in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The User should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

The "User" is defined in the ASTM E 1527-13 standard as *the party seeking to use Practice E 1527 to complete an environmental site assessment of the Site. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.*

Thank you for taking the time to complete this questionnaire. If you have any questions, please call Nicole Hudson at (978) 656-3663 or e-mail nhudson@trccompanies.com.

E-mail Address: james.smith@boston.gov

Signature: 

Site Name & Address: Harvard, Norwell, Radcliffe,
Elmont Streets (16 Parcels)

Purpose of ASTM Phase I (potential purchase, potential sale, re-finance, update the environmental condition of the Site, Lease termination or initiation, etc.)

Potential Sale

(1.) **Environmental cleanup liens that are filed or recorded against the Site (40 CFR 312.25)**
Did a search of recorded land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the Site under federal, tribal, state or local law?

Yes No

NOTE 1 — In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

(2.) **Activity and land use limitations (AULs) that are in place on the Site or that have been filed or recorded against the Site (40 CFR 312.26(a)(1)(v) and (vi))**

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the Site and/or have been filed or recorded against the Site under federal, tribal, state or local law?

Yes No

(3.) **Specialized knowledge or experience of the person seeking to qualify for the *Landowner Liability Protection (LLP)* (40 CFR 312.28)**

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes No

(4.) **Relationship of the purchase price to the fair market value of the Site property (40 CFR 312.29)**

Does the purchase price being paid for the Site property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes No N/A

(5.) ***Commonly known or reasonably ascertainable information regarding the Site property* (40 CFR 312.30)**

Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

- (a.) Can you provide any information regarding the past uses of the Site? Yes No
- (b.) Can you provide any information regarding specific chemicals that are present or once were present at the Site? Yes No
- (c.) Can you provide any information regarding spills or other chemical releases that have occurred at the Site? Yes No
- (d.) Can you provide any information regarding any environmental cleanups that have occurred at the Site? Yes No

Previous Phase I completed for 11 of the parcels in March 2018 by TRC. No RECs were identified

(6.) **The degree of obviousness of the presence or likely presence of contamination at the Site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)**
 Based on your knowledge and experience related to the Site are there any obvious indicators that point to the presence or likely presence of releases at the Site?

Yes No

(7.) **Proceedings Involving the Site**
 Are you aware of: (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Site; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the Site?

Yes No

(8.) **Questions Regarding Helpful Documents**
 Are you aware of the presence of any of the documents listed below and, if so, whether copies can and will be provided to TRC within reasonable time and cost constraints?

| | Yes | No |
|---|-------------------------------------|-------------------------------------|
| - Environment site assessment reports | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| - Environment compliance audit reports | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

PHASE I ENVIRONMENTAL SITE ASSESSMENT INTERVIEW QUESTIONNAIRE

| SITE INFORMATION | | | |
|---|--------------------------------------|------------------------------------|--------------------------|
| Site Name: | Harvard Norwell Elmont Radcliffe | Site Address: | 16 Parcels in Dorchester |
| INTERVIEWEE INFORMATION | | | |
| Name : | James Smith | Role: | |
| Title: | Senior Environmental Compliance Mgr. | Company/Agency: | Boston DND |
| Interview Date: | 9/12/19 | Years Associated with Site: | 8 |
| REQUESTED SITE KNOWLEDGE AND DOCUMENTATION | | | |
| 1.) TRC requests knowledge and copies of <i>Helpful Documents</i> (if any) as described in ASTM E1527-13, Section 10.8.1. Such documents include: environment site assessment reports, environment compliance and audit reports, environmental permits, registrations for on-Site petroleum storage tanks, reports regarding Site hydrogeologic conditions, notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Site or relating to environmental liens encumbering the Site, hazardous waste generator notices or reports, geotechnical studies, risk assessments, and activity and land use limitations (AULs). | | | |
| Previous Phase I for 11 parcels provided | | | |
| 2.) TRC requests knowledge and supporting documentation (if any) of regulatory proceedings involving the Site. Such proceedings may include: (a) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site; (b) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Site; and (c) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. | | | |
| None | | | |
| 3.) TRC requests additional specialized knowledge involving the Site regarding miscellaneous historically and/or environmentally-pertinent information. | | | |
| None | | | |
| 4.) TRC requests knowledge regarding the storage, current use, or historic use of oil and/or hazardous materials at the Site or surrounding properties (including underground or aboveground petroleum storage for heating/fuel purposes). | | | |
| None | | | |

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by TRC were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by TRC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Aerial Photo Decade Package

08/22/19

Site Name:

16 Dorchester Parcels
Elmont Street
DORCHESTER, MA 02121
EDR Inquiry # 5762164.8

Client Name:

TRC
650 Suffolk Street
Lowell, MA 01854
Contact: Nicole Hudson

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

| <u>Year</u> | <u>Scale</u> | <u>Details</u> | <u>Source</u> |

Re: Public Records Request for: 24, 20, 52 Elmont Street; 77-79, 81, 84, 94, Harvard Street; 147, 143, 116, 106, Parcel ID#'s 1402340000 and 1402345000; 89 Radcliffe Street and Parcel ID# 1402358000 of Radcliffe Street, Boston MA.

Dear Ms. Hudson,

The Boston Public Health Commission is in receipt of your September 3, 2019 request, for any available environmental health records for the above listed properties. The Commission responds as follows:

Copies of the records responsive to your request in the Commission's possession, custody, or control are enclosed.

The Commission has no documents responsive to your request.

The Commission estimates that it will require 15 additional business days for review and production of the requested records, as provided under 950 CMR 32.07 (2). If any fees are associated with this request, we will notify you promptly.

Under the 950 CMR 37.09 (1) of the Public Records Law, you may appeal the Commission's response to the supervisor of public records in the secretary of state's office within 90 days, or you may seek judicial remedy in Superior Court or in the Supreme Judicial Court. All appeals must be submitted to the Supervisor of Records at Office of the Secretary of State, Room 1719, One Ashburton Place, Boston, MA 02108.

Should you have any questions, I can be reached at phone #617-534-2654

Sincerely,

Valda Lamb
Program Coordinator

Reports-Compliance Fee-Permanent Solution

1,470.00

Here are the instructions for mailing the compliance fee to DEP when we send in the PSS. ~~Please have Diane Issue a~~
~~check on Monday for \$1,470.00.~~

Please scan to job folder/PSS before mailing.
save as "PSSNC Fee" Thanks
Katie

Payment of Fees

All payments should be made to **Commonwealth of Massachusetts**. For One-Time Fees (RAM, Permanent Solution, DPS, AUL) the check and page one of the BWSC transmittal form should be sent to MassDEP, PO Box 4062, Boston, MA, 02211-4062. Invoice payments should be sent to MassDEP, PO Box 3982, Boston, MA 02241-3982 with the invoice remittance. For more information visit MassDEP's website at <http://www.mass.gov/eea/agencies/massdep/cleanup/>. If you have questions about the MCP or fees, contact MassDEP at bwsc.regulations@state.ma.us or the BWSC fee inquiry line at 617-292-5545.

**PERMANENT SOLUTION STATEMENT WITH NO CONDITIONS
18-24 HARVARD AVENUE
DORCHESTER, MASSACHUSETTS
MassDEP RTN 3-35126**

1.0 INTRODUCTION

EndPoint, LLC (EndPoint) prepared this Permanent Solution Statement (PSS) with No Conditions on behalf of the property owner, Eighteen Harvard Avenue, LLC, following the discovery of a 120-day Reportable Condition (RC) for soil and groundwater (i.e., petroleum-related constituents greater than reporting category RCS-1 and RCGW-2 standards) at the commercial property referenced above (the “Site”). A Release Notification Form (BWSC-103) was submitted to the Massachusetts Department of Environmental Protection (MassDEP) on August 17, 2018. The MassDEP subsequently assigned Release Tracking Number (RTN) 3-35126 to the disposal site.

The current and historical use of the Site is commercial in nature and is utilized as an automobile repair and body shop. EndPoint performed environmental site investigations at the Site between February 2018 and July 2019 to assess the nature and extent of the petroleum-related constituents in soil, groundwater and sub-slab soil vapor associated with the undocumented release(s) from a suspect former petroleum underground storage tank (UST) below the building floor in the eastern section of Garage 2 shown on **Figure 2**. No UST closure report or records of environmental sampling associated with either the removal or abandonment in place were found. These data were assessed as part of a Method 3 Risk Characterization which concluded a Condition of No Significant Risk exists at the Disposal Site which supports this PSS with No Conditions and an Activity and Use Limitation (AUL) is not needed to maintain a level of No Significant Risk at the Disposal Site.

The general Site location is shown on **Figure 1, Site locus Map** and Site features are shown on **Figure 2, Site Plan**. **Figure 3** shows the environmental sampling locations and the Disposal Site Boundary.

This report is subject to EndPoint's limitations presented in **Appendix A**. Copies of the Release Notification Form BWSC-103, Notice of Responsibility, and the PSS transmittal form (BWSC-104) are included in **Appendix B**. The PRP has elected for EndPoint, LLC to sign transmittal form BWSC-104 on his behalf. A copy of the Agent For letter authorizing EndPoint to do so is included in **Appendix B**. In accordance with the public notification requirements cited in the MCP under 310 CMR 40.1400, the City of Dorchester officials have been notified of the availability of this PSS with No Conditions with instructions on how to obtain a copy of this report (refer to **Appendix C**).

2.0 SITE DESCRIPTION

The Site consists of one relatively flat parcel of land totaling 29,758 square feet in size and identified by the City of Boston as Parcel ID 1401470000, which is currently owned by Eighteen Harvard Avenue LLC. The Site is developed with a 21,667 square foot, one-story building space with two parking areas on the northeast and west sides of the building. The western parking area is mostly unpaved with some broken asphalt cover and the northeastern parking area is paved with some broken asphalt cover. Current Property use is commercial and utilized as an automobile repair and body shop.

The building is comprised of four garage areas, two basement areas and a second floor office space. The garages are heated with natural gas ceiling-mounted heating units. Natural gas, water and sewer service enter the building from Harvard Avenue. Electrical service enters the building via overhead lines from Ripley Road. There are four hydraulic lifts, two active paint booths and two floor drains in the building. The outlets for the floor drains are unknown and one drain is reported as closed and sealed.

The Site is bound to the north by residential properties and to the west by Ripley Road, residential properties and a playground. Residential properties and a playground abutts the Site to the south and Harvard Avenue abutts the Subject Property to the east, followed by residential properties.

3.0 SITE INVESTIGATION SUMMARY

During 2018, EndPoint conducted a Phase II due diligence environmental site assessment (ESA) which identified a 120-day reportable condition under the MCP. The reportable condition was based upon the detection of volatile petroleum hydrocarbons (VPH) fractions and analytes in soil samples from borings B-1, B-2 and B-6 (i.e., benzene, methyl tert-butyl ether (MTBE), naphthalene and VPH fraction ranges C₅-C₈ aliphatics and C₉-C₁₀ aromatics) above the applicable MassDEP Reporting Category RCS-1 standards. Additionally, VPH fractions and analytes were also detected above applicable Reporting Category RCGW-2 standards in groundwater samples from MW/B-2 (i.e., C₅-C₈ aliphatics and C₉-C₁₀ aromatics, xylenes and benzene) and in GMW-2 (i.e., C₅-C₈ aliphatics and xylenes). These results are summarized in **Table 1** (soil) and **Table 2** (groundwater).

MassDEP was notified of the release through the submittal of the Release Notification Form (RNF) on August 17, 2018. As such, MassDEP issued a Notice of Responsibility (NOR) dated September 13, 2018. The following sections discuss the site investigations conducted as part of a Phase II due diligence ESA and the subsequent Phase I Initial Site investigation.

3.1 PHASE II ESA INVESTIGATION

The following discusses the methods and results of the Phase II ESA performed during 2018.

3.1.1 Soil borings and soil sampling

On February 22, 2018, EndPoint oversaw the advancement of nine soil borings by Bronson Drilling of Winchester, MA (Bronson) by direct push methods utilizing an AMS PowerProbe 9100-SK. Seven soil borings (B-1 through B-7) were advanced to depth throughout the interior of the building focusing on the potential suspect USTs, existing floor drains and hydraulic lifts. Two other soil borings (B-8 and B-9) were advanced outside the C&J Auto building at 41 Ripley Road to address and potential impacts from the operations inside Garage 3. During the advancement of these soil borings, EndPoint personnel collected soil samples continuously in 5-foot intervals using dedicated acetate sleeves. The core

samples were inspected to log physical characteristics of the soil and screened for total volatile organic vapors (TOV) using a photoionization detector (PID) equipped with a 10.6 eV lamp. The PID was calibrated to an isobutylene standard and set to a benzene response factor. Copies of the boring logs are included in **Appendix E**.

In addition, two surficial soil samples were collected at approximately 1 foot below ground surface (bgs) to assess surficial staining observed in the two parking areas. Surficial sample S-1 was collected in the northeastern parking lot and the second surficial soil sample (S-2) was collected from the western parking lot.

During drilling activities, the soil was observed to consist mostly of fine to medium sand and gravel with silt. Evidence of fill (i.e., brick fragments and glass) were observed in borings B-1 through B-3 and B-7. Coal and coal ash were observed in the borings in B-8 and B-9 located outside Garage 3. Depth to groundwater observed at the time of drilling was generally 7 feet bgs.

PID readings of soil samples from the borings ranged from below the instrument detection level to 608 parts per million by volume (ppmv) in boring B-2 at 13 feet bgs. Based on PID measurements and visual and olfactory observations, four soil samples from borings B-1, B-2, B-6 and B-7 were collected for laboratory analysis of VPH and EPH fractions and analytes. These soil samples were collected from the saturated zone observed at the time of drilling. Samples from borings B-1 and B-6 were taken at approximately 10 feet bgs, the sample from boring B-2 was taken at approximately 13 feet bgs and the sample from boring B-7 was taken at the 5- to 10-foot bgs interval. These depth intervals corresponded with the groundwater interface and were considered to characterize worst case Site conditions (i.e., the water table smear zone). The samples were submitted to ChemServe of Milford, NH for VPH and/or extractable petroleum hydrocarbons (EPH) analysis via MassDEP methods and also for lead via EPA Method 6010C. Additionally, the two surficial soil samples from S-1 and S-2 were submitted for laboratory analysis of EPH and lead via EPA Method 6010C.

Based on the soil sample results summarized in **Table 1**, concentrations of benzene, MTBE, naphthalene and VPH fractions C₅-C₈ aliphatics and C₉-C₁₀ aromatics exceeded the applicable MassDEP Reporting Category for RCS-1 soils in the soil samples collected from borings B-1, B-2 and B-6. These soil borings were advanced inside the building near the two suspected UST areas in Garage 1 and Garage 2. A copy of the laboratory analytical report is included in **Appendix F**. These results represented a 120-day notification condition to the MassDEP.

In the area of surficial staining in the western parking lot, PAH target compounds and lead were identified above the MassDEP RCs for soil in sample S-2; however, coal and coal ash were observed in borings B-8 and B-9, which were advanced in the vicinity of boring S-2 which contained elevated PAH and lead concentrations. The constituents detected are pyrogenic PAHs (not from petroleum) which are formed during the incomplete combustion of organic material including wood and coal. In accordance with the MCP, specifically 310 CMR 40.0317(9), releases of oil or hazardous materials related to coal, coal ash or wood ash are exempt from reporting. Therefore, the PAHs are not reportable to the MassDEP. Moreover, the lead is also not reportable to the MassDEP, as it falls under the same exemption. The presence of coal and coal ash indicates the soil contains historic, or urban fill. The MassDEP's Technical Update '*Background Levels of Polycyclic Aromatic Hydrocarbons and Metals in Soil*' referenced typical concentrations for metals and PAHs in soil containing coal and coal ash associated with fill material. The concentration of lead found in the sample was 229 milligrams per kilogram (mg/kg), which is above the MassDEP RCs; however, it is below the typical concentration of lead (600 mg/kg) found in urban fill containing wood ash, coal and coal ash.

3.1.2 Groundwater Monitoring Well Installation

During March 2018, four 1-inch polyvinyl chloride (PVC) groundwater monitoring wells were installed in soil borings B-1, B-2, B-6 and B-9 based on elevated PID readings and/or visual and olfactory observations of potential impacts to groundwater. The monitoring wells were installed to a depth of 15 feet bgs and were constructed with a 10-foot length of slotted screen which intersected the water table

observed at the time of drilling. A sand pack was set around the screen with a bentonite seal placed above the screen. The wells were completed at ground surface with a road box cemented in place.

The monitoring wells were developed by purging groundwater with a peristaltic pump until sediment was removed from inside the well and the purged groundwater was observed to be clear.

3.1.3 Groundwater Sampling and Analysis

On March 6, 2018, EndPoint collected groundwater samples from the four monitoring wells (MW/B-1, MW/B-2, MW/B-6 and GMW-2) located inside Garage 1 and Garage 2. No groundwater sample was collected from well MW/B-9 because there was no evidence of impacts (i.e., no PID readings and visual and olfactory observations) determined during the drilling event. Static water level measurements were recorded by EndPoint personnel using an electronic water level meter prior to groundwater sampling. Depth to groundwater ranged from approximately 7 to 9 feet bgs.

Prior to sample collection, three to five well volumes of groundwater were purged from each well using a peristaltic pump via a modified low-flow purging method and dedicated polyethylene tubing. Groundwater chemistry readings were recorded during the purge cycle of each well by pumping the groundwater through a flow-through cell attached to a YSI™ multimeter to measure pH, temperature, electrical conductance, dissolved oxygen, oxidation reduction potential, and turbidity at 5-minute intervals. Once a minimum of three well volumes of water had been purged from the well and the field parameters stabilized to within 10% of the previous reading, the flow-through cell was disconnected, and the groundwater sample was collected in laboratory-prepared containers. Samples were submitted to ChemServe for the analysis of VPH fractions and target analytes.

