III. DESCRIPTION OF PROPOSED WORK

Smashburger would like to have better patio lighting by using LED string lights swagged from front of patio area back to the building face. In order to accomplish this, we propose to install (2) 4" x 4" steel columns at the front corners of the patio. These posts will be 10 ft tall with a 3" x 4" cross beam bolted to the top of the 2 posts. The cross beam will have welded loops to attach stainless steel wire that will then be run to the bottom of the overhang above the front entry. Protruding below the ceiling of the overhang are old 2" x 2" steel supports for old signage that were going to be the central mounting point for 5 SS wires to support the string lights. The steel posts are .25 wall 4x4 welded to 2' x 2' steel plates at 1" thick and secured to the concrete with 1/2" dia concrete bolts at the corners of the base. The steel structure will be powder coated in black. The lighting will be individual strings of LED low light soft lamps that will be tied together and connected to a new power receptacle on the ceiling of the overhang

REQUIRED DOCUMENTATION: Please include all required documentation with this application; review instructions carefully for details.

ESTIMATED COST OF PROPOSED WORK: \$5000<sup>00</sup>
