sign proposal

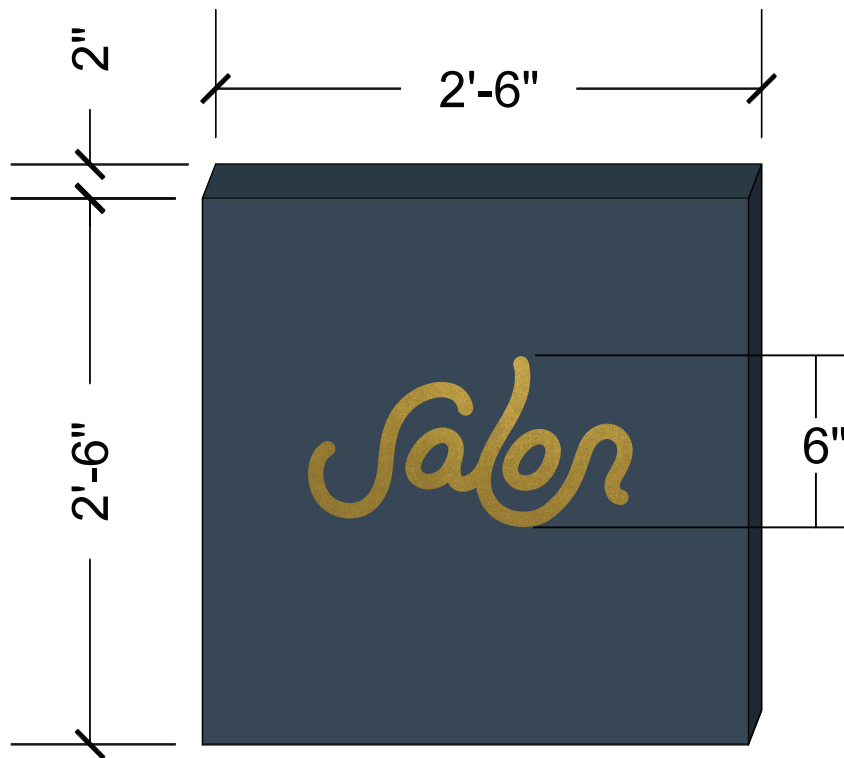

Salon

specifications

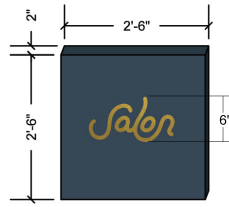

Salon LLC dba Salon Design is a curated design showroom, home concept store, and gallery space located in the historic Beacon Hill neighborhood of Boston. The space is a platform for emerging and established female designers in wallpaper, textiles, rugs, furniture and lighting that have no representation in Boston or, in the case of some designers, the US. The setup of showroom is a new type of retail experience for Boston. The space will feel intimate and homey, the focus will be on personalized service and client education. We want our clients to understand and place value on the process used by each designer we represent. The showroom will also have a sophisticated collection of homewares available for those who prefer instant gratification. The gallery will showcase original and edition based avant-garde furniture, be a space to debut new collections and a platform for collaborative design.

Salon LLC would like to hang two new 30" square wood blade signs on the front façade of 122 & 126 Charles using the existing brackets. The signs will be navy blue and the 6" lettering will be done in 23 carat gold leaf. The two signs will be identical. Included in this presentation is a rendering of the sign including dimensions, as well as a photo representation of the signs in front of the building.

Thank you for your consideration.