Based on the groundwater sample results summarized in **Table 2**, concentrations of VPH fractions and target analytes exceeded applicable groundwater reporting category RCGW-2 in two wells: MW/B-2 and GMW-2. This represented a 120-day reportable condition to the MassDEP.

Based on the results of the Phase II ESA, a 120-day reportable condition was identified due to concentrations of petroleum-related compounds in soil and groundwater. This condition warranted subsequent preliminary response actions which were conducted during the Phase I Initial Site Investigation.

3.2 PHASE I INITIAL SITE INVESTIGATION

During 2019, EndPoint conducted a supplemental field sampling program that focused on the Disposal Site area where the two suspect former USTs were located in the Garage 1 and Garage 2 areas inside the building. Iterative phases of field sampling were performed between March and July 2019 by EndPoint as discussed below. As part of the supplemental program, EndPoint conducted additional drilling; and soil, groundwater and sub-slab vapor sampling to assess the nature extent of petroleum impacts and to assess temporal trends in contaminant concentrations. A well elevation survey was also conducted to evaluate groundwater flow patterns for the Site. The sample data are summarized in **Tables 1, 2 and 3** and copies of the laboratory analytical reports are included in **Appendices F, G and H**.

3.2.1 Soil Borings and Monitoring Wells

Two drilling events were conducted by EndPoint to assess the extent of impacted soil and groundwater in the area of Garage 1 and Garage 2 (i.e., the Disposal Site). The first event was conducted during March 2019 that included the advancement of borings B-10, B-11 and B-12 in the Garage 2 area and the installation of monitoring wells MW-10, MW-11 and MW-12 in the Garage 1 area. The second event was conducted during May 2019 that included the advancement of one boring, B-13, and the installation of one monitoring well MW-13 both located in the Garage 1 area. Refer to **Figures 2 and 3** the locations of these borings and wells.

During the March 2019 event, EndPoint contracted with Drilex of Auburn, MA to provide drilling services. During the second event in May 2019, EndPoint contracted with Bronson Drilling of Winchester, MA to provide drilling services. The borings and monitoring wells were completed to a

maximum depth of approximately 15 feet bgs using direct push drilling methods. Boring and well completion logs are included in **Appendix E**.

During each drilling event, soil samples were collected at regular intervals from each boring to the termination depths of approximately 15 feet bgs. The soil samples were inspected to log the physical characteristics of the soil and screened for TOV using a PID equipped with a 10.6 eV lamp. The PID was calibrated to an isobutylene standard and set to a benzene response factor.

During the March 2019 event, elevated TOV readings were recorded in the samples from borings B-11 (8.5-10') at 813 ppmv, B-12 (8.5-10') at 938 ppmv, and MW-12 (8.5-10') at 348 ppmv. During the May 2019 event, elevated TOV readings were recorded in the samples from borings B-13 (9.5-10') at 224 ppmv and MW-13 (11-13') at 741 ppmv. These depth intervals corresponded with the groundwater interface and were considered to characterize worst case Site conditions (i.e., the smear zone). All five soil samples were subsequently submitted for lab analysis of VPH. In addition, three soil samples (B-12 (8.5-10'), B-13 (9.5-10'), and MW-13 (11-13')) were submitted for EPH analysis and three soil samples (B-11 (8.5-10'), B-12 (8.5-10') and MW-12 (8-10')) were submitted for lead analysis. All samples were submitted under a chain of custody to ChemServe in Milford, NH for laboratory analysis.

Based upon the soil sample results summarized in **Table 1**, no detectable levels of EPH were reported in the sample from B-12 and low levels of only a few EPH analytes were detected in the other two samples from B-13 and MW-13. VPH fractions were detected in all five soil samples and to a lesser degree low levels of some target analytes including ethylbenzene, xylenes, naphthalene and toluene were detected in four of the five soil samples.

3.2.2 Groundwater Sampling

Three groundwater sampling events were conducted by EndPoint during April, May and July 2019, as discussed below. The groundwater analytical results are summarized in **Table 2** and copies of the laboratory reports are included in **Appendix G**.

April 2019

The first event was conducted on April 9, 2019. Groundwater samples were collected from five monitoring wells including MW/B-2, MW-10, MW-11, MW-12, and GMW-2 for laboratory analysis of VPH. Prior to collecting samples, depth to groundwater was measured in each well from the top of the PVC well casing using an electric water level indicator. Each well was purged a minimum of three well volumes using a peristaltic pump and dedicated polyethylene tubing. In some cases, certain wells went dry during the purge cycle due to low yield in that well. After the wells were purged and allowed to recharge, groundwater samples were collected in clean vials provided by the laboratory and delivered under a chain-of-custody to ChemServe for VPH analysis.

Based on the April 2019 results, VPH was either not detected or concentrations were below Method 1 GW-2 risk standards in wells MW-10 and MW-11. Conversely, samples from MW/B-2, GMW-2, and MW-12 had concentrations of VPH fractions and target analytes above applicable Method 1 GW-2 standards.

May 2019

The second groundwater sampling event was conducted on May 10, 2019. Groundwater samples were collected from four wells including MW/B-1, MW/B-6, MW-13 and EX-1 by EndPoint and delivered under a chain-of-custody to ChemServe for VPH analysis. The sampling method performed during this event was the same method used during the April event. Based on the results, VPH was either not detected or concentrations were below Method 1 GW-2 standards in all four samples.

July 2019

The third groundwater sampling event was conducted on July 15, 2019. Groundwater samples were collected from nine wells including MW/B-1, MW/B-2, MW/B-6, GMW-2, MW-10, MW-11, MW-12, MW-13 and EX-1 by EndPoint and delivered under a chain-of-custody to ChemServe for VOCs and VPH carbon fraction analysis. The same sampling method used during this event was the same method used during the April event. Based on these results, VPH was either not detected or concentrations were below Method 1 GW-2 standards in seven of the nine samples. Concentrations of C5-C8 aliphatics, C9-C10 aromatic and xylenes were detected in the other two wells MW/B-2 and GMW-2 which were above the applicable Method 1 GW-2 standards.

3.2.3 Sub-Slab Soil Vapor Sampling

Two sub-slab soil vapor sampling events were conducted by EndPoint to assess the presence of a potential vapor intrusion pathway. The samples were collected to assess seasonal subsurface conditions during the spring and summer. The vapor results are summarized in **Table 3** and copies of the laboratory reports are included in **Appendix G**. Sample SG-1 was collected below the office floor in Garage 1 and sample SG-2 was collected in Garage 2 near a suspected former UST.

May 2019

The first event was conducted on May 3, 2019. EndPoint personnel collected two sub-slab soil vapor samples (SG-1 and SG-2) from below the cement floor inside of Garages 1 and 2, as depicted in **Figure 2**. These locations were selected based on soil and groundwater results to determine if vapors from the impacted soil within the Disposal Site could pose a threat to indoor air quality within the building. The vapor samples were collected from temporary points below the impervious concrete floor which was at least 4 inches thick. At each sampling location, a rotary hammer was used to create a small 1-inch diameter hole through the concrete to a depth of 1 foot. A piece of dedicated clean tubing was inserted to the bottom hole and clean sand was placed in the hole and around the tubing. A layer of hydraulic cement was placed on top of the sand to create an impervious seal to prevent infiltration of ambient air

into the sample. The vapor point was purged with a mechanical pump for approximately 3 to 5 minutes before collecting the air sample. Each soil vapor sample was collected in a certified clean 6-liter SUMMA canister obtained from the laboratory and equipped with a 30-minute regulator to reduce the risk of drawing in ambient air during sample collection.

The canisters were delivered under chain-of-custody documentation to Con-Test Analytical Laboratory (ConTest) in East Longmeadow, MA for analysis of air-phase petroleum hydrocarbons (APH). As shown in the **Table 3**, the APH results were below MassDEP's Residential and Commercial/Industrial Sub-slab Soil Gas Screening Values.

July 2019

The second event was conducted on July 15, 2019 to assess summertime conditions. EndPoint personnel collected the sub-slab soil vapor samples SG-1 and SG-2 immediately adjacent to the same locations from May 2019. The same sampling methodology was conducted as was done for the May event. The two canisters were delivered under chain-of-custody documentation to Alpha Analytical (Alpha) in Mansfield, MA for APH analysis.

Based on the APH soil vapor results shown in **Table 3**, concentrations detected in sample SG-2 were below applicable Residential and Commercial/Industrial screening values. Concentrations detected in sample SG-1 were also below Residential and Commercial/Industrial values, except for C9-C12 aliphatics which was detected above the MassDEP's Residential Sub-slab Soil Gas Screening Value. These data were evaluated further as part of the Method 3 Risk Characterization in **Section 4.0**.

3.3 SITE GEOLOGY/HYDROGEOLOGY

Based on a review of the boring logs (**Appendix E**), the soils at the Disposal Site are primarily comprised of fine-grained sands and silts throughout the profile of the borings.

Depth to groundwater at the Site was generally encountered at approximately 7 feet bgs during drilling events. Static water level measurements obtained from the monitoring wells indicate groundwater was measured between

7 and 11 feet bgs. EndPoint conducted an elevation survey of the monitoring wells to evaluate the groundwater flow pattern for the Disposal Site. These data are summarized on **Figure 3**. Based on the groundwater elevations calculated for April 8, 2019, the groundwater flow direction at the Disposal Site is westerly toward Ripley Road.

3.4 SITE CHARACTERIZATION SUMMARY

The Disposal Site is considered to be the eastern portions of Garage 1 and Garage 2 where petroleum-impacted soil and groundwater have been identified. The apparent source is considered to be former USTs that contained petroleum in each garage area. The disposal site boundary is depicted on **Figure 2**. EndPoint collected soil, groundwater and sub-slab soil vapor samples from the disposal site to characterize the nature and extent of petroleum residuals in the subsurface.

Soil

Soil sample analysis for EPH and VPH indicated the residual petroleum impacts are mainly comprised of VPH that are present in the 8- to 13-foot depth interval which corresponds to the water table smear zone. The extent of VPH soil impacts are primarily located in MW/B-2 and MW-12 both of which are located inside and near the eastern wall of the building. Lower concentrations of VPH were reported in surrounding borings B-11, MW-13 and MW/B-6. This represents a square-shaped area designated as the Disposal Site Boundary (refer to **Figure 2**). The risk posed by soil is evaluated in **Section 4.0**, Method 3 Risk Characterization.

Groundwater

Nine groundwater monitoring wells were installed in the disposal site at upgradient, source area and downgradient locations. Groundwater sample analysis for VPH indicated seven of these nine wells were below Method 1 GW-2 and GW-3 standards. The other two wells, MW/B-2 and GMW-2, yielded VPH concentrations of C5-C8 aliphatics, C9-C10 aromatics, and xylenes exceeding Method 1 GW-2 standards, but below GW-3 standards. The extent of impacted groundwater is defined by the wells surrounding MW/B-2 and GMW-2 which include upgradient wells, EX-1 and MW-12, and downgradient wells MW/B-6, MW-10, MW-11 and MW-13 (refer to **Figure 2**).

Based on the three rounds of groundwater results, the concentrations are generally stable or decreasing (**Table 2**). The source (i.e., former UST) has been removed and the nature of a petroleum release is for natural degradation to occur over time thereby decreasing the size of the plume and concentrations which is expected to continue at the Site. Groundwater at the Disposal Site is not a current or potential source of drinking water based on MassDEP's Phase I Site Assessment Map (**Appendix D**), there is no complete vapor intrusion pathway from groundwater to indoor air based on the sub-slab vapor results discussed below and groundwater concentrations are below Method 1 GW-3 standards. Based on these data, there is no direct exposure pathway to groundwater impacts.

Sub-slab Soil Vapor

Sub-slab soil vapor samples were collected in the source area for APH during the spring and summer to assess worst-case conditions as the ground temperature is generally the warmest at these times. Based on the spring results, the soil vapor concentrations were below MassDEP's Residential and Commercial / Industrial Sub-Slab Soil Gas Screening Values in both samples, SG-1 and SG-2. Similarly, the summer results were also below MassDEP's Residential and Commercial / Industrial Sub-Slab Soil Gas Screening Values, except for one analyte (C9-C12 aliphatic hydrocarbons) in sample SG-1 only that exceeded the Residential Sub-Slab Soil Gas Screening Value.

A seasonal average was derived from the data for location SG-1 which is allowed in MassDEP's *Vapor Intrusion Guidance* (October 2016). The average was based on the results of the spring and summer sampling events which is considered to represent a conservatively high value since the ground temperature is warmest and the concentrations detected in the samples would represent worst-case conditions. The seasonal average values were compared to MassDEP's Residential and Commercial / Industrial Sub-Slab Soil Gas Screening Values and determined to be below these screening values. The petroleum source has been removed and the residual soil vapors are of a non-persistent nature which are expected to continue to attenuate over time. Based on these data and the information discussed above and consistent with MassDEP's Vapor Intrusion Guidance, there is no exposure pathway to sub-slab soil vapor.

4.0 METHOD 3 RISK CHARACTERIZATION

A Method 3 Risk Characterization was conducted in accordance with the MCP (1995, 1996, 2006, 2007, 2014) and *Characterizing Risks Posed by Petroleum Contaminated Sites: Implementation of the MassDEP VPH/EPH Approach* (MassDEP, 2002). Potential exposure pathways at the Site are associated with residual petroleum-impacted soil below the building from former suspect USTs in the Garage 1 and Garage 2 areas, since there are no exposure pathways to groundwater and soil vapor. This Method 3 Risk Characterization includes hazard identification, Site-specific exposure pathway assessment, and a human health risk assessment; as well as an assessment of potential impacts to ecological receptors, public safety and public welfare.

The toxicological characteristics and potential human health risks associated with the presence of compounds identified in the soil at the disposal site were assessed using MassDEP's Shortforms (March 2015).

4.1 IDENTIFICATION OF SITE SOIL AND GROUNDWATER CATEGORIES

4.1.1 Soil

The Site is a commercial property developed with a commercial-style building and the remaining outdoor property is paved with asphalt. The building occupies about 75 percent of the property and the disposal site is located under a portion of the building on the eastern side near Harvard Avenue. The receptor characteristics for the Site is adults being present with a low frequency and intensity of use during working hours only. Based upon the soil category selection matrix for human exposure potential referenced in Table 40.933(9) of the MCP, soil at the Disposal Site has been characterized as category S-3 because it is located under the footprint of a building.

4.1.2 Groundwater

The identification of groundwater categories is based upon Site observations and a review of MassDEP's Phase I Site Assessment Map (refer to **Appendix D**). The Site is not located within a Zone

II, Interim Groundwater Protection Area, Sole Source Aquifer or Potentially Productive Aquifer, and there are no private drinking water supply wells known to be located within 500 feet of the Site. Therefore, Site groundwater is not categorized as GW-1. Groundwater category GW-2 applies because depth to groundwater is less than 15 feet below ground surface under the building. All groundwater in the Commonwealth is presumed to eventually discharge to surface water; therefore, groundwater category GW-3 applies to the Site. In summary, groundwater at the Disposal Site is characterized as categories GW-2 and GW-3.

4.2 CONTAMINANTS OF CONCERN

The contaminants of concern (COCs) evaluated in this risk characterization are based on the compounds detected in soil, groundwater and sub-slab soil vapor samples at the Disposal Site. These compounds are listed in **Tables 1, 2 and 3** and include the following specific analytes for each media. Lead in soil, detected near the former USTs, was conservatively included as a COC even though the lead concentrations were below the RC.

| Soil COCs | Groundwater COCs | Sub-slab Soil Vapor COCs |
|---|--|--|
| <ul style="list-style-type: none"> • ALIPHATICS - C9 to C18 • 2-METHYLNAPHTHALENE • NAPHTHALENE • PHENANTHRENE • ALIPHATICS - C5 to C8 • AROMATICS - C9 to C10 • ALIPHATICS - C9 to C12 • BENZENE • ETHYLBENZENE • XYLENES (total) • MTBE • TOLUENE • LEAD | <ul style="list-style-type: none"> • ALIPHATICS - C5 to C8 • AROMATICS - C9 to C10 • ALIPHATICS - C9 to C12 • BENZENE • ETHYLBENZENE • XYLENES (total) • MTBE • NAPHTHALENE • TOLUENE | <ul style="list-style-type: none"> • ALIPHATICS - C5 to C8 • AROMATICS - C9 to C10 • ALIPHATICS - C9 to C12 • BENZENE • ETHYLBENZENE • XYLENES (total) • MTBE • NAPHTHALENE • TOLUENE |

4.2.1 Dose-Response Assessment

A dose-response assessment was not necessary for analytes included in MassDEP's standardized Shortforms since chemical-specific toxicological data appropriate to each compound are included in the Shortforms.

4.3 EXPOSURE ASSESSMENT

4.3.1 Potential Human Receptors and Exposure Pathways

Soil

There is no current exposure pathway to soil under current Site use because the impacted soil is located below the footprint of the building.

Future Site use is conservatively assumed to include the potential for development of the property for single-family residential use, although such use is not expected. Under potential future Site use as a single-family residential property, human receptors that may be present at the Site would be residents including adults and children as well as visitors. Construction workers may also visit the Site to maintain utilities servicing the building.

Sub-slab Soil Vapor

As discussed in **Section 3.4**, a vapor intrusion pathway does not exist at the Disposal Site because the temporal average calculated from sub-slab vapor results are below Residential and Commercial/Industrial screening values. Therefore, there is no exposure to sub-slab soil vapor.

Groundwater

Groundwater at the Disposal Site is not used for drinking water and the Site is not located in a categorically GW-1 area. Therefore, there is no exposure to groundwater at the Disposal Site.

4.3.2 Exposure Scenarios

Under the current Site use scenario as a commercial business, there is no exposure pathway present at the Disposal Site to impacted soil, other than potential construction/utility workers, and an exposure pathway to sub-slab soil vapor and groundwater does not exist. Potential future exposure scenarios were evaluated for residential and construction workers who may come in direct contact with impacted soil in the future. Both scenarios were evaluated through the long-term risk soil Shortform.

In order to be conservative, the human health risk for a potential future use residential scenario was conducted to determine if conditions at the Disposal Site would require an Activity and Use Limitation (AUL) to maintain a level of No Significant Risk. Under the future use scenario, the Site building and the ground surface could be altered such that residents and/or construction workers could have direct contact with soil on bare skin. This potential exposure is conservatively considered to occur at the Site during potential future activities as described below.

4.3.3 Exposure Assumptions

Potential exposure to COCs in soil at the Disposal Site was evaluated for potential future residential use and construction workers who may have direct contact with the soil. MassDEP's ShortForms were used to assess risks to soil for a residential scenario (Table RS-1) and the construction worker scenario (Table CW-1). The maximum concentration for each COC detected in the soil was used in the Shortforms.

Residential Shortforms are designed to conservatively evaluate human health risk using assumptions regarding:

- Potential activities occurring at a typical site (e.g., activities such as gardening which involve a high degree of exposure are assumed to be taking place);
- The frequency and duration of exposure (e.g., for adults, outdoor activities involving direct contact with impacted soil 5 days per week, 30 weeks per year); and
- The level of sensitivity of individuals present (e.g. children versus adults).

The exposure assumptions used resulted in greater than average exposure estimates for residential use of the property in order to be conservatively protective of human health. A complete list of the exposure assumptions used are included with the residential Shortform spreadsheets in **Appendix I**.

EndPoint reviewed the MassDEP's default exposure assumptions used in the Shortforms and they are, at a minimum, consistent with current and reasonably foreseeable future Site use. These exposure assumptions were not altered from the default values determined by MassDEP for residential and construction workers.

4.4 EXPOSURE POINT CONCENTRATIONS

Exposure point concentrations (EPCs) are used to represent the concentration of COCs that a receptor could be exposed to in the absence of further remediation. As a conservative measure, the maximum concentration for each COC in soil was used as the EPC and were the same values used in the Shortforms.

4.5 RISK EVALUATION

4.5.1 Risk to Human Health

Potential human health risk was evaluated for COCs in soil under current and potential future exposure scenarios identified in **Section 4.3.3**, including residential and the construction worker. The result is considered a conservative assessment of the degree of risk associated with exposure to the chemicals under potential future use of the Site as a residence. Note that there are no impacts identified from 0-3 feet bgs and the soil impacts identified from 8.5 to 13 feet bgs are not considered to be accessible under the current Site use scenario. Therefore, there is no exposure for current use.

Soil EPCs were based on the maximum concentration for each analyte detected in the soil samples. As shown on the Shortform, the cumulative subchronic and chronic Hazard Index are less than 1.0 and the Excess Lifetime Cancer Risk is less than 1 in 100,000, indicating there is no cancer risk pursuant to 310

CMR 40.0955(2)(b) for potential future residential and construction worker exposures. In accordance with 310 CMR 40.0993(6), these results indicate that a condition of No Significant Risk of harm to human health exists for current and foreseeable future uses of the Site without the need for an AUL to maintain a level of No Significant Risk.

4.5.2 Risk to Safety

The MCP lists the following as examples of potential safety hazards:

- The presence of rusted or corroded drums or containers, open pits, lagoons, or other dangerous structures,
- Threat of fire or explosion including the presence of explosive vapors resulting from a release of OHM, and
- Uncontained materials that are corrosive, reactive, or flammable.

There are no conditions present at the Disposal Site in comparison to those listed above that would pose a risk to safety. Therefore, No Significant Risk to safety exists at the Disposal Site.

4.5.3 Risk to Public Welfare

Potential risk to public welfare were evaluated based on disposal site conditions with respect to:

- Localized nuisance conditions such as odors;
- Significant community effects; and
- Exceedances of Upper Concentration Limits (UCLs).

No local nuisance conditions are present at the Disposal Site. The soil impacts are located below the Site building whereby it is not accessible and odors are not apparent. Based on the Site analytical data, concentrations of COCs are below UCLs. Based on this information, a condition of No Significant Risk to public welfare exists at the Disposal Site.

4.5.4 Risk to the Environment

A Stage I Environmental Screening was conducted in accordance with the MCP, 310 CMR 40.0995(3).

Based on the outcome of the screening:

- Residual impacts are greater than 2 feet bgs (e.g., impacts to terrestrial receptors are considered unlikely for residual impacts greater than 2 feet bgs); and,
- There is no readily apparent harm to environmental receptors. The petroleum-related compounds are not migrating from the Disposal Site in groundwater and residually impacted soil is located beneath the building. There are no surface water bodies or wetlands on-Site or near the Site. The nearest surface water body is Scarboro Pond which is located approximately 1.0 mile west of the Site. Based on the distance to the pond, exposure to aquatic biota and terrestrial habitats is not likely which supports a condition of No Significant Risk to the environment at the Site.

4.6 RISK CHARACTERIZATION OUTCOME

Risks to human health, safety, public welfare, and the environment were characterized for current use, and for potential future use as a residential property, using remaining soil concentrations. Potential risks were assessed for soil, since exposure pathways to soil vapor and groundwater impacts were not present, without limiting the future use of the property. Based on the outcome of this Method 3 Risk Characterization, a condition of No Significant Risk has been achieved for human health, public welfare, safety, and the environment and an Activity and Use Limitation is not needed to maintain a level of No Significant Risk.

5.0 REPRESENTATIVENESS EVALUATION AND DATA USABILITY ASSESSMENT

In support of this PSS, a Representativeness Evaluation and Data Usability Assessment (REDUA) was performed to document: 1) the adequacy of the distribution of samples and field screening data used to define the nature and extent of the release; and 2) that the data relied upon is scientifically valid and defensible, and of a sufficient level of precision, accuracy and completeness to support this Permanent Solution Statement with No Conditions.

5.1 CONCEPTUAL SITE MODEL

The petroleum release (likely gasoline) impacted soil was identified below the building at depths between 8.5 and 13 feet bgs. The extent of impacted soil is local to the former UST areas.

Groundwater at the Site has also been impacted from the petroleum release through the dissolution of petroleum constituents from the impacted soil. No LNAPL is present on the Site. Biodegradation is occurring as the impacts are mostly in the form of the fractions with low to non-detectable concentrations of target analytes. The plume appears stable or receding and petroleum concentrations are decreasing. The dissolved-phase plume is expected to continue to attenuate through natural biodegradation.

Air-phase petroleum hydrocarbons are present in the sub-slab soil vapor as a result of volatilization from impacted soil and groundwater. Due to the petroleum nature of the vapors, natural attenuation is expected to reduce the concentrations and the extent of the vapors in the subsurface. The floor of the building is a competent cement floor that is at least four inches thick. There is no complete exposure pathway of the vapors to indoor air due in part to the relatively low concentrations of soil vapors and the presence of the concrete floor.

The only potential exposure scenario is future exposure to residents if the building is razed and/or earthwork results in the impacted soil becoming accessible. Since groundwater is not a current or potential drinking water resource, there are no exposure pathways to groundwater

5.2 REPRESENTATIVENESS EVALUATION

5.2.1 Use of Field Screening Data

Field screening data was collected during field headspace analysis of soil samples from soil borings completed adjacent to the source area. The locations of soil borings are shown on **Figure 3**. Placement of the soil borings and soil sample intervals were based on the location of the two former USTs and depth of the water table to assess the water table smear zone. PID readings for each soil sample

analyzed at the laboratory are included in **Table 1** and continuous PID screenings for each soil sample are included in the soil boring logs (**Appendix E**). The screening data was used to determine what soil samples were going to be submitted for confirmatory laboratory analysis.

5.2.2 Sampling Rationale / Plan

The sampling plan was developed on an iterative basis to assess petroleum constituents in soil, soil vapor and groundwater associated with the two former historic USTs. Based on the petroleum nature of the release, environmental samples were analyzed for EPH, VPH, APH and lead.

Nine soil borings and nine groundwater monitoring wells were installed around the former UST areas in and around the east side of the building (refer to **Figure 3**). Soil samples exhibiting elevated PID field headspace readings, generally encountered within the water table smear zone, were analyzed for EPH, VPH and lead to characterize the petroleum in the soil. Groundwater samples were collected from the nine wells on three occasions to assess temporal trends in VPH concentrations. Two sub-slab soil vapor samples were collected under the buildings floor within the “generalized source area” on two occasions (i.e., spring and summer) to assess seasonal variations in APH concentrations.

5.2.3 Spatial and Temporal Distribution of Samples

As part of this investigation, a total of nine soil borings were advanced on three separate occasions (February, March, and May of 2019) to delineate the extent of the petroleum impacts from the former USTs. Groundwater samples were collected from nine monitoring wells on three occasions (March, May, and July 2019), and two sub-slab vapor samples were collected on two occasions (May and July 2019).

The spacing number and depths of soil samples was deemed adequate to characterize residual impacts from the two former historical USTs. Groundwater samples were . Sub-slab soil vapor samples were collected in the source area to assess worst case conditions and monitor seasonal variability in soil vapor quality during the spring and summer.

Two temporary spoints were installed and sampled in May and July 2019. The soil vapor results were below risk screening standards for commercial/industrial settings. The building is an occupied commercial garage building. Further evaluation of the indoor air vapor intrusion pathway was not deemed necessary.

5.2.4 Data Inconsistency, Uncertainty, and Unrepresentativeness

Soil samples were collected from each boring and screened in the field for total volatile organic vapors to identify areas of subsurface impacts. The screening results corresponded with areas where impacted soil was identified. Soil samples were collected from the borings for EPH and VPH. These results corresponded with positive detections in areas where impacted soil was identified and also low detections in areas where impacts were less. Groundwater samples were collected for VPH analysis. Those results also corresponded with elevated detections in samples collected from within the general source area and yielded lower detections in downgradient sample locations. The EPH and VPH analyses performed on the soil samples and the EPH analysis performed on groundwater samples at the Site are adequately representative of the types of compounds typically present in petroleum products.

Sub-slab vapor samples were collected for APH analysis at locations in the general source area. The vapor results corresponded with elevated detections where subsurface impacts were the greatest.

The VPH, EPH, and APH samples collected to characterize the Disposal Site are deemed adequately representative of the types of compounds associated with the petroleum release. As such, these data are considered representative in supporting this Permanent Solution Statement with No Conditions.

5.3 DATA USABILITY ASSESSMENT

Soil and groundwater samples presented in this report were received by the laboratory within holding times, properly preserved where appropriate, and in good condition. Not all performance/acceptance standards for the required QA/QC procedures were met, but the resulting sample bias was acceptable for use in characterizing human health risk for the following reasons.

| Sample Designation | Report Date | Analytical Parameter | Deficiency | Justification |
|--------------------|-------------|----------------------|--|---|
| B-13 (9.5-10') | 5/15/19 | VPH (soil) | Closing CCV recovery for C9-C10 Aromatic Hydrocarbon Range slightly high but all other QC good. | The opening ICV/CCV, all LCS/LCSD samples, blanks and other QC measures were all within control limits for this data. The closing CCV recovery was slightly greater than the allowable control limit range. It is not likely that the actual sample data was affected by this elevation. In the event the data was affected, it would be biased high and any actual concentrations of analytes found in the samples for the C9-C10 Aromatic Hydrocarbon range would be over reported. |
| MW-13 (11-13') | 5/15/19 | VPH (soil) | Closing CCV recovery for C9-C10 Aromatic Hydrocarbon Range slightly high but all other QC good. | Same Justification as stated above. |
| B-2 | 8/8/19 | VPH (gw) | Toluene result reported as estimated due to slightly exceeding the calibration limits. No sample left for re-analysis. | Result should be deemed biased low. It is unlikely that there is an impact to this data because the curve is linear, but under the method criteria all reported results must be bracketed with the calibration curve range. |
| EX-1 | 5/22/19 | VPH (gw) | Sample pH = 3 | With a pH of 3, it is not likely that any degradation occurred because the determination to keep the pH to <2 is an extreme measure and a pH of 3 still will not allow biodegradation biota to survive. |

| Sample Designation | Report Date | Analytical Parameter | Deficiency | Justification |
|--------------------|-------------|----------------------|------------------------|---|
| MW/B-2 | 4/18/19 | VPH (gw) | Diluted due to matrix. | Due to high concentrations of target and non-target analytes within these samples, dilution had to be performed. This step is taken to preserve the instrumentation and not cross contaminate future samples. All reportable concentrations are accurate and certifiable. The dilution did result in reporting detection limits that are greater than the lab's standard detection limits. Reporting lower detection limits would not be possible due to these high concentrations of target and non-target analytes. |
| GMW-2 | 4/18/19 | VPH (gw) | Diluted due to matrix. | Same Justification as stated above for MW/B-2. |

Performance/acceptance standards for samples not listed in the table above were within acceptable ranges and are considered to be accurate. EndPoint assessed data usability and determined that the samples were extracted and analyzed within the required holding times, that the laboratory quality control surrogate compounds were within acceptable limits, and the quality assurance and quality control procedures required by the methods used were achieved. Therefore, these data are usable for the purpose of this Permanent Solution with No Conditions Statement.

5.4 REDUA CONCLUSION

Through the REDUA process, data and information collected were synthesized and consolidated into the above REDUA summary demonstrating that the Permanent Solution with No Conditions Statement is

supported with information that is consistent with the current conceptual site model, is representative of Site and nearby environmental conditions, and of a quality acceptable to MassDEP.

6.0 EVALUATION OF FEASIBILITY TO ACHIEVE BACKGROUND

A feasibility evaluation was conducted pursuant to 310 CMR 40.1020 demonstrating that it is categorically not feasible to reduce concentrations of residual oil at the disposal site to levels which approach background conditions. This is based on the criteria referenced in Section 9.0 of MassDEP's guidance document "*Conducting Feasibility Evaluations Under the MCP, Policy #04-160*", dated July 16, 2004 (the Policy) and listed below.

Under Section 9.3.1 of the Policy, Conditions of Categorical Feasibility, it is not feasible to achieve or approach background due to:

- The residual impacted soil at the Disposal Site is greater than 20 cubic yards and estimated to be 170 cubic yards.
- The residual impacted soil at the Disposal Site is present at a depth greater than 3 feet (i.e., 8.5-13 feet) and is covered by a permanent structure.

Under Section 9.3.2.3 of the Policy, Conditions of Categorical Infeasibility, it is infeasible to excavate the impacted soil to achieve or approach background because the impacted soil is located under a permanent structure. In addition, under this same section, Site conditions are such that achieving or approaching background for groundwater is "categorically infeasible" under the Policy since:

- Contaminants remaining in groundwater at No Significant Risk levels and the COCs (i.e., petroleum constituents) are "nonpersistent" in the environment as described in Section 9.3.2.3 of the Policy.

Therefore, Site soil and groundwater conditions indicate a condition of categorical infeasibility in accordance with this Policy, assuring Presumptive Certainty of MassDEP approval.

7.0 CONCLUSIONS

During the conduct of a Phase II ESA, a “120-day” reportable condition was identified at the Site due to the discovery of petroleum-related compounds in the soil and groundwater at concentrations, greater than applicable MCP Reporting Category RCS-1 and RCGW-2 standards. The condition was attributed to a historic release(s) of petroleum from two former USTs located below the building. Subsequently, EndPoint conducted a Phase I Initial Site Investigation to assess the nature and extent of the petroleum release which included drilling additional soil borings, installing additional monitoring wells and collecting soil and groundwater samples from these locations for EPH and VPH analysis. Sub-slab soil vapor samples were collected to assess the potential vapor intrusion pathway into the building. Potential risks to human health, safety, public welfare, and the environment were characterized for current use, and potential future use as a residential property, using remaining soil concentrations.

Based on the results of the Method 3 Risk Characterization, No Significant Risk exists with respect to human health, safety, public welfare, and the environment at the Disposal Site. For the reasons presented below, a Permanent Solution with No Conditions has been achieved for the Disposal Site.

- A level of No Significant Risk has been achieved for current and foreseeable future uses, including residential use without the need for an AUL to maintain a level of No Significant Risk.
- The data set used for the risk characterization is usable and representative of Site conditions.
- It has been demonstrated that it is infeasible to further reduce environmental media impacts to background in accordance with MassDEP policy.

Therefore, the submittal of a Permanent Solution with No Conditions Statement is being filed with the MassDEP for RTN 3-35126, thus completing the response actions under the MCP.

APPENDIX A

LIMITATIONS

1. The conclusions and observations described in this response action document and associated with the Licensed Site Professional (LSP) opinion as part of the attached Bureau of Waste Site Cleanup form (LSP opinion) are based solely upon the services provided to the Client and under the conditions stated herein and in EndPoint's agreement with the Client. Neither EndPoint nor the LSP who signed the LSP opinion shall be liable for the presence of any condition, the discovery of which would have required the performance of services not undertaken by EndPoint or authorized by the Client.
2. In preparing this report, EndPoint may have relied upon certain information obtained by or from state, federal and local agencies; previous consultants or contractors; or the Client. EndPoint did not verify the completeness or accuracy of all information reviewed or received during the course of response actions and cannot itself guarantee or warrant the information provided by non-EndPoint sources.
3. The conclusions and LSP opinion in this report may have been based upon data obtained from a limited number of samples and/or subsurface explorations agreed upon by the Client. Sampling and/or explorations may have been widely spaced in distance and/or time. The adequacy of sample and/or exploration spacing may not become evident until further exploration is conducted. If inadequate sample and/or exploration spacing becomes evident, it will be necessary to re-evaluate the conclusions and LSP opinion of this report.
4. Visual inspections or observations may have been made of the site and site structures as indicated in the report. Where EndPoint was unable to observe or inspect portions of the site or structures, or access was limited or obstructed, EndPoint cannot render a conclusion or LSP opinion regarding the presence of oil and hazardous materials in that portion of the site or structure.
5. Surface and/or ground water levels may have been gauged and used to evaluate distribution, discharge and flow rate. It should be noted that fluctuations in the level or location of water may occur seasonally due to variations in precipitation or other factors different from those present at the time measurements were made. These changes may also cause seasonal variations in water quality measurements as well as variations in the movement and distribution of contaminants in the environment.

6. The conclusions and LSP opinion may be based in part upon various types of field screening and laboratory data, and are contingent upon its validity, accuracy and representativeness. The validity, accuracy and representativeness of these data may have been evaluated in accordance with the Massachusetts Department of Environmental Protection's policy. EndPoint or the LSP who signed the LSP opinion shall not be liable for equipment or laboratory errors that are typically not discovered during this evaluation. Also, it should be noted that variations in environmental conditions such as moisture can affect concentrations or levels of contaminants in the environment.
7. Chemical analyses have been performed for specific chemicals or parameters during the course of response actions as described in the report. EndPoint or the LSP is not liable for the presence of contaminants in environmental media not tested or searched for during the course of response actions.
8. The passage of time may result in changes in technology, regulatory standards, manifestation of latent conditions, or the occurrence of future events which could render the report conclusions or LSP opinion inaccurate, incomplete or inapplicable. Neither EndPoint nor the LSP shall be liable or responsible for the consequences of any changed circumstances or conditions on the accuracy of this report or LSP opinion.
9. Except as required under the Massachusetts Contingency Plan, this response document shall not be used or relied upon by any third-party without the written approval of EndPoint.
10. Should EndPoint or the LSP be required or requested to review additional information or defend a MassDEP audit, or authorize others to use this report after its submission date, EndPoint shall be entitled to additional compensation at then existing rates and terms as may be agreed upon between EndPoint and the Client. Nothing contained herein shall be deemed to require EndPoint or the LSP to undertake any such review or authorize others to use this report.
11. This report and opinion is rendered for the purpose of meeting Massachusetts Contingency Plan response action requirements for the Client, and should not be deemed to be an opinion concerning compliance of any past or present owner or operator of the site with any federal, state and local laws or regulations. Without limiting the generality of the foregoing, no warranty or guarantee is made that all contamination at the site or sources of contamination have been detected or identified, that any action or

recommended action will achieve all of its objectives, or that the report conclusions and LSP opinion, or any action as to which this LSP opinion relates will be upheld by any audit conducted by MassDEP or any other party.

APPENDIX B

RELEASE NOTIFICATION FORM

Pursuant to 310 CMR 40.0371 (Subpart C)

Release Tracking Number
assigned upon receipt and
review by the Department

A. RELEASE OR THREAT OF RELEASE LOCATION:

1. Release Name/Location Aid: 18-24 HARVARD AVENUE
2. Street Address: 18-24 HARVARD AVENUE
3. City/Town: DORCHESTER 4. ZIP Code: 021210000
5. Coordinates: a. Latitude: N 42.30004 b. Longitude: W 71.07589

B. THIS FORM IS BEING USED TO:

1. Submit a **Release Notification** for a 120 day reporting requirement

(All sections of this transmittal form must be filled out)

C. INFORMATION DESCRIBING THE RELEASE:

1. Date and time you obtained knowledge of the Release: Time: AM PM
mm/dd/yyyy hh:mm
2. Date and time release occurred, if known: Time: AM PM
mm/dd/yyyy hh:mm

3. 120 DAY REPORTING CONDITIONS

Check all Notification Thresholds that apply to the Release:
(for more information see 310 CMR 40.0315)

- a. Release of Hazardous Material(s) to Soil or Groundwater Exceeding Reportable Concentration(s)
- b. Release of Oil to Soil Exceeding Reportable Concentration(s) and Affecting More than 2 Cubic Yards
- c. Release of Oil to Groundwater Exceeding Reportable Concentration(s)
- d. Subsurface Non-Aqueous Phase Liquid (NAPL) Equal to or Greater than 1/8 Inch (.01 feet) and Less than 1/2 Inch (.04 feet)

RELEASE NOTIFICATION FORM

Pursuant to 310 CMR 40.0371 (Subpart C)

Release Tracking Number
assigned upon receipt and
review by the Department

C. INFORMATION DESCRIBING THE RELEASE (cont.)

4. List below the Oils (O) or Hazardous Materials (HM) that exceed their Reportable Concentration (RC) or Reportable Quantity (RQ) by the greatest amount.

Check here if an amount or concentration is unknown or less than detectable.

| O or HM Released | CAS Number, if known | O or HM | Amount or Concentration | Units | RCs Exceeded, if Applicable (RCS-1, RCS-2, RCGW-1, RCGW-2) |
|------------------------------|----------------------|---------|-------------------------|-------|--|
| C5-C8 ALIPHATIC HYDROCARBONS | | O | 520 | MG/KG | RCS-1 |
| C9-C10 AROMATIC HYDROCARBONS | | O | 350 | MG/KG | RCS-1 |
| BENZENE | 71-43-2 | O | 3.4 | MG/KG | RCS-1 |
| METHYL TERT BUTYL ETHER | 1634-04-4 | O | 4.4 | MG/KG | RCS-1 |

Check here if a list of additional Oil and Hazardous Materials subject to reporting, or any other documentation relating to this notification is attached.

D. PERSON REQUIRED TO NOTIFY:

1. Name of Organization: EIGHTEEN HARVARD AVENUE LLC

2. Contact First Name: CELESTINO 3. Last Name: TAVARUS

4. Street: 18-24 HARVARD AVENUE 5. Title: _____

6. City/Town: DORCHESTER 7. State: MA 8. ZIP Code: 021210000

9. Telephone: 617-671-9514 10. Ext.: _____ 11. Email: _____

12. Check here if attaching names and addresses of owners of properties affected by the Release, other than an owner who is submitting this Release Notification (required).

E. RELATIONSHIP OF PERSON TO RELEASE:

1. RP or PRP a. Owner b. Operator c. Generator d. Transporter

e. Other RP or PRP Specify: NON-SPECIFIED PRP

2. Fiduciary, Secured Lender or Municipality with Exempt Status (as defined by M.G.L. c. 21E, s. 2)

3. Agency or Public Utility on a Right of Way (as defined by M.G.L. c. 21E, s. 5(j))

4. Any Other Person Otherwise Required to Notify Specify Relationship: _____

EndPoint Project 2588-001

Courtney Ley
Senior Project Scientist
EndPoint, LLC
25 Buttrick Road, Unit D2
Londonderry, NH 03053

RE: Agent for Celestino Tavarus
18-24 Harvard Avenue
Dorchester, MA 02121

Dear Ms. Ley,

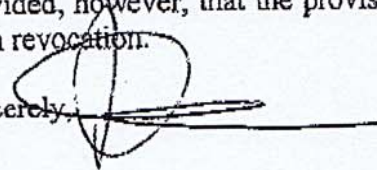

This letter is to serve as written authorization for you to act as an agent for Celestino Tavarus (PRP), in connection with the signing of certain Massachusetts Department of Environmental Protection (MassDEP) Bureau of Waste Site Cleanup (BWSC) forms required by the Massachusetts Contingency Plan (MCP), 310 CMR 40.0000 and/or other State or Federal Law in connection with services provided by EndPoint, LLC (EndPoint) in accordance with 310 CMR 40.0009(2). Said authorization shall be contingent upon the review of each form and associated documents by Celestino Tavarus and his additional written authorization to proceed via e-mail, fax, or other method.

I hereby agree to defend and indemnify EndPoint, its agents, and employees from any claims (including reasonable attorney's fees) arising from making written declarations on behalf of and in my name, so long as the written declarations were made in good faith by EndPoint based on information provided by me.

The Agreement is valid and binding until specifically revoked in writing delivered to EndPoint, provided, however, that the provision of the immediately preceding paragraph shall survive any such revocation.

Sincerely,

Celestino Tavarus

PERMANENT AND TEMPORARY SOLUTION STATEMENT
Pursuant to 310 CMR 40.1000 (Subpart J)

Release Tracking Number
3 - 35126

For sites with multiple RTNs, enter the Primary RTN above.

A. SITE LOCATION:

- 1. Site Name/Location Aid: 18-24 HARVARD AVENUE
- 2. Street Address: 18-24 HARVARD AVENUE
- 3. City/Town: DORCHESTER 4. ZIP Code: 021210000
- 5. Coordinates: a. Latitude: N 42.29996 b. Longitude: W 71.07588
- 6. Check here if the disposal site that is the source of the release is Tier Classified. Check the current Tier Classification Category:
 a. Tier I b. Tier ID c. Tier II

B. THIS FORM IS BEING USED TO: (check all that apply)

- 1. List Submittal Date of the Permanent or Temporary Solution Statement, or RAO Statement (if previously submitted): _____ mm/dd/yyyy
- 2. Submit a **Permanent or Temporary Solution Statement**
 - a. Check here if this Permanent or Temporary Solution Statement covers additional Release Tracking Numbers (RTNs). RTNs that have been previously linked to a Tier Classified Primary RTN do not need to be listed here.
 - b. Provide the additional Release Tracking Number(s) covered by this Permanent or Temporary Solution Statement. - -
- 3. Submit a **Revised Permanent or Temporary Solution Statement** (or revised RAO Statement)
 - a. Check here if this Revised Permanent or Temporary Solution Statement covers additional Release Tracking Numbers (RTNs), not listed on the Permanent or Temporary Solution Statement or previously submitted Revised Permanent or Temporary Solution Statements. RTNs that have been previously linked to a Tier Classified Primary RTN do not need to be listed here.
 - b. Provide the additional Release Tracking Number(s) covered by this Permanent or Temporary Solution Statement. - -
- 4. Submit a **Permanent or Temporary Solution Partial Statement**

Check above box, if any Response Actions remain to be taken to address conditions associated with this disposal site having the Primary RTN listed in the header section of this transmittal form. This Permanent or Temporary Solution Statement will record only a Permanent or Temporary Solution-Partial Statement for that RTN. A final Permanent or Temporary Solution Statement will need to be submitted that references all Permanent or Temporary Solution-Partial Statements and, if applicable, covers any remaining conditions not covered by the Permanent or Temporary Solution-Partial Statements.

Also, specify if you are an Eligible Person or Tenant pursuant to M.G.L. c. 21 s.2, and have no further obligation to conduct response actions on the remaining portion(s) of the disposal site:

 - a. Eligible Person b. Eligible Tenant
- 5. Submit a **Revised Permanent or Temporary Solution Partial Statement** (or revised RAO-Partial Statement)
- 6. Submit an optional **Phase I Completion Statement** supporting the Permanent or Temporary Solution Statement
- 7. Submit a **Periodic Review Opinion evaluating the status of a Temporary Solution**, as specified in 310 CMR 40.1051 (Section F is optional)
- 8. Submit a **Retraction** of a previously submitted **Permanent or Temporary Solution Statement** (or RAO Statement) (Sections E & F are not required)

(All sections of this transmittal form must be filled out unless otherwise noted above)

C. DESCRIPTION OF RESPONSE ACTIONS: (check all that apply; for volumes, list cumulative amounts)

- 1. Assessment and/or Monitoring Only
- 2. Temporary Covers or Caps
- 3. Deployment of Absorbent or Containment Materials
- 4. Treatment of Water Supplies
- 5. Structure Venting System/HVAC Modification System
- 6. Engineered Barrier
- 7. Product or NAPL Recovery
- 8. Fencing and Sign Posting
- 9. Groundwater Treatment Systems
- 10. Soil Vapor Extraction
- 11. Remedial Additives
- 12. Air Sparging
- 13. Active Exposure Pathway Mitigation System
- 14. Passive Exposure Pathway Mitigation System
- 15. Monitored Natural Attenuation
- 16. In-Situ Chemical Oxidation
- 17. Removal of Contaminated Soils

- a. Re-use, Recycling or Treatment
 - i. On Site Estimated volume in cubic yards _____
 - ii. Off Site Estimated volume in cubic yards _____

ii. Facility Name: _____ Town: _____ State: _____

iii. Describe: _____

b. Landfill _____

- i. Cover Estimated volume in cubic yards _____

Facility Name: _____ Town: _____ State: _____

- ii. Disposal Estimated volume in cubic yards _____

Facility Name: _____ Town: _____ State: _____

18. Removal of Drums, Tanks or Containers:

a. Describe Quantity and Amount:

b. Facility Name: _____ Town: _____ State: _____

c. Facility Name: _____ Town: _____ State: _____

19. Removal of Other Contaminated Media:

a. Specify Type and Volume:

b. Facility Name: _____ Town: _____ State: _____

c. Facility Name: _____ Town: _____ State: _____

C. DESCRIPTION OF RESPONSE ACTIONS (cont.): (check all that apply; for volumes, list cumulative amounts)

20. Other Response Actions:

Describe:

21. Use of Innovative Technologies:

Describe:

D. SITE USE:

1. Are the response actions that are the subject of this submittal associated with the *redevelopment, reuse* or the *major expansion of the current use* of property(ies) impacted by the presence of oil and/or hazardous materials?

- a. Yes b. No c. Don't know

2. Is the property a *vacant or under-utilized commercial or industrial* property ("a brownfield property")?

- a. Yes b. No c. Don't know

3. Will funds from a state or federal brownfield incentive program be used on one or more of the property(ies) within the disposal site?

- a. Yes b. No c. Don't know If Yes, identify program(s): _____

4. Has a Covenant Not to Sue been obtained or sought?

- a. Yes b. No c. Don't know

5. Check all applicable categories that apply to the person making this submittal:

- a. Redevelopment Agency or Authority
 b. Community Development Corporation c. Economic Development and Industrial Corporation
 d. Private Developer e. Fiduciary f. Secured Lender g. Municipality
 h. Potential Buyer (non-owner) i. Other, describe: OWNER

This data will be used by MassDEP for information purposes only, and does not represent or create any legal commitment, obligation or liability on the part of the party or person providing this data to MassDEP.

E. PERMANENT OR TEMPORARY SOLUTION CATEGORY:

Specify the category of Solution that applies to the Disposal Site, or Site of the Threat of Release. Select either **1, 2, or 3.**

- 1. Permanent Solution with No Conditions** (check one)
 a. A threat of release has been eliminated.
 b. All contamination has been reduced to Natural Background levels.
 c. A condition of No Significant Risk exists or has been achieved with no Activity and Use Limitation or other limitations, assumptions, or conditions (310 CMR 40.1013).

PERMANENT AND TEMPORARY SOLUTION STATEMENT
Pursuant to 310 CMR 40.1000 (Subpart J)

Release Tracking Number

3 - 35126

For sites with multiple RTNs, enter the Primary RTN above.

E. PERMANENT OR TEMPORARY SOLUTION CATEGORY (cont.):

2. Permanent Solution with Conditions (check a and/or b):

a. **An AUL has been implemented** pursuant to 310 CMR 1012(2) (check one)

i. Required pursuant to 310 CMR 40.1012(2)

Is the AUL required because the Permanent Solution relies on an Active Exposure Pathway Mitigation Measure pursuant to CMR 310 40.1025?

1. Yes 2. No

ii. Optionally implemented pursuant to 310 CMR 40.1012(3)

b. **Limitations or conditions apply** pursuant to 310 CMR 40.1013 (check all that apply):

i. Gardening Best Management Practices (BMPs) for non-commercial gardening in a residential setting

ii. Concentrations of Oil and Hazardous Material consistent with Anthropogenic Background

iii. Residual contamination in a Public or Railroad Right-of-Way

iv. Groundwater contamination would exceed GW-2 Standards except for the absence of an occupied building or structure

3. Temporary Solution (check a or b /and c)

a. Response actions to achieve a Permanent Solution **are not currently feasible**

b. Response actions to achieve a Permanent Solution **are feasible** and are being continued toward a Permanent Solution

c. Does the Temporary Solution rely on an Active Exposure Pathway Mitigation Measure pursuant to 310 CMR 40.1026?

i. Yes ii. No

F. PERMANENT AND TEMPORARY SOLUTION INFORMATION:

1. Specify the Risk Characterization Method(s) used to achieve the Permanent or Temporary Solution, described above:

a. Method 1 b. Method 2 c. Method 3

d. Method Not Applicable-Contamination reduced to or consistent with background, or Threat of Release abated

2. Specify all Soil Category(ies) applicable. More than one Soil Category may apply at a Site. Be sure to check off all **APPLICABLE** categories:

a. S-1/GW-1 d. S-2/GW-1 g. S-3/GW-1 j. Not Applicable

b. S-1/GW-2 e. S-2/GW-2 h. S-3/GW-2

c. S-1/GW-3 f. S-2/GW-3 i. S-3/GW-3

3. Specify all Groundwater Category(ies) impacted. A site may impact more than one Groundwater Category. Be sure to check off all **IMPACTED** categories:

a. GW-1 b. GW-2 c. GW-3 d. No Groundwater Impacted

PERMANENT AND TEMPORARY SOLUTION STATEMENT

Pursuant to 310 CMR 40.1000 (Subpart J)

Release Tracking Number

3 - 35126

F. PERMANENT AND TEMPORARY SOLUTION INFORMATION (cont.):

- 4. Check here if the risk assessment includes any changes to the groundwater category pursuant to 310 CMR 40.0932(5)(a) through (e). Check all conditions that apply:
 - a. An Interim Wellhead Protection Area does not apply based on a hydrogeologic evaluation (310 CMR 40.0932(5)(a))
 - b. Groundwater was determined not to be in a Potentially Productive Aquifer or is not feasible to be developed as a drinking water supply (310 CMR 40.0932(5)(b))
 - c. A Non-Potential Drinking Water Source Area determination was made (310 CMR 40.0932(5)(c))
 - d. Existing private wells were permanently closed (310 CMR 40.0932(5)(d))
 - e. Groundwater is located within a Zone A, but is not hydrogeologically connected to a drinking water supply (310 CMR 40.0932(5)(e))
- 5. Check here if the Permanent or Temporary Solution supports a finding of No Significant Risk for petroleum in a GW-1 area pursuant to 310 CMR 40.0924(2)(b)3.

6. Specify whether remediation was conducted:

- a. Check here if soil remediation was conducted.
- b. Check here if groundwater remediation was conducted.
- c. Check here if other remediation was conducted.

Specify:

7. Specify whether the analytical data used to support the Permanent or Temporary Solution used the Compendium of Analytical Methods (CAM):

- a. CAM used to support all analytical data.
- b. CAM used to support some of the analytical data.
- c. CAM not used.

8. Check here to indicate that the Permanent or Temporary Solution Statement includes a Data Usability Assessment and Data Representativeness Evaluation pursuant to 310 CMR 40.1056.

9. Estimate the number of acres this Permanent or Temporary Solution Statement applies to: 0.68

3. Agency or Public Utility on a Right of Way (as defined by M.G.L. c. 21E, s. 5(j))

4. Any Other Person Making Submittal Specify Relationship: _____

J. REQUIRED ATTACHMENT AND SUBMITTALS:

1. Check here if the Permanent or Temporary Solution on which this opinion is based, if any, are (were) subject to any order(s), permit(s) and/or approval(s) issued by DEP or EPA. If the box is checked, you MUST attach a statement identifying the applicable provisions thereof.

2. Check here to certify that the Chief Municipal Officer and the Local Board of Health have been notified of the submittal of a Permanent or Temporary Solution Statement that relies on the public way/rail right-of-way exemption from the requirements of an AUL.

3. Check here to certify that the Chief Municipal Officer and the Local Board of Health have been notified of the submittal of a Permanent or Temporary Solution Statement with instructions on how to obtain a full copy of the report.

4. Check here to certify that documentation is attached specifying the location of the Site, or the location and boundaries of the Disposal Site subject to this Permanent or Temporary Solution Statement. If submitting a Permanent or Temporary Solution Statement for a PORTION of a Disposal Site, you must document the location and boundaries for both the portion subject to this submittal and, to the extent defined, the entire Disposal Site.

5. Check here to certify that, pursuant to 310 CMR 40.1406, notice was provided to the owner(s) of each property within the disposal site boundaries, or notice was not required because the disposal site boundaries are limited to property owned by the party conducting response actions. (check all that apply)

a. Notice was provided prior to, or concurrent with the submittal of a Phase II Completion Statement to the Department.

b. Notice was provided prior to, or concurrent with the submittal of this Permanent or Temporary Solution Statement to the Department.

c. Notice not required. d. Total number of property owners notified, if applicable: _____

6. Check here if you are submitting one or more AULs. You must submit an AUL Transmittal Form (BWSC113) and a copy of each implemented AUL related to this Permanent Solution or Temporary Solution Statement. Specify the type of AUL(s) below: (required for Permanent Solution with Conditions Statements where an AUL is being implemented)

a. Notice of Activity and Use Limitation b. Number of Notices submitted: _____

c. Grant of Environmental Restriction d. Number of Grants submitted: _____

7. If a Permanent Solution Compliance Fee is required for any of the RTNs listed on this transmittal form, check here to certify that a Permanent Solution Compliance Fee was submitted to DEP, P. O. Box 4062, Boston, MA 02211.

8. Check here if any non-updatable information provided on this form is incorrect, e.g. Site Address/Location Aid. Send corrections to bwsc.edep@state.ma.us.

9. Check here to certify that the LSP Opinion containing the material facts, data, and other information is attached.

RE: Dorchester
18-24 Harvard Avenue
RTN 3-35126

Attention: Celestino Tavarus

**NOTICE OF RESPONSIBILITY PER M.G.L. c.21E & 310 CMR 40.0000, the
MASSACHUSETTS CONTINGENCY PLAN**

*THIS IS AN IMPORTANT NOTICE. FAILURE TO TAKE ADEQUATE ACTION IN RESPONSE
TO THIS NOTICE COULD RESULT IN SERIOUS LEGAL CONSEQUENCES.*

Dear Mr. Tavarus:

Information contained in a Release Notification Form submitted to the Massachusetts Department of Environmental Protection (MassDEP) on August 17, 2018, by Eighteen Harvard Avenue LLC indicates that there is or has been a release of Oil and/or Hazardous Material at the above-referenced property which exceeds a "120 day" reporting threshold (310 CMR 40.0315) and which requires one or more Response Actions.

Based on this information, MassDEP has reason to believe that the subject property or portion(s) thereof is a Disposal Site as defined in the Massachusetts Oil and Hazardous Material Release Prevention and Response Act, M.G.L. c. 21E, and the Massachusetts Contingency Plan, 310 CMR 40.0000 (the MCP). M.G.L. c. 21E and the MCP govern the assessment and cleanup of Disposal Sites.

The purpose of this notice is to inform you of your legal responsibilities under state law for assessing and/or remediating the subject release. For purposes of this notice, the terms and phrases used herein shall have the meaning ascribed to them by the MCP unless the text clearly indicates otherwise.

STATUTORY LIABILITIES

MassDEP has reason to believe that you (as used in this letter, "you" refers to Eighteen Harvard Avenue LLC) are a Potentially Responsible Party with liability under M.G.L. c. 21E, § 5, for Response Action Costs. Section 5 makes the following parties liable to the Commonwealth of Massachusetts: current owners or operators of a site from or at which there is or has been a

120

release/threat of release of oil or hazardous material; any person who owned or operated a site at the time hazardous material was stored or disposed of; any person who arranged for the transport, disposal, storage or treatment of hazardous material to or at a site; any person who transported hazardous material to a transport, disposal, storage or treatment site from which there is or has been a release/threat of release of such material; and any person who otherwise caused or is legally responsible for a release/threat of release of oil or hazardous material at a site.

This liability is "strict", meaning it is not based on fault, but solely on your status as an owner, operator, generator, transporter or disposer. It is also joint and several, meaning that you may be liable for all Response Action Costs incurred at the site, regardless of the existence of any other liable parties.

The MCP requires Responsible Parties to take necessary Response Actions at properties where there is or has been a release or threat of release of oil and/or hazardous material. If you do not take the necessary Response Actions, or fail to perform them in an appropriate and timely manner, MassDEP is authorized by M.G.L. c. 21E to have the work performed by its contractors. By taking such Response Actions, you can avoid liability for Response Action Costs incurred by MassDEP and its contractors in performing these actions, and for possible sanctions, which may be imposed for failure to perform necessary Response Actions under the MCP.

You may be liable for up to three (3) times all Response Action Costs incurred by MassDEP. Response Action Costs include, without limitation, the cost of direct hours spent by MassDEP employees arranging for response actions or overseeing work performed by persons other than MassDEP or its contractors, expenses incurred by MassDEP in support of those direct hours, and payments to MassDEP's contractors. (For more detail on cost liability, see 310 CMR 40.1200.)

MassDEP may also assess interest on costs incurred at the rate of twelve percent (12%), compounded annually. To secure payment of this debt, the Commonwealth may place liens on all of your property in the Commonwealth. To recover the debt, the Commonwealth may foreclose on these liens or the Attorney General may bring legal action against you.

In addition to your liability for up to three (3) times all Response Action Costs incurred by MassDEP, you may also be liable to the Commonwealth for damages to natural resources caused by the release. Civil and criminal liability may also be imposed under M.G.L. c. 21E, § 11, and civil administrative penalties may be imposed under M.G.L. c. 21A, § 16 for each violation of M.G.L. c. 21E, the MCP, or any order, permit or approval issued thereunder.

NECESSARY RESPONSE ACTIONS

The subject site shall not be deemed to have all the necessary and required Response Actions taken unless and until all Substantial Hazards presented by the site have been eliminated and a level of No Significant Risk exists or has been achieved in compliance with M.G.L. c. 21E and the MCP. In addition, the MCP requires persons undertaking Response Actions at Disposal Sites to perform Immediate Response Actions (IRAs) in response to "sudden releases", Imminent Hazards and Substantial Release Migration. Such persons must continue to evaluate the need for IRAs and notify MassDEP immediately if such a need exists.

Notice of Responsibility

Page 3

You must employ or engage a Licensed Site Professional (LSP) to manage, supervise or actually perform the necessary Response Actions at the subject Site. In addition, the MCP requires persons undertaking response actions at a Disposal Site to submit to MassDEP a Permanent Solution Statement prepared by an LSP in accordance with 310 CMR 40.1000 upon determining that a level of No Significant Risk already exists or has been achieved at a Disposal Site or portion thereof. [You may obtain a list of the names and addresses of these licensed professionals from the Board of Registration of Hazardous Waste Site Cleanup Professionals at <http://www.mass.gov/eea/agencies/lsp/> or (617) 556-1091.]

MassDEP has determined that initial site investigation activities, in accordance with 310 CMR 40.0405, are necessary. In addition, unless a Permanent Solution Statement is submitted earlier, a completed Tier Classification Submittal pursuant to 310 CMR 40.0510, must be submitted to MassDEP within one year of the initial notice of a release provided to MassDEP pursuant to 310 CMR 40.0300 or from the date MassDEP issues a Notice of Responsibility, whichever occurs earlier.

It is important to note that you must dispose of any Remediation Waste generated at the subject Site in accordance with 310 CMR 40.0030 including, without limitation, contaminated soil and/or debris. Any Bill of Lading accompanying such waste must bear the seal and signature of an LSP or, if the response action is performed under the direct supervision of MassDEP, the signature of an authorized representative of MassDEP.

MassDEP encourages parties with liabilities under M.G.L. c. 21E to take prompt action in response to releases and threats of release of Oil and/or Hazardous Material. By taking prompt action, you may significantly lower your assessment and cleanup costs and avoid the imposition of, or reduce the amount of Annual Compliance Fees for Response Actions payable under 310 CMR 4.00.

If you have any questions relative to this notice, you should contact Ida Babroudi at the letterhead address or (978) 694-3386. All future communications regarding this release must reference the Release Tracking Number **RTN 3-35126** contained in the subject block of this letter.

Very truly yours,

Ida Babroudi
Environmental Engineer
Bureau of Waste Site Cleanup
MassDEP, Northeast Regional Office

cc: Public Health Commission, City of **Boston**, Mr. Leon Bethune,

APPENDIX C

August 23, 2019

Project No.: 2588-001

Mayor Martin J. Walsh
City of Boston
1 City Hall Square, Suite 500
Boston, MA 02201-2013

RE: Notice of Availability of Report under the Massachusetts Contingency Plan
18-24 Harvard Avenue, Dorchester
MassDEP Release Tracking Number: 3-35126

Mayor Walsh:

On behalf of Eighteen Harvard Avenue LLC, this letter serves to notify you that a Permanent Solution Statement with No Conditions report has been filed with the MassDEP. This notification letter is being sent to you as required by the Massachusetts Contingency Plan, 310 CMR 40.0000 under subsection 40.1403. A copy of the disposal site boundary map is attached for your reference. You can view the Permanent Solution Statement report by accessing the MassDEP's file viewer website on-line at http://eeaonline.eea.state.ma.us/DEP/wsc_viewer/main.aspx and entering Release Tracking Number 3-35126. No other action is required of you.

During the conduct of a Phase II ESA, a "120-day" reportable condition was identified at the Site due to the discovery of petroleum-related compounds in the soil and groundwater at concentrations greater than applicable MCP Reporting Category RCS-1 and RCGW-2 standards. The condition was attributed to a historic release(s) of petroleum from two former USTs located below the building. Subsequently, EndPoint conducted a Phase I Initial Site Investigation to assess the nature and extent of the petroleum release which included drilling additional soil borings, installing additional monitoring wells intrusion pathway into the building. Potential risks to human health, safety, public welfare, and the environment were characterized for current use, and potential future use as a residential property, using remaining soil concentrations.

Based on the results of the Method 3 Risk Characterization, No Significant Risk exists with respect to human health, safety, public welfare, and the environment at the Disposal Site. For the reasons presented below, a Permanent Solution with No Conditions has been achieved for the Disposal Site.

New Hampshire Office
25 Buttrick Road, Unit D-2

EndPoint Project 2588-001
18-24 Harvard Ave., Dorchester
MassDEP RTN 3-35126
8/23/19
Page 2

- A level of No Significant Risk has been achieved for current and foreseeable future uses, including residential use without the need for an Activity and Use Limitation to maintain a level of No Significant Risk.
- The data set used for the risk characterization is usable and representative of Site conditions.
- It has been demonstrated that it is infeasible to further reduce environmental media impacts to background in accordance with MassDEP policy.

Please call me if you have questions regarding this letter at (603) 965-3810.

Sincerely,
EndPoint, LLC

Scott Wozniakowski
Project Manager

APPENDIX F

Friday, March 02, 2018

Courtney Ley

Endpoint

25 Buttrick Rd Unit D2

Londonderry NH 03053

Project Name: Boston Body Shop

Lab ID: 18020225

Project #: 2588-001

Date Received: 2/23/2018

Project Location: 18-24 Harvard Ave Dorchester

Control #: 18020225

Dear Courtney Ley

Enclosed please find the laboratory results for the above referenced samples that were received by the ChemServe sample custodian on the above referenced date. Any abnormalities to the samples upon receipt would be noted on the enclosed chain of custody document. This report is not valid without a completed chain of custody with the corresponding control number, attached.

All samples analyzed by ChemServe are subject to quality standards. These standards are as stringent or more stringent than those established under NELAC, 40 CFR Part 136, state certification programs, and corresponding methodologies. ChemServe has a written QA/QC Procedures Manual that outlines these standards, and is available for your reference, upon request. Unless otherwise stated on the Chain of Custody or within the report, all holding times, preservation techniques, container types, and analytical methods are analogous with those outlined by NELAC. All units are based on "as received" weight unless denoted "dry".

Residual chlorine, sulfite and pH are intended to be performed as an immediate field analysis. Should any of these analyses be performed in the lab instead of in the field it will result in those analyses being performed out of holding time.

I certify that I have reviewed the above referenced analytical data and state forms, and I have found this report within compliance with the procedures outlined within NELAC. ChemServe's certified parameter list can be found at <http://www.chemservelab.com/Laboratory-Information-and-Documentation.aspx>

Sample Receiving and Comment Summary

| | |
|---|-----|
| Were samples submitted with a chain of custody? | Yes |
| Do all samples received match the chain of custody? | Yes |
| Were all samples received within applicable holding times? | Yes |
| Were all containers intact when received? | Yes |
| Were samples for volatile organic analysis free of headspace (per method)? | N/A |
| Was there evidence of cooling or were samples received on the same day as collection? | Yes |
| If the sample pH was not correct was it adjusted where applicable? | Yes |
| Were samples for dissolved metals already filtered by the client or field sampling? | N/A |
| Were Samples for O-phos filtered in the field? | N/A |
| Were samples received in the appropriate containers? | Yes |
| Were samples submitted with a chain of custody? | Yes |

Qualifier: Description:

| | |
|-----|--|
| B- | Method blank contaminated with target analyte. |
| B1- | BOD had total oxygen loss. Result reported as ">" the highest dilution. |
| B2- | BOD had no oxygen loss. Result reported as "<" the lowest dilution. |
| G- | Reporting limit elevated due to matrix interference. |
| H- | Method prescribed holding time exceeded. |
| J- | Indicates an estimated value. Value is less than the quantitation limit. |
| IL- | Internal Standard(s) recovery was low due to matrix. Result may be biased high. |
| IH- | Internal Standard(s) recovery was high due to matrix. Result may be biased low. |
| LH- | Laboratory control spike(s) was high. Results may be biased high. |
| LL- | Laboratory control spike(s) was low. Results may be biased low. |
| MH- | Matrix spike recovery high due to matrix. Results may be biased high. |
| ML- | Matrix spike recovery low due to matrix. Results may be biased low. |
| N- | Non-target compound. Reported as a TIC. |
| NC- | Spike recovery was not calculated due to the concentration of the analyte being >4 times the concentration of the spike added. |
| R- | RPD outside acceptable recovery limits. |
| RO- | Sample received out of holding time. |
| SH- | Surrogate recovery high due to matrix |
| SL- | Surrogate recovery low due to matrix |
| U- | BOD/CBOD blank had an oxygen depletion greater than the suggested amount of 0.200. |
| V- | Sample pH for analysis was not within the required range when checked at time of analysis. |
| Z | Too numerous to count (TNTC) |

An "A" in the result column on the report indicates absent for presence/absent bacteria and a "P" indicates present for presence/absent bacteria.

Lab ID: 19030292
Date Received: 3/29/2019

Dear Scott Wozniakowski

Enclosed please find the laboratory results for the above referenced samples that were received by the ChemServe sample custodian on the above referenced date. Any abnormalities to the samples upon receipt would be noted on the enclosed chain of custody document. This report is not valid without a completed chain of custody with the corresponding control number, attached.

All samples analyzed by ChemServe are subject to quality standards. These standards are as stringent or more stringent than those established under NELAC, 40 CFR Part 136, state certification programs, and corresponding methodologies. ChemServe has a written QA/QC Procedures Manual that outlines these standards, and is available for your reference, upon request. Unless otherwise stated on the Chain of Custody or within the report, all holding times, preservation techniques, container types, and analytical methods are analogous with those outlined by NELAC. All units are based on "as received" weight unless denoted "dry".

Residual chlorine, sulfite and pH are intended to be performed as an immediate field analysis. Should any of these analyses be performed in the lab instead of in the field it will result in those analyses being performed out of holding time.

I certify that I have reviewed the above referenced analytical data and state forms, and I have found this report within compliance with the procedures outlined within NELAC. ChemServe's certified parameter list can be found at <http://www.chemservelab.com/Laboratory-Information-and-Documentation.aspx>

Jay Chrystal - President/Laboratory Director

MADEP MCP Analytical Method Report Certification and Case Narrative

| <i>An Affirmative response to questions A through F are required for "Presumptive Certainty" status</i> | | Yes | No |
|--|---|----------|----------|
| A | Were all samples received in a condition consistent with those described on the chain of custody including proper preservation, lab and field temperatures plus prepared and analyzed within holding times? | X | |
| B | Were all analytical method(s) and associated QC requirements specified in the selected CAM protocols followed? | X | |
| C | Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances? | X | |
| D | Does the laboratory report comply with all the reporting requirements specified in CAM VIIA "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data"? | X | |
| E | EPH & VPH methods only: Was each method conducted without significant modification(s)? | X | |
| F | Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative including all negative responses to questions A-F? | X | |
| <i>Responses to questions G, H & I are required for "Presumptive Certainty" status</i> | | | |
| G | Were all the reporting limits at or below all CAM reporting limits specified in the selected CAM protocols? | X | |
| <i>Data User Note: Data that achieve "Presumptive Certainty" status may not meet the data usability and representativeness requirements described in 310 CMR 40.1056 (2)(K) and WSC-07-350</i> | | | |
| H | Were all QC performance standards specified in the CAM protocol(s) achieved? | | X |
| I | Were results reported for the complete analyte list specified in the selected CAM protocols? | X | |

Case Narrative Section

Inorganic / Metals Analysis Discussion: N/A

Pesticide / PCB Analysis Discussion: N/A

EPH / Semi-volatiles Discussion: Data flagged for compound with high RPD between LCS/LCSD. Spiked recoveries acceptable. One surrogate with low recovery; remaining surrogates acceptable.

VPH / Volatiles Discussion: N/A

Qualifier: Description:

- B- Method blank contaminated with target analyte.
- B1- BOD had total oxygen loss. Result reported as ">"the highest dilution.
- B2- BOD had no oxygen loss. Result reported as "<" the lowest dilution.
- G- Reporting limit elevated due to matrix interference.
- H- Method prescribed holding time exceeded.
- J- Indicates an estimated value. Value is less than the quantitation limit.
- IL- Internal Standard(s) recovery was low due to matrix. Result may be biased high.
- IH- Internal Standard(s) recovery was high due to matrix. Result may be biased low.
- LH- Laboratory control spike(s) was high. Results may be biased high.
- LL- Laboratory control spike(s) was low. Results may be biased low.
- MH- Matrix spike recovery high due to matrix. Results may be biased high.
- ML- Matrix spike recovery low due to matrix. Results may be biased low.
- N- Non-target compound. Reported as a TIC.
- NC- Spike recovery was not calculated due to the concentration of the analyte being >4 times the concentration of the spike added.
- R- RPD outside acceptable recovery limits.
- RO- Sample received out of holding time.
- SH- Surrogate recovery high due to matrix
- SL- Surrogate recovery low due to matrix
- U- BOD/CBOD blank had an oxygen depletion greater than the suggested amount of 0.200.
- V- Sample pH for analysis was not within the required range when checked at time of analysis.
- Z Too numerous to count (TNTC)

An "A" in the result column on the report indicates absent for presence/absent bacteria and a "P" indicates present for presence/absent bacteria.

Dear Scott Wozniakowski

Enclosed please find the laboratory results for the above referenced samples that were received by the ChemServe sample custodian on the above referenced date. Any abnormalities to the samples upon receipt would be noted on the enclosed chain of custody document. This report is not valid without a completed chain of custody with the corresponding control number, attached.

All samples analyzed by ChemServe are subject to quality standards. These standards are as stringent or more stringent than those established under NELAC, 40 CFR Part 136, state certification programs, and corresponding methodologies. ChemServe has a written QA/QC Procedures Manual that outlines these standards, and is available for your reference, upon request. Unless otherwise stated on the Chain of Custody or within the report, all holding times, preservation techniques, container types, and analytical methods are analogous with those outlined by NELAC. All units are based on "as received" weight unless denoted "dry".

Residual chlorine, sulfite and pH are intended to be performed as an immediate field analysis. Should any of these analyses be performed in the lab instead of in the field it will result in those analyses being performed out of holding time.

I certify that I have reviewed the above referenced analytical data and state forms, and I have found this report within compliance with the procedures outlined within NELAC. ChemServe's certified parameter list can be found at <http://www.chemservelab.com/Laboratory-Information-and-Documentation.aspx>

Jay Chrystal - President/Laboratory Director

| <i>An Affirmative response to questions A through F are required for "Presumptive Certainty" status</i> | | Yes | No |
|--|---|----------|----|
| A | Were all samples received in a condition consistent with those described on the chain of custody including proper preservation, lab and field temperatures plus prepared and analyzed within holding times? | X | |
| B | Were all analytical method(s) and associated QC requirements specified in the selected CAM protocols followed? | X | |
| C | Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances? | X | |
| D | Does the laboratory report comply with all the reporting requirements specified in CAM VIIA "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data"? | X | |
| E | EPH & VPH methods only: Was each method conducted without significant modification(s)? | X | |
| F | Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative including all negative responses to questions A-F? | X | |
| <i>Responses to questions G, H & I are required for "Presumptive Certainty" status</i> | | | |
| G | Were all the reporting limits at or below all CAM reporting limits specified in the selected CAM protocols? | X | |
| <i>Data User Note: Data that achieve "Presumptive Certainty" status may not meet the data usability and representativeness requirements described in 310 CMR 40.1056 (2)(K) and WSC-07-350</i> | | | |
| H | Were all QC performance standards specified in the CAM protocol(s) achieved? | X | |
| I | Were results reported for the complete analyte list specified in the selected CAM protocols? | X | |

Sample Receiving and Comment Summary

| | |
|---|-----|
| Were samples submitted with a chain of custody? | Yes |
| Do all samples received match the chain of custody? | Yes |
| Were all samples received within applicable holding times? | Yes |
| Were all containers intact when received? | Yes |
| Were samples for volatile organic analysis free of headspace (per method)? | N/A |
| Was there evidence of cooling if not submitted the same day as sampling? | Yes |
| If the sample pH was not correct was it adjusted where applicable? | Yes |
| Were samples for dissolved metals already filtered by the client or field sampling? | N/A |
| Were Samples for O-phos filtered in the field? | N/A |
| Were samples received in the appropriate containers? | Yes |
| Where applicable; were chemical and micro samples received at correct temps. | N/A |

| Qualifier: | Description: |
|------------|--|
| B- | Method blank contaminated with target analyte. |
| B1- | BOD had total oxygen loss. Result reported as ">" the highest dilution. |
| B2- | BOD had no oxygen loss. Result reported as "<" the lowest dilution. |
| G- | Reporting limit elevated due to matrix interference. |
| H- | Method prescribed holding time exceeded. |
| J- | Indicates an estimated value. Value is less than the quantitation limit. |
| IL- | Internal Standard(s) recovery was low due to matrix. Result may be biased high. |
| IH- | Internal Standard(s) recovery was high due to matrix. Result may be biased low. |
| LH- | Laboratory control spike(s) was high. Results may be biased high. |
| LL- | Laboratory control spike(s) was low. Results may be biased low. |
| MH- | Matrix spike recovery high due to matrix. Results may be biased high. |
| ML- | Matrix spike recovery low due to matrix. Results may be biased low. |
| N- | Non-target compound. Reported as a TIC. |
| NC- | Spike recovery was not calculated due to the concentration of the analyte being >4 times the concentration of the spike added. |
| R- | RPD outside acceptable recovery limits. |
| RO- | Sample received out of holding time. |
| SH- | Surrogate recovery high due to matrix |
| SL- | Surrogate recovery low due to matrix |
| U- | BOD/CBOD blank had an oxygen depletion greater than the suggested amount of 0.200. |
| V- | Sample pH for analysis was not within the required range when checked at time of analysis. |
| Z | Too numerous to count (TNTC) |

An "A" in the result column on the report indicates absent for presence/absent bacteria and a "P" indicates present for presence/absent bacteria.

APPENDIX G

Tuesday, March 20, 2018

Courtney Ley

Endpoint

25 Buttrick Rd Unit D2

Londonderry NH 03053

Project Name: 20 Harvard St

Lab ID: 18030058

Project #: 2588-001

Date Received: 3/7/2018

Project Location: Dorchester MA

Control #: 18030058

Dear Courtney Ley

Enclosed please find the laboratory results for the above referenced samples that were received by the ChemServe sample custodian on the above referenced date. Any abnormalities to the samples upon receipt would be noted on the enclosed chain of custody document. This report is not valid without a completed chain of custody with the corresponding control number, attached.

All samples analyzed by ChemServe are subject to quality standards. These standards are as stringent or more stringent than those established under NELAC, 40 CFR Part 136, state certification programs, and corresponding methodologies. ChemServe has a written QA/QC Procedures Manual that outlines these standards, and is available for your reference, upon request. Unless otherwise stated on the Chain of Custody or within the report, all holding times, preservation techniques, container types, and analytical methods are analogous with those outlined by NELAC. All units are based on "as received" weight unless denoted "dry".

Residual chlorine, sulfite and pH are intended to be performed as an immediate field analysis. Should any of these analyses be performed in the lab instead of in the field it will result in those analyses being performed out of holding time.

I certify that I have reviewed the above referenced analytical data and state forms, and I have found this report within compliance with the procedures outlined within NELAC. ChemServe's certified parameter list can be found at <http://www.chemservelab.com/Laboratory-Information-and-Documentation.aspx>

Jay Chrystal - President/Laboratory Director

MADEP MCP Analytical Method Report Certification and Case Narrative

| | |
|---------------------------------|---------------------------------|
| Job Name: 20 Harvard St. | Lab Number: 18030058 |

| MCP SW-846 | 8260C (x) | 8270D () | 8082A () | 8081A () | 7470/7471 () | 9014 () |
| Methods Used | 8151A () | EPH () | VPH (x) | 6010C () | 7000 series () | 7196 () |

| <i>An Affirmative response to questions A through F are required for "Presumptive Certainty" status</i> | | Yes | No |
|--|---|----------|----------|
| A | Were all samples received in a condition consistent with those described on the chain of custody including proper preservation, lab and field temperatures plus prepared and analyzed within holding times? | X | |
| B | Were all analytical method(s) and associated QC requirements specified in the selected CAM protocols followed? | X | |
| C | Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances? | X | |
| D | Does the laboratory report comply with all the reporting requirements specified in CAM VIIA "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data"? | X | |
| E | EPH & VPH methods only: Was each method conducted without significant modification(s)? | X | |
| F | Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative including all negative responses to questions A-F? | X | |
| <i>Responses to questions G, H & I are required for "Presumptive Certainty" status</i> | | | |
| G | Were all the reporting limits at or below all CAM reporting limits specified in the selected CAM protocols? | X | |
| <i>Data User Note: Data that achieve "Presumptive Certainty" status may not meet the data usability and representativeness requirements described in 310 CMR 40.1056 (2)(K) and WSC-07-350</i> | | | |
| H | Were all QC performance standards specified in the CAM protocol(s) achieved? | | X |
| I | Were results reported for the complete analyte list specified in the selected CAM protocols? | X | |

Case Narrative Section

Inorganic / Metals Analysis Discussion: N/A

Pesticide / PCB Analysis Discussion: N/A

EPH / Semi-volatiles Discussion: N/A

VPH / Volatiles Discussion: Some compounds with high RPD in LCS/LCSD. Spike recoveries acceptable.

Sample Receiving and Comment Summary

| | |
|---|-----|
| Were samples submitted with a chain of custody? | Yes |
| Do all samples received match the chain of custody? | Yes |
| Were all samples received within applicable holding times? | Yes |
| Were all containers intact when received? | Yes |
| Were samples for volatile organic analysis free of headspace (per method)? | Yes |
| Was there evidence of cooling or were samples received on the same day as collection? | Yes |
| If the sample pH was not correct was it adjusted where applicable? | Yes |
| Were samples for dissolved metals already filtered by the client or field sampling? | N/A |
| Were Samples for O-phos filtered in the field? | N/A |
| Were samples received in the appropriate containers? | Yes |
| Were samples submitted with a chain of custody? | Yes |

Qualifier: Description:

| | |
|-----|--|
| B- | Method blank contaminated with target analyte. |
| B1- | BOD had total oxygen loss. Result reported as ">"the highest dilution. |
| B2- | BOD had no oxygen loss. Result reported as "<" the lowest dilution. |
| G- | Reporting limit elevated due to matrix interference. |
| H- | Method prescribed holding time exceeded. |
| J- | Indicates an estimated value. Value is less than the quantitation limit. |
| IL- | Internal Standard(s) recovery was low due to matrix. Result may be biased high. |
| IH- | Internal Standard(s) recovery was high due to matrix. Result may be biased low. |
| LH- | Laboratory control spike(s) was high. Results may be biased high. |
| LL- | Laboratory control spike(s) was low. Results may be biased low. |
| MH- | Matrix spike recovery high due to matrix. Results may be biased high. |
| ML- | Matrix spike recovery low due to matrix. Results may be biased low. |
| N- | Non-target compound. Reported as a TIC. |
| NC- | Spike recovery was not calculated due to the concentration of the analyte being >4 times the concentration of the spike added. |
| R- | RPD outside acceptable recovery limits. |
| RO- | Sample received out of holding time. |
| SH- | Surrogate recovery high due to matrix |
| SL- | Surrogate recovery low due to matrix |
| U- | BOD/CBOD blank had an oxygen depletion greater than the suggested amount of 0.200. |
| V- | Sample pH for analysis was not within the required range when checked at time of analysis. |
| Z | Too numerous to count (TNTC) |

An "A" in the result column on the report indicates absent for presence/absent bacteria and a "P" indicates present for presence/absent bacteria.

Londonderry NH 03053

Project Name: Harvard Ave
Project #: 2588-001
Project Location: Dorchester MA
Control #: 19040154

Lab ID: 19040154

Date Received: 4/10/2019

Dear Scott Wozniakowski

Enclosed please find the laboratory results for the above referenced samples that were received by the ChemServe sample custodian on the above referenced date. Any abnormalities to the samples upon receipt would be noted on the enclosed chain of custody document. This report is not valid without a completed chain of custody with the corresponding control number, attached.

All samples analyzed by ChemServe are subject to quality standards. These standards are as stringent or more stringent than those established under NELAC, 40 CFR Part 136, state certification programs, and corresponding methodologies. ChemServe has a written QA/QC Procedures Manual that outlines these standards, and is available for your reference, upon request. Unless otherwise stated on the Chain of Custody or within the report, all holding times, preservation techniques, container types, and analytical methods are analogous with those outlined by NELAC. All units are based on "as received" weight unless denoted "dry".

Residual chlorine, sulfite and pH are intended to be performed as an immediate field analysis. Should any of these analyses be performed in the lab instead of in the field it will result in those analyses being performed out of holding time.

I certify that I have reviewed the above referenced analytical data and state forms, and I have found this report within compliance with the procedures outlined within NELAC. ChemServe's certified parameter list can be found at <http://www.chemservelab.com/Laboratory-Information-and-Documentation.aspx>

Jay Chrystal - President/Laboratory Director

| <i>An Affirmative response to questions A through F are required for "Presumptive Certainty" status</i> | | Yes | No |
|--|---|----------|----|
| A | Were all samples received in a condition consistent with those described on the chain of custody including proper preservation, lab and field temperatures plus prepared and analyzed within holding times? | X | |
| B | Were all analytical method(s) and associated QC requirements specified in the selected CAM protocols followed? | X | |
| C | Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances? | X | |
| D | Does the laboratory report comply with all the reporting requirements specified in CAM VIIA "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data"? | X | |
| E | EPH & VPH methods only: Was each method conducted without significant modification(s)? | X | |
| F | Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative including all negative responses to questions A-F? | X | |
| <i>Responses to questions G, H & I are required for "Presumptive Certainty" status</i> | | | |
| G | Were all the reporting limits at or below all CAM reporting limits specified in the selected CAM protocols? | X | |
| <i>Data User Note: Data that achieve "Presumptive Certainty" status may not meet the data usability and representativeness requirements described in 310 CMR 40.1056 (2)(K) and WSC-07-350</i> | | | |
| H | Were all QC performance standards specified in the CAM protocol(s) achieved? | X | |
| I | Were results reported for the complete analyte list specified in the selected CAM protocols? | X | |

Sample Receiving and Comment Summary

| | |
|---|-----|
| Were samples submitted with a chain of custody? | Yes |
| Do all samples received match the chain of custody? | Yes |
| Were all samples received within applicable holding times? | Yes |
| Were all containers intact when received? | Yes |
| Were samples for volatile organic analysis free of headspace (per method)? | N/A |
| Was there evidence of cooling if not submitted the same day as sampling? | Yes |
| If the sample pH was not correct was it adjusted where applicable? | Yes |
| Were samples for dissolved metals already filtered by the client or field sampling? | N/A |
| Were Samples for O-phos filtered in the field? | N/A |
| Were samples received in the appropriate containers? | Yes |
| Where applicable; were chemical and micro samples received at correct temps. | Yes |

Qualifier: Description:

- B- Method blank contaminated with target analyte.
- B1- BOD had total oxygen loss. Result reported as ">"the highest dilution.
- B2- BOD had no oxygen loss. Result reported as "<" the lowest dilution.
- G- Reporting limit elevated due to matrix interference.
- H- Method prescribed holding time exceeded.
- J- Indicates an estimated value. Value is less than the quantitation limit.
- IL- Internal Standard(s) recovery was low due to matrix. Result may be biased high.
- IH- Internal Standard(s) recovery was high due to matrix. Result may be biased low.
- LH- Laboratory control spike(s) was high. Results may be biased high.
- LL- Laboratory control spike(s) was low. Results may be biased low.
- MH- Matrix spike recovery high due to matrix. Results may be biased high.
- ML- Matrix spike recovery low due to matrix. Results may be biased low.
- N- Non-target compound. Reported as a TIC.
- NC- Spike recovery was not calculated due to the concentration of the analyte being >4 times the concentration of the spike added.
- R- RPD outside acceptable recovery limits.
- RO- Sample received out of holding time.
- SH- Surrogate recovery high due to matrix
- SL- Surrogate recovery low due to matrix
- U- BOD/CBOD blank had an oxygen depletion greater than the suggested amount of 0.200.
- V- Sample pH for analysis was not within the required range when checked at time of analysis.
- Z Too numerous to count (TNTC)

An "A" in the result column on the report indicates absent for presence/absent bacteria and a "P" indicates present for presence/absent bacteria.

Lab ID: 19050227

Project #: 2588-001

Date Received: 5/14/2019

Project Location: 18-24 Harvard Ave Dorchester

Control #: 19050227

Dear Sean Hanjra/ Scott W

Enclosed please find the laboratory results for the above referenced samples that were received by the ChemServe sample custodian on the above referenced date. Any abnormalities to the samples upon receipt would be noted on the enclosed chain of custody document. This report is not valid without a completed chain of custody with the corresponding control number, attached.

All samples analyzed by ChemServe are subject to quality standards. These standards are as stringent or more stringent than those established under NELAC, 40 CFR Part 136, state certification programs, and corresponding methodologies. ChemServe has a written QA/QC Procedures Manual that outlines these standards, and is available for your reference, upon request. Unless otherwise stated on the Chain of Custody or within the report, all holding times, preservation techniques, container types, and analytical methods are analogous with those outlined by NELAC. All units are based on "as received" weight unless denoted "dry".

Residual chlorine, sulfite and pH are intended to be performed as an immediate field analysis. Should any of these analyses be performed in the lab instead of in the field it will result in those analyses being performed out of holding time.

Acrolein and 2-chloroethylvinyl ether require an additional analysis with an un-preserved sample. If unpreserved vials were not submitted for these additional analysis then acrolein and 2-CEVE are reported as estimated due to not meeting method requirements for EPA 624.1 or EPA 524.2.

I certify that I have reviewed the above referenced analytical data and state forms, and I have found this report within compliance with the procedures outlined within NELAC. ChemServe's certified parameter list can be found at <http://www.chemservelab.com/Laboratory-Information-and-Documentation.aspx>

Jay Chrystal - President/Laboratory Director

| <i>An Affirmative response to questions A through F are required for "Presumptive Certainty" status</i> | | Yes | No |
|--|---|----------|----|
| A | Were all samples received in a condition consistent with those described on the chain of custody including proper preservation, lab and field temperatures plus prepared and analyzed within holding times? | X | |
| B | Were all analytical method(s) and associated QC requirements specified in the selected CAM protocols followed? | X | |
| C | Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances? | X | |
| D | Does the laboratory report comply with all the reporting requirements specified in CAM VIIA "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data"? | X | |
| E | EPH & VPH methods only: Was each method conducted without significant modification(s)? | X | |
| F | Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative including all negative responses to questions A-F? | X | |
| <i>Responses to questions G, H & I are required for "Presumptive Certainty" status</i> | | | |
| G | Were all the reporting limits at or below all CAM reporting limits specified in the selected CAM protocols? | X | |
| <i>Data User Note: Data that achieve "Presumptive Certainty" status may not meet the data usability and representativeness requirements described in 310 CMR 40.1056 (2)(K) and WSC-07-350</i> | | | |
| H | Were all QC performance standards specified in the CAM protocol(s) achieved? | X | |
| I | Were results reported for the complete analyte list specified in the selected CAM protocols? | X | |

Sample Receiving and Comment Summary

| | |
|---|-----|
| Were samples submitted with a chain of custody? | Yes |
| Do all samples received match the chain of custody? | Yes |
| Were all samples received within applicable holding times? | Yes |
| Were all containers intact when received? | Yes |
| Were samples for volatile organic analysis free of headspace (per method)? | N/A |
| Was there evidence of cooling if not submitted the same day as sampling? | Yes |
| If the sample pH was not correct was it adjusted where applicable? | Yes |
| Were samples for dissolved metals already filtered by the client or field sampling? | N/A |
| Were Samples for O-phos filtered in the field? | N/A |
| Were samples received in the appropriate containers? | Yes |
| Where applicable; were chemical and micro samples received at correct temps. | Yes |

Qualifier: Description:

- B- Method blank contaminated with target analyte.
- B1- BOD had total oxygen loss. Result reported as ">"the highest dilution.
- B2- BOD had no oxygen loss. Result reported as "<" the lowest dilution.
- G- Reporting limit elevated due to matrix interference.
- H- Method prescribed holding time exceeded.
- J- Indicates an estimated value. Value is less than the quantitation limit.
- IL- Internal Standard(s) recovery was low due to matrix. Result may be biased high.
- IH- Internal Standard(s) recovery was high due to matrix. Result may be biased low.
- LH- Laboratory control spike(s) was high. Results may be biased high.
- LL- Laboratory control spike(s) was low. Results may be biased low.
- MH- Matrix spike recovery high due to matrix. Results may be biased high.
- ML- Matrix spike recovery low due to matrix. Results may be biased low.
- N- Non-target compound. Reported as a TIC.
- NC- Spike recovery was not calculated due to the concentration of the analyte being >4 times the concentration of the spike added.
- R- RPD outside acceptable recovery limits.
- RO- Sample received out of holding time.
- SH- Surrogate recovery high due to matrix
- SL- Surrogate recovery low due to matrix
- U- BOD/CBOD blank had an oxygen depletion greater than the suggested amount of 0.200.
- V- Sample pH for analysis was not within the required range when checked at time of analysis.
- Z Too numerous to count (TNTC)

An "A" in the result column on the report indicates absent for presence/absent bacteria and a "P" indicates present for presence/absent bacteria.

Date Received: 7/17/2019

Project Location: 18-24 Harvard Ave Dorchester MA

Control #: 116410

Dear J. Barr/ S. Wozniakowski

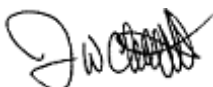

Enclosed please find the laboratory results for the above referenced samples that were received by the ChemServe sample custodian on the above referenced date. Any abnormalities to the samples upon receipt would be noted on the enclosed chain of custody document. This report is not valid without a completed chain of custody with the corresponding control number, attached.

All samples analyzed by ChemServe are subject to quality standards. These standards are as stringent or more stringent than those established under NELAC, 40 CFR Part 136, state certification programs, and corresponding methodologies. ChemServe has a written QA/QC Procedures Manual that outlines these standards, and is available for your reference, upon request. Unless otherwise stated on the Chain of Custody or within the report, all holding times, preservation techniques, container types, and analytical methods are analogous with those outlined by NELAC. All units are based on "as received" weight unless denoted "dry".

Residual chlorine, sulfite and pH are intended to be performed as an immediate field analysis. Should any of these analyses be performed in the lab instead of in the field it will result in those analyses being performed out of holding time.

Acrolein and 2-chloroethylvinyl ether require an additional analysis with an un-preserved sample. If unpreserved vials were not submitted for these additional analysis then acrolein and 2-CEVE are reported as estimated due to not meeting method requirements for EPA 624.1 or EPA 524.2.

I certify that I have reviewed the above referenced analytical data and state forms, and I have found this report within compliance with the procedures outlined within NELAC. ChemServe's certified parameter list can be found at <http://www.chemservelab.com/Laboratory-Information-and-Documentation.aspx>

Jay Chrystal - President/Laboratory Director

| | | | | | | |
|---------------------|-----------|----------|----------|----------|----------------|---------|
| MCP SW-846 | 8260C (x) | 8270D () | 8082A () | 8081A () | 7470/7471 () | 9014 () |
| Methods Used | 8151A () | EPH () | VPH () | 6010C () | 7000 series () | 7196 () |

| <i>An Affirmative response to questions A through F are required for "Presumptive Certainty" status</i> | | Yes | No |
|--|---|----------|----------|
| A | Were all samples received in a condition consistent with those described on the chain of custody including proper preservation, lab and field temperatures plus prepared and analyzed within holding times? | X | |
| B | Were all analytical method(s) and associated QC requirements specified in the selected CAM protocols followed? | X | |
| C | Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances? | X | |
| D | Does the laboratory report comply with all the reporting requirements specified in CAM VIIA "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data"? | X | |
| E | EPH & VPH methods only: Was each method conducted without significant modification(s)? | X | |
| F | Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative including all negative responses to questions A-F? | X | |
| <i>Responses to questions G, H & I are required for "Presumptive Certainty" status</i> | | | |
| G | Were all the reporting limits at or below all CAM reporting limits specified in the selected CAM protocols? | X | |
| <i>Data User Note: Data that achieve "Presumptive Certainty" status may not meet the data usability and representativeness requirements described in 310 CMR 40.1056 (2)(K) and WSC-07-350</i> | | | |
| H | Were all QC performance standards specified in the CAM protocol(s) achieved? | | X |
| I | Were results reported for the complete analyte list specified in the selected CAM protocols? | X | |

Case Narrative Section

Inorganic / Metals Analysis Discussion: N/A

Pesticide / PCB Analysis Discussion: N/A

EPH / Semi-volatiles Discussion: N/A

VPH / Volatiles Discussion: Some spiked controls with high recoveries; samples non-detect.

Sample Receiving and Comment Summary

| | |
|---|-----|
| Were samples submitted with a chain of custody? | Yes |
| Do all samples received match the chain of custody? | Yes |
| Were all samples received within applicable holding times? | Yes |
| Were all containers intact when received? | Yes |
| Were samples for volatile organic analysis free of headspace (per method)? | Yes |
| Was there evidence of cooling if not submitted the same day as sampling? | Yes |
| If the sample pH was not correct was it adjusted where applicable? | Yes |
| Were samples for dissolved metals already filtered by the client or field sampling? | N/A |
| Were Samples for O-phos filtered in the field? | N/A |
| Were samples received in the appropriate containers? | Yes |
| Where applicable; were chemical and micro samples received at correct temps. | Yes |

Qualifier: Description:

| | |
|-----|--|
| B- | Method blank contaminated with target analyte. |
| B1- | BOD had total oxygen loss. Result reported as ">" the highest dilution. |
| B2- | BOD had no oxygen loss. Result reported as "<" the lowest dilution. |
| G- | Reporting limit elevated due to matrix interference. |
| H- | Method prescribed holding time exceeded. |
| J- | Indicates an estimated value. Value is less than the quantitation limit. |
| IL- | Internal Standard(s) recovery was low due to matrix. Result may be biased high. |
| IH- | Internal Standard(s) recovery was high due to matrix. Result may be biased low. |
| LH- | Laboratory control spike(s) was high. Results may be biased high. |
| LL- | Laboratory control spike(s) was low. Results may be biased low. |
| MH- | Matrix spike recovery high due to matrix. Results may be biased high. |
| ML- | Matrix spike recovery low due to matrix. Results may be biased low. |
| N- | Non-target compound. Reported as a TIC. |
| NC- | Spike recovery was not calculated due to the concentration of the analyte being >4 times the concentration of the spike added. |
| R- | RPD outside acceptable recovery limits. |
| RO- | Sample received out of holding time. |
| SH- | Surrogate recovery high due to matrix |
| SL- | Surrogate recovery low due to matrix |
| U- | BOD/CBOD blank had an oxygen depletion greater than the suggested amount of 0.200. |
| V- | Sample pH for analysis was not within the required range when checked at time of analysis. |
| Z | Too numerous to count (TNTC) |

An "A" in the result column on the report indicates absent for presence/absent bacteria and a "P" indicates present for presence/absent bacteria.

Lab ID: 19080021
Date Received: 8/1/2019

Dear Scott Wozniakowski

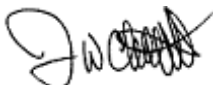

Enclosed please find the laboratory results for the above referenced samples that were received by the ChemServe sample custodian on the above referenced date. Any abnormalities to the samples upon receipt would be noted on the enclosed chain of custody document. This report is not valid without a completed chain of custody with the corresponding control number, attached.

All samples analyzed by ChemServe are subject to quality standards. These standards are as stringent or more stringent than those established under NELAC, 40 CFR Part 136, state certification programs, and corresponding methodologies. ChemServe has a written QA/QC Procedures Manual that outlines these standards, and is available for your reference, upon request. Unless otherwise stated on the Chain of Custody or within the report, all holding times, preservation techniques, container types, and analytical methods are analogous with those outlined by NELAC. All units are based on "as received" weight unless denoted "dry".

Residual chlorine, sulfite and pH are intended to be performed as an immediate field analysis. Should any of these analyses be performed in the lab instead of in the field it will result in those analyses being performed out of holding time.

Acrolein and 2-chloroethylvinyl ether require an additional analysis with an un-preserved sample. If unpreserved vials were not submitted for these additional analysis then acrolein and 2-CEVE are reported as estimated due to not meeting method requirements for EPA 624.1 or EPA 524.2.

I certify that I have reviewed the above referenced analytical data and state forms, and I have found this report within compliance with the procedures outlined within NELAC. ChemServe's certified parameter list can be found at <http://www.chemservelab.com/Laboratory-Information-and-Documentation.aspx>

Jay Chrystal - President/Laboratory Director

| <i>An Affirmative response to questions A through F are required for "Presumptive Certainty" status</i> | | Yes | No |
|--|---|----------|----------|
| A | Were all samples received in a condition consistent with those described on the chain of custody including proper preservation, lab and field temperatures plus prepared and analyzed within holding times? | X | |
| B | Were all analytical method(s) and associated QC requirements specified in the selected CAM protocols followed? | X | |
| C | Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances? | X | |
| D | Does the laboratory report comply with all the reporting requirements specified in CAM VIIA "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data"? | X | |
| E | EPH & VPH methods only: Was each method conducted without significant modification(s)? | X | |
| F | Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative including all negative responses to questions A-F? | X | |
| <i>Responses to questions G, H & I are required for "Presumptive Certainty" status</i> | | | |
| G | Were all the reporting limits at or below all CAM reporting limits specified in the selected CAM protocols? | X | |
| <i>Data User Note: Data that achieve "Presumptive Certainty" status may not meet the data usability and representativeness requirements described in 310 CMR 40.1056 (2)(K) and WSC-07-350</i> | | | |
| H | Were all QC performance standards specified in the CAM protocol(s) achieved? | | X |
| I | Were results reported for the complete analyte list specified in the selected CAM protocols? | X | |

Case Narrative Section

Inorganic / Metals Analysis Discussion: N/A

Pesticide / PCB Analysis Discussion: N/A

EPH / Semi-volatiles Discussion: N/A

VPH / Volatiles Discussion: Toluene result reported as estimated for high level exceeding calibration. Insufficient sample amount to analyze as dilution.

Sample Receiving and Comment Summary

| | |
|---|-----|
| Were samples submitted with a chain of custody? | Yes |
| Do all samples received match the chain of custody? | Yes |
| Were all samples received within applicable holding times? | Yes |
| Were all containers intact when received? | Yes |
| Were samples for volatile organic analysis free of headspace (per method)? | Yes |
| Was there evidence of cooling if not submitted the same day as sampling? | Yes |
| If the sample pH was not correct was it adjusted where applicable? | Yes |
| Were samples for dissolved metals already filtered by the client or field sampling? | N/A |
| Were Samples for O-phos filtered in the field? | N/A |
| Were samples received in the appropriate containers? | Yes |
| Where applicable; were chemical and micro samples received at correct temps. | Yes |

| Sample | Method | Client Identity | Matrix | Analyst |
|--------------|-----------|-----------------|-------------|---------|
| 19080021-001 | MADEP-VPH | B-2 | Groundwater | LauraB |

Comment: Toluene result reported as estimated due to slightly exceeding the calibration limits. No sample left for re-analysis.

Qualifier: Description:

- B- Method blank contaminated with target analyte.
- B1- BOD had total oxygen loss. Result reported as ">"the highest dilution.
- B2- BOD had no oxygen loss. Result reported as "<" the lowest dilution.
- G- Reporting limit elevated due to matrix interference.
- H- Method prescribed holding time exceeded.
- J- Indicates an estimated value. Value is less than the quantitation limit.
- IL- Internal Standard(s) recovery was low due to matrix. Result may be biased high.
- IH- Internal Standard(s) recovery was high due to matrix. Result may be biased low.
- LH- Laboratory control spike(s) was high. Results may be biased high.
- LL- Laboratory control spike(s) was low. Results may be biased low.
- MH- Matrix spike recovery high due to matrix. Results may be biased high.
- ML- Matrix spike recovery low due to matrix. Results may be biased low.
- N- Non-target compound. Reported as a TIC.
- NC- Spike recovery was not calculated due to the concentration of the analyte being >4 times the concentration of the spike added.
- R- RPD outside acceptable recovery limits.
- RO- Sample received out of holding time.
- SH- Surrogate recovery high due to matrix
- SL- Surrogate recovery low due to matrix
- U- BOD/CBOD blank had an oxygen depletion greater than the suggested amount of 0.200.
- V- Sample pH for analysis was not within the required range when checked at time of analysis.
- Z Too numerous to count (TNTC)

An "A" in the result column on the report indicates absent for presence/absent bacteria and a "P" indicates present for presence/absent bacteria.

Revised Report

J. Barr/ S. Wozniakowski
Endpoint
25 Buttrick Rd Unit D2
Londonderry NH 03053

Project Name: 20 Harvard St
Project #: 2588-001
Project Location: 18-24 Harvard Ave Dorchester MA
Control #: 116410

Lab ID: 19070282
Date Received: 7/17/2019

Dear J. Barr/ S. Wozniakowski

This revised report supercedes the original report pages for the above referenced Lab ID. The original Report was dated: 7/29/2019 and is superceded by this report dated: 8/9/2019

Please refer to the Comment Summary Page for revision explanations. Replace the original report that was issued with this revised report.

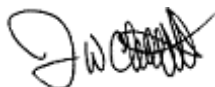

Enclosed please find the laboratory results for the above referenced samples that were received by the ChemServe sample custodian on the above referenced date. Any abnormalities to the samples upon receipt would be noted on the enclosed chain of custody document. This report is not valid without a completed ChemServe chain of custody with the corresponding control number, attached.

All samples analyzed by ChemServe are subject to quality standards. These standards are as stringent or more stringent than those established under NELAC, 40 CFR Part 136, state certification programs, and corresponding methodologies. ChemServe has a written QA/QC Procedures Manual that outlines these standards, and is available for your reference, upon request. Unless otherwise stated on the Chain of Custody or within the report, all holding times, preservation techniques, container types, and analytical methods are analogous with those outlined by NELAC. All units are based on "as received" weight unless denoted "dry".

Residual chlorine, sulfite and pH are intended to be performed as an immediate field analysis. Should any of these analyses be performed in the lab instead of in the field it will result in those analyses being performed out of holding time.

Acrolein and 2-chloroethylvinyl ether require an additional analysis with an un-preserved sample. If unpreserved vials were not submitted for these additional analysis then acrolein and 2-CEVE are reported as estimated due to not meeting method requirements for EPA 624.1 or EPA 524.2.

I certify that I have reviewed the above referenced analytical data and state forms, and I have found this report within compliance with the procedures outlined within NELAC. ChemServe's certified parameter list can be found at <http://www.chemservelab.com/Laboratory-Information-and-Documentation.aspx>

Jay Chrystal - President/Laboratory Director

| <i>An Affirmative response to questions A through F are required for "Presumptive Certainty" status</i> | | Yes | No |
|--|---|----------|----------|
| A | Were all samples received in a condition consistent with those described on the chain of custody including proper preservation, lab and field temperatures plus prepared and analyzed within holding times? | X | |
| B | Were all analytical method(s) and associated QC requirements specified in the selected CAM protocols followed? | X | |
| C | Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances? | X | |
| D | Does the laboratory report comply with all the reporting requirements specified in CAM VIIA "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data"? | X | |
| E | EPH & VPH methods only: Was each method conducted without significant modification(s)? | X | |
| F | Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative including all negative responses to questions A-F? | X | |
| <i>Responses to questions G, H & I are required for "Presumptive Certainty" status</i> | | | |
| G | Were all the reporting limits at or below all CAM reporting limits specified in the selected CAM protocols? | X | |
| <i>Data User Note: Data that achieve "Presumptive Certainty" status may not meet the data usability and representativeness requirements described in 310 CMR 40.1056 (2)(K) and WSC-07-350</i> | | | |
| H | Were all QC performance standards specified in the CAM protocol(s) achieved? | | X |
| I | Were results reported for the complete analyte list specified in the selected CAM protocols? | X | |

Case Narrative Section

Inorganic / Metals Analysis Discussion: N/A

Pesticide / PCB Analysis Discussion: N/A

EPH / Semi-volatiles Discussion: N/A

VPH / Volatiles Discussion: Some spiked controls with high recoveries; samples non-detect.

| 1,2,3-Trichlorobenzene | 20 | 23 | 115% | 24 | 118% | 2.72% |

Acceptable Percent Recoveries are 70-130%.

Extended Acceptable Percent Recoveries of 40%-160% for dichlorodifluoromethane, bromomethane, chloromethane, acetone, acrolein, TBA, MEK, MIBK, and 2-hexanone.

Acceptable % RPD is $\leq 20\%$

Sample Receiving and Comment Summary

| | |
|---|-----|
| Were samples submitted with a chain of custody? | Yes |
| Do all samples received match the chain of custody? | Yes |
| Were all samples received within applicable holding times? | Yes |
| Were all containers intact when received? | Yes |
| Were samples for volatile organic analysis free of headspace (per method)? | Yes |
| Was there evidence of cooling if not submitted the same day as sampling? | Yes |
| If the sample pH was not correct was it adjusted where applicable? | Yes |
| Were samples for dissolved metals already filtered by the client or field sampling? | N/A |
| Were Samples for O-phos filtered in the field? | N/A |
| Were samples received in the appropriate containers? | Yes |
| Where applicable; were chemical and micro samples received at correct temps. | Yes |

| Qualifier: | Description: |
|------------|--|
| B- | Method blank contaminated with target analyte. |
| B1- | BOD had total oxygen loss. Result reported as ">" the highest dilution. |
| B2- | BOD had no oxygen loss. Result reported as "<" the lowest dilution. |
| G- | Reporting limit elevated due to matrix interference. |
| H- | Method prescribed holding time exceeded. |
| J- | Indicates an estimated value. Value is less than the quantitation limit. |
| IL- | Internal Standard(s) recovery was low due to matrix. Result may be biased high. |
| IH- | Internal Standard(s) recovery was high due to matrix. Result may be biased low. |
| LH- | Laboratory control spike(s) was high. Results may be biased high. |
| LL- | Laboratory control spike(s) was low. Results may be biased low. |
| MH- | Matrix spike recovery high due to matrix. Results may be biased high. |
| ML- | Matrix spike recovery low due to matrix. Results may be biased low. |
| N- | Non-target compound. Reported as a TIC. |
| NC- | Spike recovery was not calculated due to the concentration of the analyte being >4 times the concentration of the spike added. |
| R- | RPD outside acceptable recovery limits. |
| RO- | Sample received out of holding time. |
| SH- | Surrogate recovery high due to matrix |
| SL- | Surrogate recovery low due to matrix |
| U- | BOD/CBOD blank had an oxygen depletion greater than the suggested amount of 0.200. |
| V- | Sample pH for analysis was not within the required range when checked at time of analysis. |
| Z | Too numerous to count (TNTC) |

An "A" in the result column on the report indicates absent for presence/absent bacteria and a "P" indicates present for presence/absent bacteria.

Londonderry, NH 03053-3353
ATTN: Scott Wozniakowski

REPORT DATE: 5/13/2019

PURCHASE ORDER NUMBER: 2588-001

PROJECT NUMBER: 2588-001

ANALYTICAL SUMMARY

WORK ORDER NUMBER: 19E0298

The results of analyses performed on the following samples submitted to the CON-TEST Analytical Laboratory are found in this report.

PROJECT LOCATION: 18 Harvard Ave., Dorchester, MA

| FIELD SAMPLE # | LAB ID: | MATRIX | SAMPLE DESCRIPTION | TEST | SUB LAB |
|----------------|------------|----------|--------------------|-----------------|---------|
| SG-1 | 19E0298-01 | Soil Gas | | MADEP APH rev 1 | |
| SG-2 | 19E0298-02 | Soil Gas | | MADEP APH rev 1 | |

CASE NARRATIVE SUMMARY

All reported results are within defined laboratory quality control objectives unless listed below or otherwise qualified in this report.

MADEP APH rev 1

No significant modifications were made to the APH method.

All performance/acceptance standards for required QA/QC procedures were achieved unless otherwise indicated in this case narrative.

The results of analyses reported only relate to samples submitted to the Con-Test Analytical Laboratory for testing.

I certify that the analyses listed above, unless specifically listed as subcontracted, if any, were performed under my direction according to the approved methodologies listed in this document, and that based upon my inquiry of those individuals immediately responsible for obtaining the information, the material contained in this report is, to the best of my knowledge and belief, accurate and complete.

A handwritten signature in black ink, appearing to read "Lisa A. Worthington", is written over a light gray rectangular background.

FLAG/QUALIFIER SUMMARY

| | |
|-----|---|
| * | QC result is outside of established limits. |
| † | Wide recovery limits established for difficult compound. |
| ‡ | Wide RPD limits established for difficult compound. |
| # | Data exceeded client recommended or regulatory level |
| ND | Not Detected |
| RL | Reporting Limit is at the level of quantitation (LOQ) |
| DL | Detection Limit is the lower limit of detection determined by the MDL study |
| MCL | Maximum Contaminant Level |

Percent recoveries and relative percent differences (RPDs) are determined by the software using values in the calculation which have not been rounded.

No results have been blank subtracted unless specified in the case narrative section.

MADEP MCP Analytical Method Report Certification Form

| | |
|---|--------------------|
| Laboratory Name: Con-Test Analytical Laboratory | Project #: 19E0298 |
| Project Location: 18 Harvard Ave., Dorchester, MA | RTN: |

This Form provides certifications for the following data set: [list Laboratory Sample ID Number(s)]
19E0298-01 thru 19E0298-02

Matrices: Air

CAM Protocol (check all that below)

| | | | | | |
|------------------------------|------------------------------|-----------------------------|--------------------------------|---|---------------------------------------|
| 8260 VOC CAM II A () | 7470/7471 Hg CAM IIIB () | MassDEP VPH CAM IV A () | 8082 PCB CAM V A () | 9014 Total Cyanide/PAC CAM VI A () | 6860 Perchlorate CAM VIII B () |
| 8270 SVOC CAM II B () | 7010 Metals CAM III C () | MassDEP VPH CAM IV C () | 8081 Pesticides CAM V B () | 7196 Hex Cr CAM VI B () | MassDEP APH CAM IX A (X) |
| 6010 Metals CAM III A () | 6020 Metals CAM III D () | MassDEP EPH CAM IV B () | 8151 Herbicides CAM V C () | 8330 Explosives CAM VIII A () | TO-15 VOC CAM IX B () |

Affirmative response to Questions A through F is required for "Presumptive Certainty" status

| | | |
|------------|---|--|
| A | Were all samples received in a condition consistent with those described on the Chain-of-Custody, properly preserved (including temperature) in the field or laboratory, and prepared/analyzed within method holding times? | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ¹ |
| B | Were the analytical method(s) and all associated QC requirements specified in the selected CAM protocol(s) followed? | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ¹ |
| C | Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances? | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ¹ |
| D | Does the laboratory report comply with all the reporting requirements specified in CAM VII A, Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data? | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ¹ |
| E a | VPH, EPH, and APH Methods only: Was each method conducted without significant modification(s)? (Refer to the individual method(s) for a list of significant modifications). | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ¹ |
| E b | APH and TO-15 Methods only: Was the complete analyte list reported for each method? | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ¹ |
| F | Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative (including all No responses to Questions A through E)? | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ¹ |

A response to questions G, H and I below is required for "Presumptive Certainty" status

| | | |
|----------|---|--|
| G | Were the reporting limits at or below all CAM reporting limits specified in the selected CAM protocol(s)? | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ¹ |
|----------|---|--|

Data User Note: Data that achieve "Presumptive Certainty" status may not necessarily meet the data usability and representativeness requirements described in 310 CMR 40. 1056 (2)(k) and WSC-07-350.

| | | |
|----------|--|--|
| H | Were all QC performance standards specified in the CAM protocol(s) achieved? | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ¹ |
| I | Were results reported for the complete analyte list specified in the selected CAM protocol(s)? | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ¹ |

¹All Negative responses must be addressed in an attached Environmental Laboratory case narrative.

I, the undersigned, attest under the pains and penalties of perjury that, based upon my personal inquiry of those responsible for obtaining the information, the material contained in this analytical report is, to the best of my knowledge and belief, accurate and complete.

MADEP MCP Response Action Analytical Report Certification

This form provides certifications for all samples performed by MCP methods. Please refer to the Sample Results and Container Information sections of this report for specification of MCP methods used for each analysis. The following questions pertain only to MCP Analytical Methods.

| An affirmative response to questions A through F is required for "Presumptive Certainty" status | | |
|--|---|-----|
| A | Were all samples received in a condition consistent with those described on the Chain-of-Custody, properly preserved (including temperature) in the field or laboratory, and prepared/analyzed within method holding times? | YES |
| B | Were the analytical method(s) and all associated QC requirements specified in the selected CAM protocol(s) followed? | YES |
| C | Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances? | YES |
| D | Does the laboratory report comply with all the reporting requirements specified in CAM VII A, "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data?" | YES |
| E a. | VPH, EPH, and APH Methods only: Was each method conducted without significant modification(s)? (Refer to the individual method(s) for a list of significant modifications). | YES |
| E b. | APH and TO-15 Methods only: Was the complete analyte list reported for each method? | NO |
| F | Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative (including all "No" responses to Questions A through E)? | YES |
| A response to questions G, H and I is required for "Presumptive Certainty" status | | |
| G | Were the reporting limits at or below all CAM reporting limits specified in the selected CAM protocol(s)? | YES |
| H | Were all QC performance standards specified in the CAM protocol(s) achieved? | YES |
| I | Were results reported for the complete analyte list specified in the selected CAM protocol(s)? | NO |
| For any questions answered "No", please refer to the case narrative section on the following page(s). | | |

Please note that sample matrix information is located in the Sample Results section of this report.

Project Name: BOSTON BODY SHOP
Project Number: Not Specified

Lab Number: L1931137
Report Date: 07/22/19

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Case Narrative (continued)

MCP Related Narratives

Canisters were released from the laboratory on July 12, 2019. The canister certification data is provided as an addendum.

MCP Volatile Organics in Air

In reference to questions E b/l:

All samples were analyzed for a subset of the MCP compounds since 1,3-Butadiene failed in the APH analytical sequence, see below.

L1931137-01: The sample has elevated detection limits due to the dilution required by the elevated concentrations of non-target compounds in the sample.

Petroleum Hydrocarbons in Air

L1931137-01: The sample has elevated detection limits due to the dilution required by the elevated concentrations of target compounds in the sample.

In reference to questions H:

The WG1262516-3 LCS recovery for 1,3-butadiene (137%) is above the upper 130% acceptance limit. All samples associated with this LCS do not have reportable amounts of this analyte.

Sample Receipt

The sample designated SG-1 (L1931137-01) had a RPD for the pre- and post-flow controller calibration check (42% RPD) that was outside of the control limit (20% RPD). The initial flow rate for the flow controller was 160 mL/minute; the final flow rate was 246 mL/minute. The final pressure recorded by the laboratory of the associated canister was -5.6 inches of mercury. No further action was required.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

| | |
|----------|--|
| DL | - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) |
| EDL | - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME). |
| EMPC | - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration. |
| EPA | - Environmental Protection Agency. |
| LCS | - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes. |
| LCSD | - Laboratory Control Sample Duplicate: Refer to LCS. |
| LFB | - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes. |
| LOD | - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) |
| LOQ | - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) |
| MDL | - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. |
| MS | - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values. |
| MSD | - Matrix Spike Sample Duplicate: Refer to MS. |
| NA | - Not Applicable. |
| NC | - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit. |
| NDPA/DPA | - N-Nitrosodiphenylamine/Diphenylamine. |
| NI | - Not Ignitable. |
| NP | - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil. |
| RL | - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable. |
| RPD | - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report. |
| SRM | - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples. |
| STLP | - Semi-dynamic Tank Leaching Procedure per EPA Method 1315. |
| TEF | - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD. |
| TEQ | - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values. |
| TIC | - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations. |

Footnotes

Report Format: Data Usability Report

Project Name: BOSTON BODY SHOP**Lab Number:** L1931137**Project Number:** Not Specified**Report Date:** 07/22/19

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1.8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- J** - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- ND** - Not detected at the reporting limit (RL) for the sample.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility

EPA 624/624.1: m/p-xylene, o-xylene

EPA 8260C: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene, Azobenzene; SCM: Iodomethane (methyl iodide), Methyl methacrylate, 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.

EPA 8270D: NPW: Dimethylnaphthalene, 1,4-Diphenylhydrazine; SCM: Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 6860: SCM: Perchlorate

SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO₂, NO₃.

Mansfield Facility

SM 2540D: TSS

EPA 8082A: NPW: PCB: 1, 5, 31, 87,101, 110, 141, 151, 153, 180, 183, 187.

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene,

3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

Biological Tissue Matrix: EPA 3050B

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility:

Drinking Water

EPA 300.0: Chloride, Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE,**

EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B

EPA 332: Perchlorate; **EPA 524.2:** THMs and VOCs; **EPA 504.1:** EDB, DBCP.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, SM9222D.**

Non-Potable Water

**APPENDIX F:
TRC STAFF AND ENVIRONMENTAL PROFESSIONAL
QUALIFICATIONS/RESUMES**

Neil J. Frasca, PG (Senior Project Manager)

B.S., Geological Sciences, Salem State University, 1990

Experience

Mr. Frasca is a Senior Project Manager at TRC and holds a Bachelor of Science degree in Geological Science from Salem State University (1990). He has over 20 years of experience and is responsible for overseeing remediation projects performed under the Massachusetts Contingency Plan (MCP) and the New Hampshire Contaminated Site Management rules. Mr. Frasca has managed work for major petroleum corporations, industrial clients, municipalities, real estate companies and public utilities. He is responsible for the coordination, execution and reporting of environmental projects. He has also managed response actions at numerous petroleum release spills.

Nicole M. Hudson (Geologist / Environmental Professional)

B.S., Geological Sciences, Salem State University, 2008

Experience

Ms. Hudson is a Scientist II with TRC and holds a Bachelor of Science degree in Geological Science from Salem State University (2008). She has over 10 years of experience including managing and performing due diligence, regulatory compliance, site assessment, investigations, and remediation projects. Ms. Hudson's experience includes many field sampling procedures, contractor oversight with environmental monitoring and reporting experience including Phase I/Phase II reporting as well as regulatory compliance status and completion reporting. She has experience in site inspection including locations such as vacant lots, auto repair shops, and residential, industrial and commercial properties.

**APPENDIX G:
ENVIRONMENTAL PROFESSIONAL STATEMENT**

**DEFINITION OF ENVIRONMENTAL PROFESSIONAL AND RELEVANT
EXPERIENCE THERETO PURSUANT TO 40 CFR 312**

(1) a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f).

(2) Such a person must: (i) hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of three (3) years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or (iv) have the equivalent of ten (10) years of full-time relevant experience.

(3) An environmental professional should remain current in his or her field through participation in continuing education or other activities.

(4) The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as part of the inquiry identified in §312.21(b).

(5) A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

Relevant experience, as used in the definition of environmental professional in this section, means: participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (see §312.1(c)) to the Site. TRC personnel resumes are included in **Appendix F**.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Signature of
Environmental
Professional:
